

Chemistry A Level Ocr

Written by the University of York project team for Salters Advanced Chemistry, this Student Book supports and extends students through the new linear course while delivering the breadth, depth, and skills needed to succeed in the new A Level and beyond. It develops true subject knowledge while also developing essential exam skills. The fourth edition combines the Chemical Storyline and Chemical Ideas into a single, integrated volume for the first time, providing ideal support for the new specification. With My Revision Notes you can: - Manage your own revision with step-by-step support from experienced teacher and examiner Mike Smith - Apply biological terms accurately with the help of definitions and key words - Plan and pace your revision with the revision planner - Test understanding with questions throughout the book - Get exam ready with last minute quick quizzes available on the Hodder Education website

AS-Level Chemistry OCR B (Salters) Complete Revision & Practice

Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements. This guide offers advice on preparing for the OCR(B) (Salters) Units F333 Chemistry in Practice and F336 Individual Investigation assessments. The Practical Chemistry section deals with experimental results and practical techniques. It explains how to obtain and record results and how to process them.

This is the Paperback Edition; our original Printed Revision Cards and a Kindle version are also available. Learning the right facts for your exams is key to obtaining top grades, and a few reactions or definitions can make the difference between grades in an exam. Revision Cards are a great way to ensure that you learn all of the key facts that you need to know, and we honestly believe that these Revision Cards are the most concise and precise that you will find. These Revision Cards are for the old exams (for courses starting in 2014 or earlier), and are designed specifically for the OCR A Chemistry AS-level. They include 16 cards for F321 and 20 cards for F322. These cards cover the key Reactions, Definitions, Equations and Reaction Mechanisms that you need to know for your exams (plus a few other important bits). Each Revision Card covers a single topic and gives only the facts that you need to learn off-by-heart for your exams. They have been carefully written to ensure that they do not contain any waffle - just the key facts that you need to learn. These cards were written by a group of experienced teachers, tutors and examiners, who have decades of combined teaching experience, thousands of hours of tuition experience and have marked thousands of exam papers as examiners/team leaders. They have painstakingly trawled through module specifications, textbooks and exam mark schemes to produce a set of Revision Cards which cover the key facts required for the F321 and F322 exams. They focus specifically on areas where students tend to perform badly in exams.

AS-Level Chemistry OCR A Complete Revision & Practice

focused. It also contains a wealth of exam-style questions to test your knowledge and skills to help you fully prepare for the exams.

Written by curriculum and specification experts, this Student Book supports and extends students through the new linear course while delivering the breadth, depth, and skills needed to succeed in the new A Levels and beyond. It develops true subject knowledge while also developing essential exam skills.

Most revision guides provide either content with a few questions, or just practice questions, but this guide presents a good balance of both. The author is highly experienced in preparing students for examinations from all the exam groups, and has trialled the scripts thoroughly. This book is written in plain English to help the student understand and revise. For each of 16 topics there are three pages of key content points followed by plenty of questions to test yourself and to make you aware of any areas needing further study. General guidance on the specifications, revision, and how to approach the exam are provided at the start of the book, and full answers at the end. This book is fully revised for A2 OCR chemistry. As requested by readers this version has more space than earlier versions.
