An important aspect of *Prepare and Defend* is showing readers how to spot a likely mass murder before it happens, and how, if caught up in one, to survive it with the right tactics. Because of the increase in the number of mass murders during the past few decades, police departments everywhere have become equipped and trained on how to respond to them. Readers need to know this information as well so that they can be rescued quickly and safely if ever in the face of this kind of situation. As the automotive world looks towards a future of electric vehicles, driverless technology and anonymous styling, what can be learned from the individuals who resist these trends and cling to their love of street rods and muscle cars? The hot rodding world still exists, but will it continue to hold a place in tomorrow's automotive culture? Gearhead and geographer David Miller has crisscrossed America in his custom built 1958 Chevy Apache pickup, interviewing hot rodders about what drives their passions, values and way of life. Their collected stories present a detailed portrait of modern hot rodding—a distinctly American subculture that survives by bucking the trends and attitudes that increasingly shape the transportation landscape.

A pioneer of Chicano rock, Rubén Funkahuatl Guevara performed with Frank Zappa, Johnny Otis, Bo Diddley, Tina Turner, and Celia Cruz, though he is best known as the front man of the 1970s experimental rock band Ruben And The Jets. Here he recounts how his youthful experiences in the barrio La Veinte of Santa Monica in the 1940s

prepared him for early success in music and how his triumphs and seductive brushes with stardom were met with tragedy and crushing disappointments. Brutally honest and open, *Confessions of a Radical Chicano Doo-Wop Singer* is an often hilarious and self-critical look inside the struggle of becoming an artist and a man. Recognizing racial identity as composite, contested, and complex, Guevara—an American artist of Mexican descent—embraces a Chicano identity of his own design, calling himself a Chicano “culture sculptor” who has worked to transform the aspirations, alienations, and indignities of the Mexican American people into an aesthetic experience that could point the way to liberation.

When Chevy released its third-generation C/K pickup trucks, the stout and sturdy performers captured the attention of Chevy and GMC truck enthusiasts. As a result, millions were sold during their 18-year production run. The new cab design featured rounded windshield corners, rounded cab roof, and sloped and rounded doors, so they were called the "rounded-line" trucks by General Motors. Enthusiasts, however, didn't agree. Because of the overall squarer appearance of the trucks, they were soon called the "squarebody" by enthusiasts and journalists alike. Although the older Chevy/GMC pickups are more exclusive, the third-generation pickups are plentiful, are increasing in collector value, and, fortunately, have parts that are readily available. As an on- and off-road utility vehicle, Chevy/GMC trucks have been towing, hauling, and operating in a variety of conditions. After all of these years of hard use and exposure to harsh

conditions, many of these extensively used trucks are in desperate need of restoration. Whether you own a regular, super, or crew cab with a short or long box, this restoration guide provides the pertinent information and instruction to restore your truck to original condition. Seasoned truck magazine writer Kevin Whipps explains real-world techniques for restoring classic Chevy and GMC pickups at home. You are shown how to comprehensively inspect, properly assess, and accurately budget your restoration project. You are also guided through each major portion of truck restoration, including engine, suspension, chassis, bodywork, paint, brakes, steering, transmission, driveline, electrical system, interior, and more. Special coverage is dedicated to the replacement of body panels and the repair of box, cab, and other body parts. When pro-caliber bodywork has been performed, you have an excellent foundation for the paint, and in turn, you're shown to prep, shoot, and buff the paint job. The rounded-line Chevy/GMC trucks are extremely popular as stock restorations, fast street trucks, and off-road-duty trucks. But before you can build a specialty truck, you need to have a solid, reliable, restored truck. This book provides the invaluable information and step-by-step instruction to return these trucks to their original glory. An authoritative and comprehensive restoration guide for the 1973-1987 Chevy/GMC trucks has not been available until now.

At Garden City Beach, S.C., where no one seemed to hurry, the first indication of trouble was the staccato rumble of footsteps on the stairs. A sharp knock at the door came next. And when 86-year-old Betty Mincey opened up she faced law officers wearing guns. Three men, two from the South Carolina Department of Natural Resources and a federal agent from the National Oceanic and Atmospheric Administration, had come to investigate the report of a dead dolphin taken in a net set by her husband in front of the Mincey house that morning, Nov. 3, 2013. After questioning 86-year-old World War II Navy veteran C.P. Mincey, the officers told him he had violated the Marine Mammal Protection Act which cites the illegal taking of a dolphin as a federal offense. The accompanying S.C. DNR officer told him he had also broken state laws in setting and observing the net. Mincey's explanation that he had made no attempt to take the dolphin found dead earlier that morning in his lightweight mesh net did not appear to matter to the officers. They charged the South Carolina farmer with killing a dolphin and his fine was eventually set at \$6500. The events at Garden City marked the opening stage of a 15-month-long battle between the Mincey family and the National Oceanic and Atmospheric Administration. Join South Carolina author William Walker for an in-depth, entertaining behind-the-scenes account of how Mincey, with the support of Latta S.C., attorneys LaFon LeGette and Alan Berry, won his case in a contentious federal hearing at Georgetown, S.C.

global warming if nations do not make drastic changes within the next 12 years. CNN's Nick Watt joins me now live. Nick, one of the most shocking parts of this report is just how soon these experts are predicting that we could see major changes—in effect, saying time's running out to address this. NICK WATT, CNN CORRESPONDENT Absolutely. Listen, Jim, you know, climate change warnings often seem far-off and hard to imagine, but not today. This morning, the UN's climate change panel released what its authors claim is the most important climate change report ever published, and they're telling us that we need, quote, “rapid, far-reaching and unprecedented changes in all aspects of society.” Deadly wildfires from California to Greece, that record-setting rain just dumped by Hurricane Florence on the Carolinas, droughts crippling Cape Town, South Africa and heat waves turning Europe brown. And now, we have only 12 years to stop all this [from] getting much worse. Average temperatures have risen about 1 degree Celsius since 1880. In Paris, leaders pledged to keep the rise well below 2 degrees. This report now suggests we aim for 1.5—a benchmark we're predicted to reach by 2030. JIM SKEA, COCHAIR OF WORKING GROUP III, INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE The message is that countries will need to cooperate. NICK WATT, CNN CORRESPONDENT Yeah. President Trump is trying to revive the polluting coal industry here in the U.S. He's also pledged to withdraw from the historic Paris climate change agreement and recently rolled back Obama-era targets for cutting vehicle emissions. sector responded to these uncertainties. In the face of these challenges, companies in the energy industry hedged their bets by staking out paradoxical or contrasting positions. On the one hand, they focused on capturing as much gain as they could from the world's current dependence on fossil fuels and on the other hand they made preparations for a future in which fossil fuels might not be the world's dominant energy source.
