Get four of my stand-alone books with a female main character together in one ebook package. This set, titled Dark is Deepest, includes Tattooed Teardrops, which won the Top Fiction Prize in the 2016 In the Margins Top Ten Books for Teens literary award. Buying them all together and save. Included are: Stand Alone – Is Justine crazy? Everyone thinks so, but Justine can't give up her sense of who she

Online Library Close To Shore

is—someone far different than the loving daughter Em expects her to be—to just fit in and be happy. She is sure that Em secretly holds the key to who Justine really is. But if she does, Em isn't talking. *Tattooed Teardrops* – “I don't plan on getting in any trouble.” Tamara had thought that when she got out of juvie, things would be easier. But before long, it seems like her life is spiraling into chaos. If she can't prove to her probation officer that she is innocent of the allegations against her, she's going back to prison, and Tamara just can't let that happen. *Cynthia has a Secret* – One day, fifteen-year-old Carmina Knight's life was perfect, and the next, she'd lost everything. Her family, her home, almost everything that she knew. Alone on the streets, she can't trust anyone, but she also can't make it alone. *Questing for a Dream* – Nadie is a bright but rebellious teen growing up Manitoba Cree. Living in abject poverty, she tries to help care for the younger children in the band. Devastated by the drowning death of her little cousin and unable to overcome her grief, Nadie leaves the band. How can she find her own place in a foreign world where she is abused and discriminated against, and for the first time in her life, completely alone?

The Bahía Blanca Estuary is one of the largest coastal systems in Atlantic South America. This mesotidal estuary, situated in a sharp transition between humid subtropical and semiarid climates, has a unique combination of large interannual climatic variations. The estuarine area encompasses roughly 2300 square kilometers and is composed of wide expanses of intertidal flats, salt marshes, and emerged islands, which create intricate landscape patterns. Natural environments in the estuary sustain a high concentration of marine and terrestrial species, including endemic, threatened, and endangered fish and shorebirds. Puerto Cuatrerros, in the inner zone of the estuary, hosts a

permanent marine research station, whose records span more than 30 years of biophysical variables, and represent one of the largest time series of ecological data in South America. Beyond its ecological relevance, the Bahía Blanca Estuary is under increasing anthropogenic pressure from large urban settlements, industrial developments and harbors, raising the question of how to balance conservation and development. The Bahía Blanca Estuary: Ecology and Biodiversity offers a comprehensive review of life in the ecosystems of the estuary. The book is divided into five major sections, the first of which provides a description of the regional setting and covers key aspects of estuarine dynamics. The three following sections are dedicated to different habitat types and, within each section, the chapters are organized around major functional groups from pelagic and benthic environments. The fifth and final section covers issues related to management and conservation. Overall, the book provides essential and up-to-date reference material on the biodiversity and ecosystem processes of the Bahía Blanca Estuary, and will appeal to a broad international audience.

This report summarizes the findings of a fisheries safety at sea baseline survey carried out in Saint Lucia. The baseline survey investigated the safety practices, attitudes and legislative understanding among a selected group of 100 fishers in Saint Lucia. The survey methodology was developed and managed by the FISH Safety Foundation and FAO. The survey was implemented in 2020 by the Department of Fisheries of Saint Lucia, FSF and FAO and the findings were disseminated and used for fishers' safety training in 2021.

Human settlement has often centered around coastal areas and waterways. Until recently, however, archaeologists

Online Library Close To Shore

believed that marine economies did not develop until the end of the Pleistocene, when the archaeological record begins to have evidence of marine life as part of the human diet. This has long been interpreted as a postglacial adaptation, due to the rise in sea level and subsequent decrease in terrestrial resources. Coastal resources, particularly mollusks, were viewed as fallback resources, which people resorted to only when terrestrial resources were scarce, included only as part of a more complex diet. Recent research has significantly altered this understanding, known as the Broad Spectrum Revolution (BSR) model. The contributions to this volume revise the BSR model, with evidence that coastal resources were an important part of human economies and subsistence much earlier than previously thought, and even the main focus of diets for some Pleistocene and early Holocene hunter-gatherer societies. With evidence from North and South America, Europe, Africa, Asia, and Australia, this volume comprehensively lends a new understanding to coastal settlement from the Middle Paleolithic to the Middle Holocene.

The wide sandy beaches, quiet maritime forests, and vast *Spartina* marshes of the natural Georgia coast create a most spectacular, albeit gentle, Southern beauty. Casual visitors and longtime residents alike have been charmed by this special place. Living with the Georgia Shore provides an essential reference and guide for residents, visitors, developers, planners, and all who are concerned with the conditions and future of Georgia's coastal zone. Recounting the human and natural history of the islands, the authors look in particular at the phenomenon of coastal erosion and the implications of various responses to this process. In Georgia, as elsewhere in the United States, the future of the shore is in doubt as recreational and residential development demands increase. This book provides guidelines for living with the

for professionals, administrations and organizations in the process of the implementation of this Ballast Water Management Convention.

Whether you're a long-time resident or a visitor, a certified diver or a beginning snorkeler, this guide to twenty-six of Oahu's best snorkeling and diving sites will enrich and enhance your underwater adventures. Detailed driving directions to each location are included as well as helpful maps showing onshore facilities and many offshore features you'll want to explore. You'll learn where it's safest to enter and exit the water, what to look for (coral, shells, fishes, underwater caverns), and what hazards to avoid. The author provides essential information on safety and seasonal wind and surf conditions and useful tips on diving and snorkeling equipment, night diving, and spear fishing. Each site, chosen for its ease of access and the interest of its underwater topography, is rated according to degree of difficulty. The Oahu Snorkelers and Shore Divers Guide will introduce you to some of the best diving and snorkeling on the island. Details the first documented cases in American history of sharks attacking swimmers, which occurred along the Atlantic coast of New Jersey in 1916.

For fans of *The Hazel Wood*, this middle grade novel takes the dark stuff of fairytales and crafts it into a powerful story of friendship and light. "Once I picked the book up, I didn't set it down until I finished it with tears in my eyes. . ." —The New York Times Book Review Every evening Lampie, the lighthouse keeper's daughter, must light a lantern to warn ships away from the rocks, but one stormy night disaster strikes. The lantern is not lit, a ship is wrecked, and someone must pay. To work off her debt, Lampie is banished to the Admiral's lonely house, where a monster is rumored to live. The terrors inside the house aren't quite what she thought they would be--they are even stranger. After Lampie saves
