This book addresses the questions why citizenship education is an important subject for students in further and adult education and why we need democratic colleges to support the study of citizenship education. It investigates the historical roots of further

and adult education and identifies how the adoption of citizenship education in the post-compulsory sector can enrich vocational studies in further education and programmes in adult education. It is argued that democratic colleges are vital to ensure that citizenship education informs the decision-making process throughout educational institutions (and as a means of establishing fair and equal representation for important stakeholders). The author has worked in both sectors for over a decade, and uses this experience to offer a blend of educational practice and philosophical investigation. The result is a work that appeals to both teachers in further and adult education as well as academics and students interested in philosophy of education.?

The directory gives key contact details and specialisms of over a thousand organizations which offer information and services in the following categories: functional skills; organizational skills; personal skills; trainer support services; equipment and materials; and qualifications and standards.

In October 2004, the Tomlinson report (downloadable at <http://www.dfes.gov.uk/14-19/documents/Final%20Report.pdf>) set out wide-ranging proposals for changes to the curriculum and examination arrangements for the education of 14 to 19 year olds. In February 2005, the Government published its response in the form of a White Paper (Cm. 6476, ISBN 9780101647625) detailing a 10-year reform programme including the introduction of 14 new awards (originally called vocational Diplomas); thus rejecting the overarching Diploma award recommended in the Tomlinson report. Whilst stating its belief that the proposed changes would have been better structured and more coherent had Tomlinson's proposals been adopted, the Committee's report examines the design, development and implementation of the Government's Diplomas scheme.

The 14-19 education reform programme aims to increase young people's participation in education and training beyond age 16 and raise their educational attainment. Central to the programme are new Diploma qualifications, being introduced between September 2008 and 2013, in 14 different occupational areas that offer a blend of academic and vocational learning. This report examines: giving all young people access to Diplomas; reducing complexity and communicating simply; and having the capability to deliver the reforms. The Department for Children, Schools and Families (the Department) has involved

universities and employers in designing the Diplomas and developing their content. As new qualifications, there is still much work to be done to convince parents, employers and universities that Diplomas are a credible alternative to existing qualifications. To help make the qualifications more understandable, the Department and its partners need to demonstrate clearly how Diplomas will help young people progress into further learning and employment. By 2013, the Department is aiming for all young people in England to have access to all 14 Diplomas at three different skill levels. The Department has spent £590 million on the programme. It has not yet established cost estimates built up from the local level for delivering Diplomas, and has only just begun surveying local authorities to assess their capital requirements.

Teaching Travel and Tourism 14+ has been written in response to a perceived need in initial teacher training to address the pedagogy of vocational programmes in the field as a vocational subject. It, therefore, focuses on theoretical approaches to teaching, learning and assessment and how they can inform the way in which we plan and deliver programmes of Travel and Tourism studies. It examines how we teach programmes related to preparation for working in the industry, programmes such as the National Diplomas, specific professional qualifications and, of course, the new 14-19 Diplomas. It is intended

to inform and stimulate to further study all likely to be involved in the development and delivery of such programmes. This could include, those engaged in initial teacher training whether experienced practitioners or post-graduate students; subject mentors now required to support new teachers; experienced teachers unfamiliar with the subject who may be required to teach on these programmes and also administrators needing to familiarise themselves with the nature, content and delivery of the subject as an innovation to the curriculum. Therefore, although initially it examines the nature of the industry and raises discussion of issues pertinent to the delivery of related vocational programmes, it is essentially a useful resource book, with a wealth of information about the exciting curriculum opportunities that the subject presents. Through interactive exercises, case studies and exemplar resources it provides the reader with a foundation of usable activities to develop a variety of teaching and learning strategies which will enhance their delivery of the Travel and Tourism curriculum.

As unemployment becomes an issue on every graduate's and career changer's mind, apprenticeships are becoming the most legitimate and popular routes into work. But how do you choose the apprenticeship that's right for you? And for parents, how do you support and guide your child into the best possible career path? Apprenticeships uses friendly and jargon-free language to answer all of

For both school leavers and adult learners, this is the only resource you'll need to make an informed decision. With information on funding, your rights, developing skills as well as information on key national and regional learning providers, Apprenticeships will give you the confidence and knowledge to pursue your chosen career and compete with other candidates.

O contexto da educação profissionalizante vem sendo objeto de muita atenção e mudança nos últimos tempos. Embora este seja um momento fecundo para profissionais e alunos do setor, as mudanças e os avanços recentes podem confundir e inquietar. O avanço da tecnologia e a complexidade dos processos produtivos demandam níveis de formação mais elevados em todas as áreas, inclusive naquelas que um dia já foram chamadas de “chão de fábrica”. Escrito por especialistas em educação vocacional – área que no Reino Unido corresponde ao nosso ensino técnico e profissionalizante –, este é um guia muito útil para novos professores e mesmo para os mais experientes. Trata-se de um material didático e acessível, capaz de apoiar a reflexão sobre o nosso sistema de ensino e contribuir com ideias práticas, dicas, atividades e planos para

The third in a series of Cedefop publications dealing with technical aspects of the European Qualification Framework and European Credit Transfer System, this book analyses current practice in countries that have made progress with evaluating and defining competence. It proposes a typology of knowledge, skills and competence, to be used not as an instrument of 'harmonisation' between countries, but as a template to enable comparison. The aim is to promote mobility in every sense, bringing work-based learning and knowledge acquired in higher education closer together.

The book covers a list of key topics that are central or even 'troublesome' in lifelong learning with each entry offering a critically informed and up-to-date introduction to the topic.

We learn most of our communication skills without consciously working at them. Teaching Communication sets out what those skills are and how to develop them. This Command paper, entitled "Promoting achievement, valuing success: a strategy for 14-19 qualifications" (Cm. 7354, ISBN 9780101735421), presents the Government's conclusions on establishing a plan to improve and develop the educational opportunities for 14-19 year olds and is part of a consultation process on the strategy for 14-19 qualifications. It also sets out in detail the systemic changes that will be needed to develop existing qualifications, specifically in England. The 2005 White Paper 14-19 Education and Skills (Cm. 6476, ISBN 9780101647625) set out a wide ranging reform programme of the curriculum and qualifications system with the aim of improving the general education and training of teenagers. This strategy document further develops the proposals and examines the ways that reform can be established. Divided into seven chapters, it covers the following areas: the introduction and context of the proposed education reforms; the movement towards a more comprehensive and coherent

qualification system; the development of a new diploma programme; the reform of GCSEs and A levels; the apprenticeship programme; the foundation learning tier; the steps needed to achieve the aims set out in the previous chapters. The closing date for this consultation is 23 June 2008.

There are two key questions at the heart of the ongoing debate about education and training for all young people, irrespective of background, ability or attainment: What counts as an educated 19 year old today? Are the models of education we have inherited from the past sufficient to meet the needs of all young people, as well as the social and economic needs of the wider community? Education for All addresses these questions in the light of evidence collected over five years by the Nuffield Review of 14-19 Education and Training: the most rigorous investigation of every aspect of this key educational phase for decades. Written by the co-directors of the Nuffield Review, Education for All provides a critical, comprehensive and thoroughly readable overview of 14-19 education and training and makes suggestions for the kind of education and training that should be provided over the coming decade and beyond. The authors acknowledge that much has been achieved by the respective governments – massive investment in resources; closer collaboration between schools, colleges, training providers, voluntary agencies and employers; recognition and promotion of a wider range of

qualifications. They are also optimistic about the good things that are going on in many secondary classrooms – enormous amounts of creativity; courageous efforts to meet problems; a deep concern and caring for many young people otherwise deprived of hope and opportunity. But they argue for a radical reshaping of the future in the light of a broader vision of education – a greater respect for more practical and active learning; a system of assessment which supports rather than impoverishes learning; respect for the professional expertise of the teacher; a more unified system of qualifications ensuring progression into higher education and employment; the creation of strongly collaborative and local learning systems; and a more reflective and participative approach to policy. Education for All should be read by everyone working in – or with an interest in – secondary-level education in England and Wales and beyond.

Youth unemployment and joblessness are major issues for national governments and international organizations across the globe. In this respect, the school-to-work transition challenge is increasingly raising the interest of companies, education and training institutions, families and young people themselves, who are often involved in precarious and illegal forms of employment, in many countries of the world. In the field of industrial and labour relations, the school-to-work perspective seems particularly suitable for policy formulation and assessment: the broad and complex range of tools, strategies and policies for enabling youth training and their access to the labour market is deserving of a closer analysis at an international level in a time when jobless recovery threatens national economies. The ADAPT LABOUR STUDIES BOOK-SERIES has in connection been set up with a view to achieving a better understanding of the causes, consequences and possible responses to the issue in a global dimension through an interdisciplinary and comparative approach.

The apprenticeship programme can play a key role in resolving some of this county's most pressing issues. It can help us to create a more skilled workforce, to increase employment and to generate sustainable economic growth. For these reasons, the Government has, quite rightly, made apprenticeships a priority and has devoted significant resources to help them thrive. But money does not

guarantee success. This wide-ranging, evidence-based report carefully lays out the areas where the current model could better serve apprentices, their employers, or, in many cases, both. The Committee recommends that the Government takes a more active approach in the future and constantly reviews the profit levels of training providers as an indicator of potential risks to efficiency. The Committee heard evidence of excessive profits at the public's expense, of a Government paying out too much money far too easily and of a lack of genuine value for money being provided by apprenticeship schemes. This is unacceptable

Education is expanding to include a stronger focus on the practical application of classroom lessons in an effort to prepare the next generation of scholars for a changing world economy centered on collaborative and problem-solving skills for the digital age. The Handbook of Research on Technology Tools for Real-World Skill Development presents comprehensive research and discussions on the importance of practical education focused on digital literacy and the problem-solving skills necessary in everyday life. Featuring timely, research-based chapters exploring the broad scope of digital and computer-based learning strategies including, but not limited to, enhanced classroom experiences, assessment programs, and problem-solving training, this publication is an essential reference source for academicians, researchers, professionals, and policymakers interested in the practical application of technology-based learning for next-generation education.

This comprehensive guide to continuing professional development (CPD) in the lifelong learning sector (LLS) provides teachers with practical support and guidance alongside development activities. It encourages teachers to reflect on their practice and subsequently shape and develop their teaching in response to the needs of their learners, their institution and local and national priorities. The book emphasises the importance of teachers as professional individuals who are responsible for their own CPD. It also helps senior managers to create a positive environment and 'learning organisation' in which teaching and learning can flourish. The book sets the context for CPD and: Offers an understanding of the CPD process and the need for undertaking reflective practice Meets the needs of new teachers, trainers and tutors in the sector Considers CPD for teaching and learning and subject-specific CPD Provides

an introduction to action research and case studies of research into teaching and learning in the sector Accessible to anyone who is working, or training to work, in the LLS, this book will provide practical suggestions, ideas and activities to stimulate activities and research. In the current economic climate, it is more important than ever that young people engage with the world of work and gain the knowledge, skills and experience they will need to prepare them for their future careers. This book provides an overarching framework for understanding all the separate parts of the work-related learning curriculum and constructs a research-based pedagogy with practical steps for students, teachers and practitioners. Work-Related Teaching and Learning deepens our understanding of work-related learning and provides an overview of the programmes and recent initiatives designed to make learning more relevant and better connected to work. Drawing on contemporary research and innovative practice, it offers guidance to support teachers and practitioners in the delivery of the work-related learning curriculum. Covering all aspects of work-related learning from enterprise education and economic well-being to careers education, work experience and the diplomas, features include:

- An overarching conceptualisation of work-related learning
- An exploration of the benefits of work-related learning
- An examination of the key issues and challenges faced
- A detailed look at how teaching and learning activities have been used in various contexts and with what effects
- An assessment of the strengths and weaknesses of different curriculum models
- Case studies and examples of good practice
- Discussion questions for reflective practice

This book is essential reading for current teachers and practitioners involved in work-related learning, as well as students and trainee teachers who wish to improve or develop their practice in the light of recent initiatives.
