Rose gives students insight into modern issues such as interstate banking, risk management, global banking, technological advancements, and government deregulation\_ issues bankers must confront every day. The text demonstrates the critical role banks play in determining standard of living, availability of jobs, and overall function of business. It contains a balance of theoretical and analytical material, which provides students with the tools they need to understand modern banking. For those already employed in banking, the book will improve management skills and keep them up to date on the most current trends in banking. It is used in undergraduate and MBA level courses in commercial banking, as well as in financial institutions courses, when the emphasis is on commercial banking. This textbook integrates financial economics and management in the area of agricultural finance. The presentation of financial economics discusses how the credit needs of farmer/borrowers are met by depositors through commercial banks. The financial management content presents methods used to make farm financial decisions including farm accounting, capital budgeting, and the analysis of risk. The textbook begins by developing the farm financial market focusing primarily on the market for debt. Next, the

textbook presents an overview of accounting concepts important for the credit market. The accounting section provides a detailed discussion of the Farm Financial Standards Council's suggestions for agricultural financial statements. Following the financial accounting, the book presents the use of ratio analysis applied to the farm firm. Next, the text describes capital budgeting followed by an introduction to risk analysis. Finally, the book presents the effect of debt decisions on the farm firm. In addition to the primary topics, the textbook includes a discussion of agricultural banking and monetary policy and an analysis of the choice of historical cost and market valued accounting methodologies on the farm debt decision.
