"To Inform and Define: An Analysis of Information Provided in Dictionaries Used by Learners of English in China and Denmark" presents a masterly synthesis of lexicographical theory in relation to bilingual and learner's dictionaries and advances a radical argument about how such dictionaries are used and how they should be improved for the convenience of students. By tracing the history of the terms 'semantic' and 'pragmatic' in linguistics and philosophy, Saihong Li shows the weakness of any conceptual distinction between them. She goes on to demonstrate how inappropriate these terms are for thinking about the ways in which words are defined and explained in dictionaries. The theoretical argument is supported by detailed and comparative empirical research: learners of English as a second language in both China and Denmark were interviewed about their experiences as users of standard learner's dictionaries. The results are presented in tabular form and their interpretation is statistically informed. This is a path-breaking study. Saihong Li makes an important contribution to lexicographical theory, and advances a sophisticated methodology for the comparative study of English-language learning on an international scale and in the global marketplace of learner's dictionaries. Her work will be of great value for language teachers, lexicographers, and students of interpretation, translation and language pedagogies. "To Inform and Define" should also attract serious attention from editors and publishers of learner's dictionaries.

The series is crafted for learners of the 21st century, for whom it is of foremost importance to learn how to learn. 3. The use of Graphic Organisers, Timelines and Graphic retelling of stories develop critical thinking and study skills in learners—two vital tools for learning. 4. The series guides learners through the seven stages of a brain-based approach to learning. 5. The 5Ps address the above mentioned seven stages as follows - Ponder: aids the learners in pre-acquisition of concepts by setting the context, while preparing them to read the text with the aid of the glossary and in-text questions. Prepare: immerses the learners into the context and initiates holistic learning. It helps in the acquisition of newer perspectives through task-based activities. Practise: lays out the canvas for the stage of elaboration, in which the learners analyse and evaluate the text while applying their understanding of it. Perfect: aids memory encoding through drilling of vocabulary and grammar topics. It helps with incubation of concepts. Perform: functions as a confidence check for learners and ensures verification of their performative skills. This stage of summing up allows a functional integration of acquired concepts, leading to a celebration of learning. 6. Subject Integration (SI) tasks weave cross-curricular references through the chapters. 7. Task-Based Learning (TBL) activities present learners with real-life situations within the classroom. 8. Life Skills (LS) are enhanced through challenging texts and value-based concept checking questions (CCQs). 9. Wall of fame: At the beginning of the book is a gallery of famous authors and characters that the child will meet inside. 10.
