expanded its scope. It was known as Information Technology and Communications in Health (ITCH) 2007; with the same acronym but with a different meaning as demanded by its international appeal and wider choice of subject areas. The conference in 2007 was an unmatched success and for the conference of 2009, an even more eventful convention is expected, which encourages experts to demonstrate and share their experiences and knowledge. The theme for the ITCH 2009 conference is 'Revolutionizing Health Care with Informatics: From Research to Practice'.

Canadian Communication Policy and Law provides a uniquely Canadian focus and perspective on telecommunications policy, broadcasting policy, internet regulation, freedom of expression, censorship, defamation, privacy, government surveillance, intellectual property, and more. Taking a critical stance, Sara Bannerman draws attention to unequal power structures by asking the question, whom does Canadian communication policy and law serve? Key theories for analysis of law and policy issues—such as pluralist, libertarian, critical political economy, Marxist, feminist, queer, critical race, critical disability, postcolonial, and intersectional theories—are discussed in detail in this accessibly written text. From critical and theoretical analysis to legal research and citation skills, Canadian Communication Policy and Law encourages deep analytic engagement. Serving as a valuable resource for students who are undertaking research and writing on legal topics for the first time, this comprehensive text is well suited for undergraduate communication and media studies programs.

Covering advantages as well as disadvantages, explores how mobility meets sustainability in contemporary organizational communication.

A concise, practical guide to writing effectively in the world of business. Impact will help

"Writing is an aspect often overlooked in the quest to provide students with the necessary skills to embark on a career in the increasingly important field of communication. For many students, putting one's thoughts and understanding of a topic onto paper can be a daunting task.

Composing Research, Communicating Results: Writing the Communication Research Paper provides communication students with the knowledge and necessary tools to compose a variety of course-required papers that are scholarly, accessible, and well-written. Chapter coverage includes common myths associated with writing a research paper, brainstorming and researching topics, making and supporting arguments, style and formatting issues, writing the literature review, application and personal reaction papers, empirical research papers, presenting and publishing your work, and more. Each stage of the process is broken down into easy-to-follow steps supported by writing exercises and numerous examples drawn from published and student-written papers in the field. Composing Research, Communicating Results: Writing the Communication Research Paper fulfils an important and underserved niche in the classroom curricula, and is an essential resource for all students in

The Handbook of Global Media and Communication Policy offers insights into the boundaries of this field of study, assesses why it is important, who is affected, and with what political, economic, social and cultural consequences. Provides the most up to date and comprehensive collection of essays from top scholars in the field Includes contributions from western and eastern Europe, North and Central America, Africa and Asia Offers new conceptual frameworks and new methodologies for mapping the contours of emergent global media and communication policy Draws on theory and empirical research to offer multiple perspectives on the local, national, regional and global forums in which policy debate occurs

Informed by decades' worth of agency experience, Bernard Gauthier prepares aspiring public relations professionals to think strategically about communication and to plan and implement effective campaigns. Strategic Communication in Canada is grounded upon a simple yet comprehensive framework called the CARE model, which teaches readers how to strategically select goals and objectives that bring about change, identify and engage key audiences, determine their strongest resources as well as those needing improvement, and scan the external environment for opportunities and threats. Brimming with

reinforce key principles and help students hone their skills, this invaluable text will teach students to communicate with confidence.

This exceptional book for nurses and nursing students guides the development of the comprehensive, professional communication skills to prevent errors that result in patient injuries and death. With a patient-safety focus, thorough coverage of communication and extensive, interactive ancillaries, it demonstrates how communication is tied to desired clinical outcomes.

Two of the most important social skills in humans are the ability to determine the moods of those around us, and to use this to guide our behavior. To accomplish this, we make use of numerous cues. Among the most important are vocal cues from both speech and non-speech sounds. Music is also a reliable method for communicating emotion. It is often present in social situations and can serve to unify a group's mood for ceremonial purposes (funerals, weddings) or general social interactions. Scientists and philosophers have speculated on the origins of music and language, and the possible common bases of emotional expression through music, speech and other vocalizations. They have found increasing evidence of commonalities among them. However, the domains in which researchers investigate these topics do not always overlap or share a common language, so communication between disciplines has been limited. The aim of this Research Topic is to bring together research across multiple disciplines related to the production and perception of emotional cues in music, speech, and non-verbal vocalizations. This includes natural sounds produced by human and non-human primates as well as synthesized sounds. Research methodology includes survey, behavioral, and neuroimaging techniques investigating adults as well as developmental populations, including
