After living in San Francisco for fifteen years, journalist Gordon Young found himself yearning for his Rust Belt hometown: Flint, Michigan, the birthplace of General Motors and the "star" of the Michael Moore documentary *Roger & Me*. Hoping to rediscover

and help a place that had once boasted one of the world's highest per capita income levels but had become one of the country's most impoverished and dangerous cities, he returned to Flint with the intention of buying a house. What he found was a place of stark contrasts and dramatic stories, where an exotic dancer could afford a lavish mansion, speculators scooped up cheap houses by the dozen on eBay, and arson was often the quickest route to neighborhood beautification. Skillfully blending personal memoir, historical inquiry, and interviews with Flint residents, Young constructs a vibrant tale of a once-thriving city still fighting—despite overwhelming odds—to rise from the ashes. He befriends a ragtag collection of urban homesteaders and die-hard locals who refuse to give up as they try to transform Flint into a smaller, greener town that offers lessons for cities all over the world. Hard-hitting, insightful, and often painfully funny, *Teardown* reminds us that cities are ultimately defined by people, not politics or economics.

The deeper she digs, the more dirt she finds: a conniving best friend, a stalker ex-boyfriend, and a marriage in shambles. The closer Madeleine gets to the truth, the murkier the waters become. Her source’s looming presence and constant meddling in her investigation paired with her growing bond with Connor over their shared grief have blinded her to the facts, but nothing explains why Allegra Hudson’s life feels so familiar. Only one thing is certain: Madeleine can trust no one. One Little Word is a deliciously clever game of cat-and-mouse with a completely unexpected twist.

Developed from the authors' longstanding course on decision and risk analysis, Value-Added Decision Making for Managers explores the important interaction between decisions and management action and clarifies the barriers to rational decision making. The authors analyze strengths and weaknesses of the best alternatives, enabling decision makers to improve on these alternatives by adding value and reducing risk. The core of the text addresses decisions that involve selecting the best alternative from diverse choices. The decisions include buying a car, picking a supplier or home contractor, selecting a technology, picking a location for a manufacturing plant or sports stadium, hiring an employee or selecting among job offers, deciding on the size of a sales force, making a late design change, and sourcing to emerging markets. The book also covers more complex decisions arising in negotiations, strategy, and ethics that involve multiple dimensions simultaneously. Numerous activities interspersed throughout the text highlight real-world situations, helping readers see how the concepts presented can be used in their own work environment or personal life. Each chapter also includes discussion questions and references. Web Resource The book's website at <http://ise.wayne.edu/research/decision.php> offers tutorials of Logical Decisions software for multi-objective decisions and Precision Tree software for probabilistic decisions.
