The literary canon implies the evaluation or estimation of certain literary texts as the most important during a particular time. The canon is not merely a set of texts; it is a set of standards, evaluative procedures and values. Belonging to a canon confers a guarantee of literary greatness. A canon is formed, by a particular group, to channelize cultural hegemony over others, or, can be constructed, by a governed group, to bring about cultural symmetry. The rise of diverse literatures in English in different parts of the world after the colonial rule of England was the consequence of an urge to articulate a cultural equilibrium or an urge to strike back. The process of canon formation is also a focused and bigoted act, and is always carried out to accomplish certain self-centred objectives. It is commonly accepted that canon formation is executed to accomplish or naturalize certain ideological functions. In the sphere of Indian English literature, Indian English fiction after the end of the 1980s has emerged as a new "canon". This book looks into the process of literary canon formation in Indian universities, and examines such fiction as an alternative literary canon and as an anti-imperialistic response to the British literary canon. The book ascertains the anti-imperialistic design involved in forming the canon of post-1980 Indian English fiction, examines the gradual emerging trends in such fiction, and discerns the role of language, culture, and native ethos in the formation of a canon. It also differentiates post-1980s Indian English fiction from British fiction, bhasa fiction, and even from pre-1980s Indian English fiction.

A teacher is a person who not only teaches but also guides his/her student in building a successful career. The future of a nation lies upon the level of knowledge the people in the country are having. Thus, the responsibility of a teacher goes far beyond what we think of it at an individual level. We have seen people are interested in making their career in many other professions but teaching as a profession is not the first choice in most cases. Nevertheless, teaching is one of the most interesting professions as it involves a continuous learning exercise and at the same time making others learned by delivering the knowledge one is having. The teachers assess their students but at first, they also get assessed under UGC NET conducted by the National Testing Agency.
