Despite the publication of hundreds of textbooks in this field, each one intended to provide an improvement over previous textbooks, students of accounting continue to remain perplexed as a result of numerous subject areas that must be remembered and correlated when solving problems. Various interpretations of accounting terms also contribute to the difficulties of mastering the subject. In a study of accounting, REA found the following basic reasons underlying the inherent difficulties of accounting: No systematic rules of analysis were ever developed to follow in a step-by-step manner to solve typically encountered problems. This results from numerous different conditions and principles involved in a problem that leads to many possible different solution methods. To prescribe a set of rules for each of the possible variations would involve an enormous number of additional steps, making this task more burdensome than solving the problem directly due to the expectation of much trial and error. Current textbooks normally explain a given principle in a few pages written by an accounting professional who has insight into the subject matter not shared by others. These explanations are often written in an abstract manner that causes confusion as to the principle's use and application. Explanations then are often not sufficiently detailed or extensive enough to make the reader aware of the wide range of applications and different aspects of the principle being studied. The numerous possible variations of principles and their applications are usually not discussed, and it is left to the reader to discover this while doing exercises. Accordingly, the average student is expected to rediscover that which

has long been established and practiced, but not always published or adequately explained. The examples typically following the explanation of a topic are too few in number and too simple to enable the student to obtain a thorough grasp of the involved principles. The explanations do not provide sufficient basis to solve problems that may be assigned for homework or given on examinations. Poorly solved examples such as these can be presented in abbreviated form which leaves out much explanatory material between steps, and as a result requires the reader to figure out the missing information. This leaves the reader with an impression that the problems and even the subject are hard to learn - completely the opposite of what an example is supposed to do. Poor examples are often worded in a confusing or obscure way. They might not state the nature of the problem or they present a solution, which appears to have no direct relation to the problem. These problems usually offer an overly general discussion - never revealing how or what is to be solved. Many examples do not include accompanying diagrams or graphs denying the reader the exposure necessary for drawing good diagrams and graphs. Such practice only strengthens understanding by simplifying and organizing accounting processes. Students can learn the subject only by doing the exercises themselves and reviewing them in class, obtaining experience in applying the principles with their different ramifications. In doing the exercises by themselves, students find that they are required to devote considerable more time to accounting than to other subjects, because they are uncertain with regard to the selection and application of the theorems and principles involved. It is also often necessary for students to discover those "tricks" not revealed in their texts (or review books) that make it possible to solve problems easily. Students must usually resort to methods of trial and error to discover these "tricks," therefore finding out that they may sometimes spend several hours to solve a single problem. When reviewing the exercises in classrooms, instructors usually request students to take turns in writing solutions on the boards and explaining them to the class. Students often find it difficult to explain in a manner that holds the interest of the class, and enables the remaining students to follow the material written on the boards. The remaining students in the class are thus too occupied with copying the material off the boards to follow the professor's explanations. This book is intended to aid students in accounting overcome the difficulties described by supplying detailed illustrations of the solution methods that are usually not apparent to students. Solution methods are illustrated by problems that have been selected from those most often assigned for class work and given on examinations. The problems are arranged in order of complexity to enable students to learn and understand a particular topic by reviewing the problems in sequence. The problems are illustrated with detailed, step-by-step explanations, to save the students large amounts of time that is often needed to fill in the gaps that are usually found between steps of illustrations in textbooks or review/outline books. The staff of REA considers accounting a subject that is best learned by allowing students to view the methods of analysis and solution techniques. This learning approach is similar to that practiced in various scientific laboratories, particularly in the medical fields. In using this book, students may review and study the illustrated problems at their own pace; students are not limited to the time such problems receive in the classroom. When students want to look up a particular type of problem and solution, they can readily locate it in the book by referring to the index that has been extensively prepared. It is

also possible to locate a particular type of problem by glancing at just the material within the boxed portions. Each problem is numbered and surrounded by a heavy black border for speedy identification.

1. Analysis and Interpretation of Financial Statements, 2. Ratio Analysis, 3. Fund Flow Analysis, 4. Cash Flow Statement, 5. Break-Even Point or Cost-Volume-Profit Analysis, 6. Business Budgeting, 7. Budgetary Control, 8. Standard Costing and Cost Variance Analysis, 9. Responsibility Accounting, 10. Differential Cost Analysis, 11. Marginal Costing and Absorption Costing, 12. Decision Accounting and Marginal Costing System.

The Present Book Is An Attempt To Unfold The Complexities Of The Subject Matter In A Simple And Lucid Manner To Provide Conceptual Clarity. The Book Is Meant For B.Com. (H) Students Of Indian Universities And For The Students Appearing For Ca, Icwai, Ics Examinations. Each Topic Is Self-Contained And Provides Theoretical Exposition Followed By Illustrations Which Will Help The Students To Master The Numerical Application Of Corporate Accounting Procedures. The Book Seeks To Replace Memorisation With In-Depth Understanding And Application. The Distinguishing Feature Of The Book Is To Provide Multidimensional Illustrations For Each Topic To Enhance The Question Solving Power Of The Students With Ease And Confidence. Besides Students, This Unique Presentation On Corporate Accounting Is An Indispensable Reference Source For All Teachers, Accountants, Corporate Houses And General Readers.

Deals with research and scholarship in economic theory. Presents analytical, interpretive, and empirical studies in the areas of monetary theory, fiscal policy, labor economics, planning and development, micro- and macroeconomic theory, international trade and finance, and industrial organization. Also covers interdisciplinary fields such as history of economic thought and social economics.

This textbook provides students with the knowledge of basic accounting principles and practices concerned with preparing and presenting corporate accounts in a systematic manner. The unique feature of this book is the simplicity of presentation which enables students to understand the subject and solve practical problems with ease. The main strengths of the book are the plentiful illustrative examples and the end-of-chapter exercises with answers. The wide coverage and user-friendly approach makes the book to comprehensively meet the requirements of students studying Corporate Accounting as a subject at B.Com & BBA examinations of different Indian universities based on Choice Based Credit System (CBCS).

1. Final Accounts of Companies, 2. Managerial Remuneration, 3. Disposal of Profits, 4. Profit or Loss Prior to and After Incorporation, 5. Valuation of Goodwill, 6. Valuation of Shares, 7. Accounts of Public Utility Companies (Electricity Company), 8. Consolidated Balance Sheet of Holding Companies/ Parent Companies (With AS-21), 9. Liquidation of Company (Voluntary Liquidation Only), 10. Accounting for Amalgamation of Companies As Per A.S. 14 (ICAI), 11. Internal Reconstruction, 12. Accounts of Banking Companies, 13. Annual Accounts of Life Insurance Companies, 14. Accounts of General Insurance Companies, 15. Insurance Claim, 16. Issue of Rights, Bonus Shares and Buy Back of Shares.

1. Issue, Forfeiture and Reissue of Shares, 2. Issue of Rights, Bonus Shares and Buy Back of Shares, 3. Issue and Redemption of Preference Shares, 4. Issue of Debentures, 5.

Redemption of Debentures , 6 .Final Accounts of Companies, 7. Disposal of Profits, 8. Valuation of Goodwill , 9. Valuation of Shares , 10. Accounting for Amalgamation of Companies As per A.S.-14 (ICAI), 11.Internal Reconstruction , 12. Consolidated Balance Sheet of Holding Compas/Parent Companies (With A.S.-21).

Any Book On Solved Problems Would Be Welcome By The Students As They Dread The Unsolved Problems The Most. Problems And Solutions In Advanced Accountancy-Vol. I And Ii Is The Result Of Realization Of The Same Fact. However, This Book Will Serve Its Purpose The Best If Before Referring To It The Students Have Attempted To Solve The Questions On Their Own. The Book Has Been Designed Specially To Serve As A Complementary Set To The Textbook Advanced Accountancy-Vol. I And Ii, Authored By The Same Team As Dr S N Maheshwari And Dr S K Maheshwari. It Contains Detailed Solutions To All The Practical Problems Given At The End Of Each Chapter In Advanced Accountancy, As Also Solutions To The Problems Set At The Recent University And Professional Examinations. Special Feature Of The Book Is That The Problems Have Been Properly Graded.

The 14th Revised Edition of the book "Corporate Accounting" includes the provision of the Companies Act, 2013, SEBI rules and regulations and Accounting Standards, wherever applicable. The whole book has been updated and corrections made wherever required. Theory and accounting treatment has been revised as per Accounting Standards – 4 (Revised) and Companies (Amendment) Act, 2019. Each aspect of a chapter has been discussed in detail in order to meet the requirements of the syllabus prescribed by different universities and professional institutes. Salient Features of the Book The following features are worth nothing in the present text: • The illustrations and assignment material has been made to conform to the requirements of Schedule III of the Companies Act, 2013. The relevant problems/ solutions has also been revised. • The revised revision of Paragraph 14 of Accounting Standards — 4 concerning Financial Statements regarding Proposed final dividend has been incorporated at relevant pages and the illustrations amended accordingly. • The relevant provisions of Ind AS — 7: Statements of Cash Flows dealing with Bank Overdraft and Proposed Dividend have also been taken care of in this book. • In the chapter of Redemption of Debentures, the treatment of interest on Debenture Redemption Funds Investments or Profit (or Loss) on the sale of DRFI have been also summerised in the chapter. • All chapters have been revised and udapted. Problem of each chapter have been suitably graded and edited to include questions of topical interest. We are confident that the book in its revised form will be more useful for B.Com (Pass and Hons.), M.Com, M.B.A., C.A., I.P.C.E, C.A.(Final), I.C.M.A. (Stage II) and Company Secretaries (Executive Programme) Examinations.

The Third Edition of this text, which is a thoroughly revised and enlarged version of Prof. V.K. Goyal's book, Corporate Accounting, Second Edition, gives a clear analysis of the fundamental concepts of corporate accounting. Accounting for various types of companies comes under the sphere of corporate accounting. This book primarily deals with the preparation and presentation of accounts strictly in accordance with the provisions of the Indian Company Law. Organized into 11 chapters, this book, at the outset, presents provisions of the Indian Companies Act, 1956, SEBI's guidelines, and different types of shares and modes for issue of shares. Then it goes on to give a detailed discussion on the conditions for redemption of preference shares with their sources and conversion of preference shares into equity shares. Besides, this text covers, in detail, topics such as different modes of issue and redemption of debentures, internal and external construction of companies, preparation of cash

flow statement and its classification as well as the distinction between cash flow statement and fund flow statement. Finally, the book elaborates on several methods of analysis of financial statements and advantages and limitations of ratio analysis. This well-organized and student-friendly book is intended as a text for undergraduate students of commerce (B.Com. Programme/B.Com. Pass) in universities across India. In addition, it would be useful for professional courses such as CA, ICWA and CS. Key Features Covers concepts and principles of corporate accounting in a comprehensive manner. Includes 300 worked-out examples to illustrate the concepts discussed. Provides 250 unsolved problems in a graded manner for the benefit of students.
