The nineteenth century witnessed a series of revolutions in the production and circulation of images. From lithographs and engraved reproductions of paintings to daguerreotypes, stereoscopic views, and mass-produced sculptures, works of visual art became available in a wider range of media than ever before. But the circulation and reproduction of artworks also raised new questions about the legal rights of painters, sculptors, engravers, photographers, architects, collectors, publishers, and subjects of representation (such as sitters in paintings or photographs). Copyright and patent laws tussled with informal cultural norms and business strategies as individuals and groups attempted to exert some degree of control over these visual creations. With contributions by art historians, legal scholars, historians of publishing, and specialists of painting, photography, sculpture, and graphic

arts, this rich collection of essays explores the relationship between intellectual property laws and the cultural, economic, and technological factors that transformed the pictorial landscape during the nineteenth century. This book will be valuable reading for historians of art and visual culture; legal scholars who work on the history of copyright and patent law; and literary scholars and historians who work in the field of book history. It will also resonate with anyone interested in current debates about the circulation and control of images in our digital age.

New Testament Greek Intermediate is the companion volume to New Testament Greek Primer. The Intermediate text reviews grammar, expands vocabulary, and exposes the student to more New Testament context. Grammar review intends to consolidate gains from the Primer, but deepens the discussion, adds more illustrative paradigms, and includes more syntax. Vocabulary acquisition expands the Primer's frequency base of 50 or more times down to a frequency of 15 or more times, including second aorist forms. This vocabulary acquisition is divided by frequency into seven

vocabulary lists ready for seven vocabulary exams. The exercises have longer passages both to increase the student's translation stamina and to bring more contextualization to bear on the act of translation. In addition, the text includes informative illustrations and graphics, beautiful layout, full indexes, a glossary, charts, paradigms, and principal parts for even more usability. By the end of this text, the student is thoroughly prepared for Greek exegesis and advanced courses on Greek syntax. Best selling author of the How to write what you want to say series, Patricia Hipwell, has completed her magnum opus which will benefit all teachers from Year 4 – Year 12. This book has been written to provide teachers with ways of 'hooking' students into learning at the start of each and every lesson. It contains almost 300 ways of doing this. The book is designed to be used by teachers in all curriculum areas from Year 4 upwards. It contains a plethora of ideas that can be adapted to any curriculum area. In the book, the term relevant or subject-specific content is used a great deal. This is because skills are always best developed in the context of use with content that is relevant to current areas of study. There is little point, for example, in asking students to do an activity that develops their sentence-writing

Online Library Comparative And Superlative Adjectives 2nd Grade

skills using information on Ancient Greece when they are currently studying the Black Death. The symbiotic relationship between content and skills means that teachers often have to develop their own resources, because this enables them to focus on the skills using relevant and current content.

Variously referred to as anticipatory sets, warm-ups, lesson starters or 'hooks', the activities in this book are excellent ways to 'switch students on' to their learning. In this book the activities will be referred to as lesson starters. Their purposes include: ? moving key facts and figures from short-term to long-term memory ? activating prior knowledge about a topic (where prior knowledge exists) ? awakening interest in the topic of the lesson ? checking for understanding ? improving a variety of skills ? developing learning strategies ? improving vocabulary ? developing collaborative learning strategies. Most of these activities are designed to take between five and ten minutes at the start of the lesson. Students may take longer until they become familiar with them, especially if the activities are different from current learning activities. Many of the activities will work best if students work in pairs or small groups. Some activities can generate noise and therefore be unsettling, so teachers will need to be mindful of this when choosing a particular activity. They may prefer to do the activity at the end rather than the start of a lesson. In this case, the purpose

Online Library Comparative And Superlative Adjectives 2nd Grade

of the activity is to consolidate the learning of the lesson. The focus of many of the activities is to increase the amount of reading and writing we require students to do. Also, students need to develop their vocabulary in all areas of the curriculum and many of the activities have been developed with this in mind.

A study guide to accompany the 6th edition of the standard introductory Latin text, Wheelock's Latin. This guide expands and explains important grammatical concepts that the Wheelock text presents too briefly for many contemporary students.

- Fuller grammatical explanations To aid comprehension
- Useful, short exercises (with answer key) To clear up confusion fast
- Additional etymological information To help students memorize
- Companion website For pronunciation help and downloadable drill sheets, vocabulary lists, and more!

The Guide's style is casual, to calm and reassure the struggling or intimidated student. Points are repeated so that chapters can be used independently of one another, on an as-needed basis. Grote's Guide was designed for use with the Wheelock text, but has been successfully used with other Latin texts. The Guide is an excellent resource for -- Homeschoolers: students and instructors! -- Autodidacts -- Reviewing beginning Latin -- Reviewing before an exam

introductory text to Classical Greek. It is designed for the first full year course and it concentrates on the basics in a way that allows the material to be covered easily in courses that meet three times a week over the course of two semesters. The focus of the text is on grammar with slightly altered readings drawn chiefly from the works of Xenophon and Herodotus.

The New Cambridge English Course is a course teachers and students can rely on to cover the complete range and depth of language and skills needed from beginner to upper-intermediate level. Each level is designed to provide at least 72 hours of class work using the Student's Book, with additional self-study material provided in the Practice Book. The course has a proven multi-syllabus approach which integrates work on all the vital aspects of language study: grammar, vocabulary, pronunciation, skills, notions and functions.

The handbook is not tied to a particular methodology but keeps in principle to a pronounced methodological pluralism, encompassing all aspects of actual methodology. Moreover it combines diachronic with synchronic-systematic aspects, longitudinal sections with cross-sections (periods such as Old Norse, transition from Old Norse to Early Modern Nordic, Early Modern Nordic 1550-1800 and so on). The description of Nordic language history is built upon a comprehensive

collection of linguistic data; it consists of more than 200 articles written by a multitude of authors from Scandinavian and German and English speaking countries. The organization of the book combines a central part on the detailed chronological developments and some chapters of a more general character: chapters on theory and methodology in the beginning and on overlapping spatio-temporal topics in the end.

A.E. Luschnig's "An Introduction to Ancient Greek: A Literary Approach" prepares students to read Greek in less than a year by presenting basic traditional grammar without frills and by introducing real Greek written by ancient Greeks, from the first day of study. It is supported by a Web site for teachers and learners.
