Imagine leaving behind the drudgery of diagramming sentences. Imagine, instead, joyful writers who are capable of revising their work and writing effectively. By taking writing down to its basic building block, a solid sentence, and advancing from there, students will develop confidence, enjoy creating sentences, and ultimately empower each other as writers. Lessons for Grades 3 - 12 include: a variety of sentence patterns presented in a logical sequence; and explanation of each pattern's structure and conventions; reinforcement activities and sample sentences for each pattern; and activities to develop the necessary instructional vocabulary. This indispensable handbook serves as a blueprint for instruction and unit development by emphasizing the end goal: preparing students to be effective writers. Along the way, all students, including English language learners, will gain the fluency and automatically needed for effective daily writing and for success on high-stakes tests.

Grammar by Diagram, second edition is a book designed for anyone who wishes to improve grammatical understanding and skill. Using traditional sentence diagramming as a visual tool, the book explains how to expand simple sentences into compound, complex, and compound-complex sentences, and how to employ verbals (infinitives, gerunds, and participles) and other structures for additional variety. The text addresses the most frequent usage errors by explaining how to distinguish between adjectives and adverbs; how to avoid problems of pronoun case, agreement, and consistency; how to ensure that verbs will agree with their subjects and will be appropriate in terms of tense, aspect, voice, and mood; and how to phrase sentences to avoid errors in parallelism or placement of modifiers. Six appendices incorporate further exercises, a summary of key basics from the text, and supplemental material not included in the body of the text but useful for quick reference. This new edition includes additional exercises and has been revised and updated throughout.
