The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week. The main purpose of this book is to provide civil engineering students with a clear presentation of the theory of engineering graphics and the use of AutoCAD 2012. Each chapter starts with the chapter objectives followed by the introduction. The contents of each chapter are organized into well-defined sections that contain step-by-step instructions to carry out the AutoCAD commands. The drawings shown in this book are created using AutoCAD 2012 and Paint software. Several improvements have been made to this edition. An index has been added and one of the chapters has been partitioned into two chapters, hence the twenty two chapters. Chapter chapter 19, 'Suggested In-Class Activities', has been improved and provides in-class activities (or labs). For some of the initial ICAs, it explains the drawing with the help of step-by-step instruction. Also, new problems have been added to the homework's chapter. Furthermore, the contents and the drawings of every chapter are improved. Each chapter starts with the chapter objectives followed by the introduction. The bulleted objectives provide a general overview of the material covered. The contents of each chapter are organized into well-defined sections that contain detailed step-by-step instructions with graphical illustrations to carry out the AutoCAD commands. This book has been categorized and ordered into nine parts: Introduction to AutoCAD 2012 Use of AutoCAD in land survey data plotting The use of AutoCAD in hydrology Transportation engineering and AutoCAD AutoCAD and architecture technology Introduction to working drawing Suggested drawing problems Bibliography Index

This book provides a detailed study of geometrical drawing through simple and well-explained worked-out examples. It is designed for first-year engineering students of all branches. The book is divided into seven modules. A topic is introduced in each chapter of a module with brief explanations and necessary pictorial views. Then it is discussed in detail through a number of worked-out examples, which are explained using step-by-step procedure and illustrating drawings. Module A covers the fundamentals of manual drafting, lettering, freehand sketching and dimensioning of views. Module B describes two-dimensional drawings like geometrical constructions, conics, miscellaneous curves and scales. Three-dimensional drawings, such as projections of points, lines, plane lamina, geometrical solids and sections of them are well explained in Module C. Module D deals with intersection of surfaces and their developments. Drawing of pictorial views is illustrated in Module E, which includes isometric projection, oblique projection and perspective projections. Module F covers the fundamentals of machine drawing. Finally, in Module G the book introduces computer-aided drafting (CAD) to make the readers familiar with the state-of-the-art techniques of drafting. Key Features : Follows the International Standard Organization (ISO) code of practice for drawing. Includes a large number of dimensioned illustrations, worked-out examples, and university questions and answers to explain the geometrical drawing process. Contains chapter-end exercises to help students develop their drawing skills.

After the publication of the third edition of this book, new AISC Specification was released in 2010 that contains combined provisions for ASD and ARFD methods and formulas in non-dimensional format to be used both for the FPS and the SI units. This fourth edition is prepared after revising the original book in the light of the new Specification of AISC 2016. The book contains tables required for the 345 Grade Steel and BS sections. The author is highly thankful to all the engineers and students who have participated in the improvement of this book through their questions and queries. As before, the detailed design procedure of the steel structures is explained in a separate book titled "Steel Structures" which frequently refers to this book for the properties tables and the design aids.
