About the Book: Students from diverse backgrounds like Engineering, Pharmacy, Arts and Biological Sciences join a multidisciplinary course like MBA. Many such students have no earlier exposure to basics of Accounting and hesitate to read the preliminary books in learning the fundamentals. Present syllabus of many universities presupposes that the students, already, know the fundamentals of accounting and starts with the preparation of financial statements. Most students keep struggling with accounting, hoping to pass somehow. Many students share their views, even after passing, as their conce.

With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.

This text has a real world focus and is replete with discussions of real companies. It presents opening and closing vignettes of featured actual companies that relate to the topical coverage of each chapter, and numerous notes discussing current business issues involving real companies related to the particular subjects being discussed within the chapter.
