Traditional Chinese edition of My Side of The Mountain by Jean Craighead George. In Traditional Chinese. Annotation copyright Tsai Fong Books, Inc. Distributed by Tsai Fong Books, Inc.

This comprehensive handbook provides a unique resource covering all aspects of forest ecology from a global perspective. It covers both natural and managed forests, from boreal, temperate, sub-tropical and tropical regions of the world. The book is divided into seven parts, addressing the following themes: forest types forest dynamics forest flora and fauna energy and nutrients forest conservation and management forests and climate change human impacts on forest ecology. While each chapter can stand alone as a suitable resource for a lecture or seminar, the complete book provides an essential reference text for a wide range of students of ecology, environmental science, forestry, geography and natural resource management. Contributors include leading authorities from all parts of the world.

It is a commonplace to say that the meaning of text is more than the conjunction of the meaning of its constituents. But what are the rules governing its interpretation, and what are the constraints that define well-formed discourse? Answers to these questions can be given from various perspectives. In this edited volume, leading scientists in the field

investigate these questions from structural, cognitive, and computational perspectives. The last decades have seen the development of numerous formal frameworks in which the structure of discourse can be analysed, the most important of them being the Linguistic Discourse Model, Rhetorical Structure Theory and Segmented Discourse Representation Theory. This volume contains an introduction to these frameworks and the fundamental topics in research about discourse constraints. Thus it should be accessible to specialists in the field as well as advanced graduate students and researchers from neighbouring areas. The volume is of interest to discourse linguists, psycholinguists, cognitive scientists, and computational linguists.

When the Sudanese civil war reaches his village in 1985, eleven-year-old Salva becomes separated from his family and must walk with other Dinka tribe members through southern Sudan, Ethiopia, and Kenya in search of safe haven. Based on the life of Salva Dut, who, after emigrating to America in 1996, began a project to dig water wells in Sudan.

Annibale Carracci (1560-1609) fu una delle figure chiave (1560-1609) nello sviluppo dell'arte barocca italiana, e tuttavia la sua arte può sembrare problematica per diversi aspetti. Questo volume analizza la sua carriera dagli esordi a Bologna fino alle opere successive a Roma, il cui apice è raggiunto con il suo capolavoro, gli splendidi affreschi della Galleria Farnese. Il volume indaga inoltre il linguaggio religioso fortemente espressivo che sviluppò nelle pale d'altare, adeguate espressioni dei principi della Contro-Riforma, e i suoi importanti contributi all'evoluzione del paesaggio classico. Shakespeare's Verbal Art is a profoundly important study of the newly rediscovered anagrams that lie hidden below the surface of all Shakespearean texts. It explains the essential role played by these concealed figures in Classical and Renaissance poetry, demonstrating the revelatory function of anagram by reference to the close analysis of a wide range of examples. Special attention is given to Shakespeare's use of these sub-textual devices to clarify meaning and intention. The focus is first on Shakespeare's Sonnets of 1609, and secondly on Hamlet, Othello and Twelfth Night, all of which are found to be composed around the concealed anagrams that render these works self-interpreting. A new kind of language use is revealed, in terms of which pre-Enlightenment text is envisaged as existing in two distinct dimensions – the overt and the covert – both of which must be read if any particular poem or play is to be fully

understood. In effect, a wholly new set of Shakespearean texts is made available to the reader, who will find Shakespeare's Verbal Art an essential guide to the new discoveries. The book will also be indispensable in the fields of Classical and Renaissance literature, linguistics, poetics, rhetoric, and literary history, and in relation to the pre-Enlightenment text in general, and will interest both the specialist and the general reader.

The 4-volume set LNCS 13019, 13020, 13021 and 13022 constitutes the refereed proceedings of the 4th Chinese Conference on Pattern Recognition and Computer Vision, PRCV 2021, held in Beijing, China, in October-November 2021. The 201 full papers presented were carefully reviewed and selected from 513 submissions. The papers have been organized in the following topical sections: Object Detection, Tracking and Recognition; Computer Vision, Theories and Applications, Multimedia Processing and Analysis; Low-level Vision and Image Processing; Biomedical Image Processing and Analysis; Machine Learning, Neural Network and Deep Learning, and New Advances in Visual Perception and Understanding.

This book constitutes the refereed proceedings of the 13th International Conference on Computational Methods in Systems Biology, CMSB 2015, held in Nantes, France, in September 2015. The 20 full papers and 2 short papers

presented were carefully reviewed and selected from 43 full and 4 short paper submissions. The papers cover a wide range of topics in the analysis of biological systems, networks and data such as model checking, stochastic analysis, hybrid systems, circadian clock, time series data, logic programming, and constraints solving ranging from intercellular to multiscale.

The World Bank insists that the urban share of sub-Saharan Africa's population is rapidly increasing - this study shows that in many countries this is no longer true as migration strategies have adapted in response to economic and political change.
