Commerce textbook for junior secondary school students. Designed to meet requirements of the seven NSW Department of Education syllabus areas, this book contains activities, writing exercises and information sources.

Excerpt from Introduction to the Study of Commerce Mr. Clow's book is significant of a large and beneficial change in the development of secondary education in the United States. The programme of the secondary schools is being steadily broadened and strengthened; and this not only by the better teaching of old subjects, but by the introduction of new. The modern languages, the natural sciences, political and social sciences, have been added, and as time has progressed, have been taught with greater detail and with better methods. Among the subjects recently added to the programmes in frequent use is economics, and Mr. Clow's book constitutes an addition to the tools available for the teacher in this branch of knowledge. I have expressed myself elsewhere as to expediency of the addition of economics to the curriculum of the high school. Properly taught, it can be brought within the compass of pupils of high school age; it can be made truly liberalizing and enlightening for them, and it can aid in making them better workers and better citizens. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

A study of the school textbook grounded in historical and comparative perspectives. The approach is broadly chronological, revealing changes in the theory and practice of textbook production and use. The book focuses largely on three associated subjects - geography, history and social studies.

The book is a cutting-edge contribution to the debate which has occurred for some time on the pros and cons of secondary education becoming more closely and explicitly related to preparing young people for the world of work. The book provides concrete examples of the vocationalisation of secondary education, with particular reference to the situation in Africa. The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) The book appears in the Springer book series on 'Technical and Vocational Education and Training: Issues, Concerns and Prospects' and compliments the 'International Handbook of Technical and Vocational Education and Training' and other publications in the 'International Library of TVET' all of which are publications of the 'UNESCO-UNEVOC International Centre for TVET' in Bonn, Germany
