This is the first comprehensive resource for clinical medical-surgical nursing instructors responsible for guiding students through their entire clinical rotation. Filling a huge gap in resources for instructors required to teach the medical-surgical nursing course, it contains everything the new or adjunct instructor needs to teach expertly and confidently. The guide features a week-by-week instructional plan for the clinical rotation and includes all materials necessary to effectively perform administrative leadership and supervision, assess students' knowledge and learning styles, maximize the learning process, simplify evaluation, and help ensure a smooth transition to clinical practice. The guide will serve as a welcome companion to both experienced and novice medical-nursing instructors with its week-by-week instruction guide that encompasses organizational teaching templates, teaching and learning resources, and evaluation materials. These include everything from the Adjunct Faculty Contract to the Course Syllabus to a Comprehensive Skills Checklist. Key clinical instruction materials, including PowerPoints and simulation scenarios are provided for each body system. Additionally the book contains quizzes with answers, discussion questions, and interactive student activities and exercises. Key Features: Comprises the first complete resource for successfully guiding students through their clinical rotations from start to finish Helps to allay the "fear factor" for new and adjunct clinical nursing instructors Provides a week-by-week instructional guide that includes organizational teaching templates, teaching and learning resources, and evaluation aids Includes numerous forms and templates to facilitate administrative responsibilities, student assessment, and student evaluation Key clinical information is organized by body system and includes multiple interactive teaching tools

A collection of twenty-two unique and provocative real-life medical-surgical nursing case studies with rationales, this resource emphasizes holistic nursing care as it helps sharpen critical thinking skills and strengthens clinical competence.

These online case studies provide an introduction to a real-world, patient situation - with critical-thinking questions to help students learn to manage complex patient conditions and make sound clinical judgements. These questions cover nursing care for clients with a wide range of physiological and psychosocial alterations, as well as related management, pharmacology, and nursing concepts. Complete RN Online Case Studies The Complete RN Online Case Studies collection provides a comprehensive student remediation solution that encompasses review of content and test item practice from the major nursing specialty content areas, including Fundamentals, Medical/Surgical Nursing, Maternity/Pediatrics, Management, and Psychiatric/Mental Health Nursing.

The need for nurses is greater than ever before. There are no short-term solutions to this problem: as currently practicing nurses age and retire, so does the population as a whole, further increasing the need for health care services. Today, more than ever

before, we need you, the nursing student, to succeed in your studies. Today, more than ever before, we need you, the nursing student, to enter the nursing profession. Today, more than ever before, we need you, the nursing student, to see nursing as a career, not just a job. This book is dedicated to your success as a student and as a practicing nurse. We believe a strong foundation in understanding the common diseases and disorders that affect adult clients is necessary to provide effective nursing care. We believe that understanding the basis for nursing care activities is vital to providing individualized care for clients. We believe that client teaching is a vital nursing role at all levels and in all settings. *Medical-Surgical Nursing Care* provides a strong foundation for caring through its emphasis on pathophysiology, nursing care, and client teaching. Understanding comes not through memorization, but through practice and integration of new material into your thinking. *Medical-Surgical Nursing Care* promotes understanding in several ways. The writing style is clear, with a focus on readability. Its content is streamlined but thorough, focusing on what you need to know and to be able to do. *Medical-Surgical Nursing Care* is organized to promote learning. Part One, *Medical-Surgical Nursing Practice*, focuses on concepts, issues, and nursing care applicable to caring for adults in many different situations and settings. Parts Two through Seven focus on diseases and disorders affecting adults. These disorders are organized by functional health patterns (for example, nutritional-metabolic, activity-exercise) and by affected body systems under each functional health pattern (for example, common skin problems, bowel disorders, cardiac disorders). Each chapter begins with a *Caring Tip* that provides words of wisdom from the lived experience of a practicing nursing or nurse educator. You will be able to use these tips as you move into and through your career in nursing. *Learning Outcomes* help focus and define your learning as you read and study the material. The structure and function of the affected body system is reviewed at the beginning of the chapter. Disorders affecting that body system are presented in a consistent format: the disorder is defined; its pathophysiology, signs and symptoms, and complications are explained; and *Collaborative Care* (including diagnostic tests, pharmacology, surgery, and other treatments) for the disorder is outlined. *Nursing Care* related to the disorder is presented in a nursing process format. When a disorder is major, very complex, or very common, all of the *Nursing Process* steps are provided. When it is not, the text provides an abbreviated, more focused discussion, similar to the focused assessment nurses perform. Because teaching is a vital nursing role, discussion of each disorder concludes with *Discharge Considerations* and teaching for the client and family. *Case Studies* following many major disorders bring the disorders to life. Clients rarely arrive in a health care setting as a pure medical diagnosis. As humans, clients bring all their roles and responsibilities as individuals, spouses, parents, children, workers, students, friends, and volunteers. They arrive as unique individuals influenced by their ethnicity, culture, and background. They arrive with psychosocial issues such as fear, guilt, or difficulty meeting financial responsibilities. They often arrive with other diseases and disorders complicating the current problem. The case studies in this text emphasize the holistic aspects of nursing care. *Critical Thinking Questions* conclude each case study. These questions allow you to practice your new found learning and to expand your thinking beyond the immediate focus of the disease or disorder presented. Additional *Critical Thinking Self-Check Questions* are provided on the CD-ROM throughout nursing care chapters. They provide more case scenarios for you to use to test your knowledge and thinking skills. These self-check questions focus on the nursing roles of collecting assessment data and implementing nursing care. Each case is matched with hints to guide your critical thinking. They will help you learn to individualize your nursing care. Each chapter concludes with features to reinforce and enhance your learning. *Key Terms* by Topic list the boldfaced key terms in the text by the topic under which they were defined. *Key Points* provide a summary of chapter content with reminders that you can use throughout your nursing career. *For Further Study* is a handy listing of cross-references within the chapter and the topics to which they apply. An interactive *Critical Thinking Care Map* provides a brief case study, assessment data, and a nursing diagnosis for a specific client. We then ask you, the student, to sort the data and sample interventions, evaluate the results, and chart your findings. Finally, *NCLEX-PN Review Questions* and a *Test-Taking Tip* help you review the chapter material and practice your test-taking skills. Features Throughout each chapter, you will find consistent features to facilitate and reinforce your learning. To avoid interrupting your reading by reaching for your medical dictionary, *Key Terms* are presented in boldface type. They are defined in the text and the glossary at the end of the book. Other important or unfamiliar terms are italicized and defined in the text. *Clinical Alerts* within the text emphasize information critical to providing effective, safe clinical nursing care. *Cultural Care Strategies*, including nursing implications and self-reflection questions, prepare students to deliver culturally sensitive adult nursing care. Color-coded boxes organize highlighted information for quick retrieval: red *Data Collection* boxes for manifestations and risk factors of a disorder; blue *Nursing Care* boxes for nursing care related to specific tests or procedures; orange boxes highlighting *Client Teaching*; and green boxes focusing on specific *Population Groups* and *Nutrition* information. *Nursing Care Checklists* quickly summarize nursing care activities for particular procedures or surgeries. *Procedure Checklists* review key steps in performing previously learned nursing care procedures and provide *Sample Documentation*. *Pharmacology Tables* highlight nursing implications and client teaching for drugs used to treat particular disorders. Prepare for success in the classroom! Corresponding to the chapters in the 9th edition of Lewis' market-leading *Medical-Surgical Nursing*, this study guide offers a complete review of content and a wide range of activities to help you understand key nursing concepts. Alternate item format questions reflect the most current NCLEX test plan. To make studying easier, answers for all exercises are included in the back of the book. A wide variety of clinically relevant exercises and activities includes NCLEX examination-style multiple-choice questions, prioritization and delegation questions, case studies, fill-in-the-blank questions, anatomy and physiology review, critical thinking activities, and more. Answers to all questions are included in the back of the book, giving you immediate feedback as you study. Additional alternate item format questions incorporating prioritization and delegation are included to better prepare you for the most current NCLEX exam. Attractive two-color design ties the study guide to the textbook.

Lewis's Medical-Surgical Nursing ANZ 5th edition continues as the most comprehensive, go-to reference for developing the core aspects of professional nursing care in Australia and New Zealand. With a clear framework of person-centred care, critical thinking, clinical reasoning and evidence-based practice underpinning the assessment and management of adults with complex, acute and chronic healthcare issues, the 5th edition provides nursing students with the foundations for developing expert clinical practice. Thoroughly revised, the new edition responds to key health priorities, providing an innovative approach to addressing Indigenous health in Australia and New Zealand. Greater emphasis is also given to the issues of: self-care; examination of the nurse's role within an interprofessional team; and management of the deteriorating patient, to reflect the changing nature of nursing practice in the contemporary healthcare environment. Additional resources on Evolve eBook on VitalSource Student and Instructor Resources Review Questions Conceptual Care Map creator Student Case studies Fluids and Electrolytes tutorial Nursing Care Plans Instructor Resources Test Bank PowerPoint slides Image bank Now available in either hard cover or 2-volume set paperback formats New chapters: Chapter 3: Stress and coping. This chapter explores theoretical models of stress, the impact of stress on human functioning, and strategies for coping with stress in the context of nursing practice and healthcare delivery Chapter 5: Working with Indigenous peoples of Australia and New Zealand. Co-authored by highly respected Indigenous and non-Indigenous academics from Australia and New Zealand, the chapter role-models Indigenous and non-Indigenous health professionals working alongside each other to improve health outcomes, and the practical role that nurses can play to improve the healthcare experiences of Indigenous people. Chapter 69: Recognising and responding to the deteriorating patient. Authored by one of Australia's leaders in emergency response education, this chapter is designed to develop capability in relation to the National Safety and Quality Health Service Standards 2017, specifically Standard 8: Recognising and responding to acute deterioration. Chapter 70: Cardiopulmonary resuscitation: basic and advanced life support. Based on the Australian and New Zealand Committee on Resuscitation (ANZCOR) guidelines, this chapter promotes a problem-solving approach to the management of a patient in cardiac arrest by providing the science behind the techniques and interventions used to treat a patient in cardiac arrest.

Medicine management is an important and demanding aspect of nursing practice. It requires both clinical knowledge and the use of professional judgement. This accessible book is designed to help both practising and student nurses prepare to deal with the challenges of medicine management. It covers the principles and skills involved in a range of common medicine management scenarios and will help nursing students integrate their knowledge of physiology, pathophysiology, pharmacology and nursing care. This handy book: Is based on 21 practical case studies, which help you learn about effective medicine management and test your understanding of essential drug groups. Helps you gain confidence in your knowledge of pharmacology Highlights the nurse's role in identifying the therapeutic and adverse effects of medicines on a patient Part of the Case Book series, Medicine Management for Nurses Case Book offers a unique way of relating theory to practice. The cases are ideal for preparing for exams, tests and working in practice, as each one includes self-test questions and answers. Whether you are preparing to qualify or studying medicine management after qualification, this case book is the ideal practical tool for you. Contributors: Diane Blundell, Abe Ginourie, Joy Parkes, Ruth Sadik, Pat Talbot, Janine Upton, Traci Whitfield, Christine Whitney-Cooper, Debbie Wyatt. "The book offers a unique and engaging approach to an important subject that most students find daunting. Realistic case scenarios are used as a catalyst to introduce information and concepts that underpin practice. The presentation style supports the active participation of the student with the inclusion of questions at the beginning of each topic offering a platform to explore key areas whilst referring to the scenario. I highly recommend it to pre-registered student nurses." Kris Paget, Senior Lecturer, Faculty of Health, Social Work and Education, Kingston University, UK "This collection of case studies provides a unique and user friendly guide to commonly seen pharmacological therapies and treatment options across the lifespan. The case studies have been carefully selected to provide the diverse care needs of complex disease processes in a person centred way. Each case study is relevant to the role of the Nurse and will provide essential and core information whether nurses are working in either a medical or surgical clinical setting. Government Health Care Directives provide the essential clinical evidence based theory necessary to promote medicine adherence and each chapter provides the relevant pathophysiology which is essential to underpin the safe administration of medication therapies. The role of the nurse in medicine management with respect to patient education and the professional responsibilities of monitoring and evaluating complex medication therapies is presented in each case study. This provides an holistic approach to the care of patients receiving complex medication therapies." Barry Ricketts, Senior Lecturer, Adult Nursing, Oxford Brookes University, UK

Accompanying CD-ROMs contains open book quizzes that consist of crossword puzzles and multiple choice, fill-in-the-blank, and matching questions; Fluid and Electrolyte Module; case studies with accompanying discussions, exercises, and nursing care plan; Health Assessment Animations; and discussions to the thinking critically questions.

Completely updated for easier use and more control, VCE Pacific View is a groundbreaking workbook/CD-ROM package that brings learning to life in a "virtual" hospital setting. This guided learning experience features textbook reading assignments that correspond with the CD-ROM and workbook activities. The workbook acts as a map, guiding students through the CD-ROM as they care for patients in the virtual hospital to help students make connections between what they experience through the CD-ROM and what they've learned in their textbook. Each virtual hospital visit allows the student to access realistic information resources essential to patient care resulting in a true-to-life, hands-on learning experience. Users will also discover that this edition of VCE is easier to use with the inclusion of flash-based technology and the elimination of previously needed third-party plug-ins. Meaningful, real-world problems place users in nursing scenarios where they can set priorities for care, collect data, analyze and interpret data, and reach conclusions about complex problems within a health-illness transition. The highly-engaging format encourages active learning and provides opportunities to identify information to collect and process data for evidence-based patient care; work with data entry and retrieval screens; optimize use of available information resources; understand hospital information systems; manage information for decision-making; and maintain and improve core computing skills. Lessons in the workbook complement the content in the textbook and guide the student through the virtual hospital. Includes NCLEX examination-style questions that offer built-in testing of clinical knowledge. The CD-ROM offers users the opportunity to visit each patient and access realistic information essential for patient care, including: charts, medical administration records, electronic patient records, video clips of nurse-client interactions, and other related materials. A clock icon appears under each lesson, estimating how much time it will take to complete. A linkage icon alerts the user whenever they are about to begin an exercise that connects with previous lessons. The elimination of third-party plug-ins facilitates fast and easy software installation Flash-based technology allows for more ease of use and seamless navigation. Greater faculty support with the addition of the FAC PAC, an expanded instructors' website, and a radically expanded testing component. A medication administration feature enables users to select, prepare, and administer medications.
