The authors outline a curriculum framework that focuses on student-based inquiry and the use of formative assessment to monitor and guide student learning. They provide workable, innovative alternatives to the packaged instructional programs and summative tests that have come to be associated with the English language arts (ELA) standards. Vignettes of diverse schools and districts highlight a range of successful approaches to making the CCSS work.

THIS BOOK takes up issues of current concern in composition studies, sociolinguistics, and ESL - issues concerning academic literacy, critical literacy, expressive versus cognitive approaches to the teaching of writing, and the like. It does so in a practical, experiential way, drawing on events in classrooms in universities in South Africa and the United States. The contrast between the South African context and the American, as well as their surprising parallels, highlight certain questions concerning the teaching of literacy in a dramatic way, so that theory and practice are brought together. In contrast to writing programs that follow a textbook or a planned sequence of study, the authors describe a narrative pedagogy that encourages students to find a direction and choose activities suggested by their own concerns and ongoing lives.

This book offers a broad-based, contemporary perspective on Bible translation in terms of academic areas foundational to the endeavor: translation studies, communication theory, linguistics, cultural studies, biblical studies and literary and rhetorical studies. The discussion of each area is geared towards non-specialists, to introduce them to notions, trends and tools that can contribute to their understanding of translation. The Bible translator is encouraged to appreciate various approaches to translation in view of the wide variety of communicative, organizational and sociocultural situations in which translation occurs. However, literary representation of the Scriptures receives special attention since it has been neglected in earlier, influential works on Bible translation. In addition to useful introductory and concluding sections, the book consists of six chapters: Scripture Translation in the Era of Translation Studies; Translation and Communication; The Role of Culture in Communication; Advances in Linguistic Theory and their Relavance to Translation; Biblical Studies and Bible Translation; and A Lterary Approach to Biblical Text Analysis and Translation. The authors are translation consultants for the United Bible Societies. They have worked with translation projects in various media and in languages ranging from ones of a few hundred speakers to international ones, in Africa, the Americas and Asia.
