This colorful skills atlas serves as a portable, quick-reference to step-by-step pediatric nursing procedures. The manual guides you through more than 70 pediatric skills using full-color photographs and rationales. It also includes chapters on physical assessment, special pain management techniques, cardiorespiratory care, administration of medications, including intravenous access, and other information useful to nurses in the clinical setting. Throughout Ball & Bindler's Pediatric Nursing, 3rd Edition, special cross-reference icons refer readers to the complete skill presentation in this manual. This Clinical Skill Manual includes: A short description of each skill, followed by the preparation needed by the nurse, equipment and supplies required, and the procedure. Margin boxes and tables with important safety issues, growth and development considerations, teaching for families, and clinical tips. Appendices that provide information on growth grids and calculation of body surface area for medication administration.

This extensively-updated text is designed to promote excellence in pediatric nursing care, in both acute care settings and in the community. CHILD HEALTH NURSING, 3/e focuses on helping students synthesize new knowledge, apply evidence-based findings, collaborate with children, families, and other healthcare professionals, and use clinical reasoning to plan superior care. It views families as integral participants in all care, and recognizes that all children need health promotion and maintenance interventions, wherever they seek care or whatever conditions they are experiencing. This edition uses current NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020 recommendations. Sample nursing care plans help students apply developmental, psychosocial, and physiologic concepts to the care of children with specific conditions. Research, clinical reasoning, and evidence-based practice are emphasized and integrated throughout, and coverage of contemporary topics ranges from genomics to new pharmacological treatment options.

A classic text since it was first published in 1974, the Lippincott Manual for Nursing Practice (LMNP) has provided essential nursing knowledge and up-to-date information on patient care for nearly 40 years. Now in its 10th edition, this full-color text continues to serve as the most comprehensive reference for practicing nurses and nursing students worldwide. Often referred as the 'Lippincott Manual' or simply the 'Lippincott', the LMNP is widely used as a procedure manual for many healthcare institutions (contains 157 Nursing Procedure Guidelines). It is also widely regarded as the Gold Standard for nursing practice in the classroom. Organized into five major parts, LMNP presents a comprehensive reference for all types of core nursing care. Part 1: Nursing Process & Practice; Part 2: Medical-Surgical Nursing; Part 3: Maternity & Neonatal Nursing; Part 4: Pediatric Nursing; Part 5: Psychiatric Nursing. Content is evidence-based with supporting articles highlighted in actual entries and procedure guidelines. Official Guidelines that shape practice are incorporated in to the content and include those from the National Institutes of Health, American Diabetes Association, American Heart Association, American Nurses Association, Joint Commission, AWHONN, and others. A companion Website includes full text, an image bank, and drug-related NCLEX®-style questions, FDA updates, and new clinical studies.

The Seventh Edition of this colorful, student-friendly LPN/LVN textbook has been thoroughly revised to provide even more of the knowledge and skills today's students need to provide safe and effective pediatric care. The text covers foundations and special concerns of pediatric nursing, age-specific developmental information, and clinically-focused coverage of common pediatric illnesses and disorders, organized by growth and development. An updated art program includes hundreds of photographs and illustrations.

Workbook pages at the end of each chapter include NCLEX-PN style review questions, study activities, critical thinking questions, and dosage calculations. A bound-in CD-ROM includes Watch & Learn video clips and pediatric dosage calculation problems.

This Study Guide to accompany the Seventh Edition of Maternal & Child Health Nursing, by Adele Pillitteri, is designed to help students practice and retain the knowledge from the textbook, and it is structured to integrate that knowledge and give students a basis for applying it in their nursing practice.

This highly respected book helps students develop the technical skills and broad understanding vital for effective practice while ensuring they never lose sight of the importance of compassion in their role as nurses. Presenting maternal-newborn and child health care not as two separate disciplines but as a continuum of knowledge, Maternal and Child Health Nursing, Seventh Edition views the experience of wellness and illness as family-centered events and pregnancy and childbirth as periods of wellness in a woman's life. Consistently linking theory with application to bring clinical concepts to life and using a nursing process framework to help students prepare for effective practice, this Seventh Edition adds new chapter-ending case studies, an expanded focus on culture and families, the latest QSEN content, and more. In addition, this edition is supported by PrepU's adaptive quizzing, DocuCare's educational electronic health record software, and a fully updated Study Guide.

Essentials of Pediatric Nursing is intended for Pediatric Nursing courses with an integrated pediatric curriculum. It provides a unique concept-based approach and nursing process focus, that helps students go from concept to application by building on previously mastered knowledge from other courses. With a focus on helping students apply concepts learned from the book and linking closely with digital resources such as adaptive quizzing and pediatric nursing videos Essentials of Pediatric Nursing is a resource that will ensure student success."

Now in its Fourth Edition, Health Assessment in Nursing is a colorful, user-friendly introductory level health assessment text for RN-level students. Targeted to ADN and BSN programs, this text presumes no prior knowledge of health assessment and is part of a suite that includes Lab Manual to Accompany Health Assessment in Nursing, Nurses' Handbook of Health

Assessment, and Weber & Kelley's Interactive Nursing Assessment. For this edition, the COLDSPA mnemonic, which guides students through investigation of symptoms, has been revised to show specific applications to content in each chapter. A sample application of COLDSPA is presented at the beginning of each chapter's Nursing History section, and another accompanies each case study. The Frail Elderly chapter has been streamlined, with a stronger focus on the normal variations associated with assessment of elderly clients. Includes DVD-ROM.

Growing research shows that many children from immigrant and refugee families are not doing well in school, due in part to linguistic and cultural disadvantages. Teaching dual-language learners requires cultural sensitivity, an understanding of language acquisition, and intentional teaching strategies. Combining research and techniques, this resource helps early childhood educators support dual-language learners as they develop the skills necessary for school readiness and success.
