This book highlights the unique aspects of oncologic ophthalmology as a medical and surgical discipline practiced at a comprehensive cancer center. Multi-disciplinary management of ocular, orbital and adnexal cancers are highlighted using simple and tried-and-true algorithms. In addition, ocular problems caused as a direct result of cancer treatment are reviewed using illustrative photographs and case presentations. The content is provided by full-time ophthalmology faculty and fellows at M. D. Anderson Cancer Center. Experts in complementary disciplines such as ophthalmic pathology, dermatopathology, radiation oncology, radiology, and other surgical subspecialties have brought their unique perspective to each chapter. The book is

Using easy-to-follow language, detailed illustrations, summary checklists, and new learning resources Physical Examination and Health Assessment, 3rd Canadian Edition is the gold-standard in physical examination textbooks. This new edition reflects the latest in what is happening in nursing today with coverage of emerging trends, examples of how to document patient assessments using the Electronic Health Record, and new evidence-informed content throughout. It's easy to see why this text is #1 with Canadian nursing students! A two-column format distinguishes normal findings from abnormal findings, and uses colour, step-by-step photos to clarify examination

techniques and expected findings. Sectional colour bars segment body systems according to content (Structure and Function, Subjective Data, Objective Data, Documentation and Critical Thinking, Abnormal Findings). Summary checklists offer reviews of key examination steps. Documentation and Critical Thinking sections provide real world clinical examples of specific patients and how to document assessment findings. Abnormal findings tables help you recognize, sort, and describe abnormalities. Separate chapter on Pregnancy provides a thorough foundation for assessing the pregnant patient. Developmental Considerations sections highlight content specific to infants, children, adolescents, pregnant women, and older adults. Promoting Health boxes focus on this key aspect of Canadian health care. NEW! Content covering the Electronic Health Record, charting, and narrative recording provides examples of how to document assessment findings. UPDATED Case Studies provide you with opportunities to test and develop your analytical skills and apply what you've learned. NEW! Approximately 150 normal and abnormal examination photos for the nose, mouth, throat, thorax, and pediatric assessment gives you a fresh perspective on these key system examinations, with cultural diversity and developmental variations. NEW! Social determinants of health considerations cover the shifting landscape of Canada's

populations with strategies for integrating social, economic and ethnocultural diversity into your health assessments. NEW! Assessment strategies relevant to Indigenous populations, harm reduction, nutrition, and transgender persons inform practitioners on respectful, complete care.

The Preparation and Trial of Medical Malpractice Cases treats a case as a continuous process, from interviewing the client to closing argument. It offers comprehensive coverage of the questions surrounding health maintenance organizations, including case law on the right to sue an HMO as well as its participating physicians. You'll find discussion of: how to recognize a meritorious case; the doctrine of alternative liability; the evidentiary value of FDA approval or non-approval; the continuing treatment doctrine; state statutes regarding motion practice; malpractice liability of alternative medical practitioners; the admissibility of evidence comparing physicians' risk statistics to those of other physicians; use of expert testimony to establish *res ipsa loquitur* in negligence; the modified standard of proximate cause when a physician's negligence exacerbates a patient's existing condition; violation of the duty to disclose information; contributory negligence in informed consent; distinguishing between medical malpractice and ordinary negligence; liability of nurses; and more. Appendices demonstrate how to analyze a medical brief, depose

and examine the defendant physician, and elicit testimony from your own expert witness. Also included are a sample Bill of Particulars, a sample jury charge and a list of Web sites to assist your medical research.
