Such change may require the alteration of traditional cost models used by accountants to become more nuanced. The book suggests how this may be accomplished and highlights the need for management accountants to work as part of management teams throughout the organisation as business partners rather than

Cost Management: A Strategic Emphasis, by Blocher/Stout/Juras/Cokins is dedicated to answering the question: Why Cost Management? Blocher et al. provide the cost-management tools and techniques needed to support an organisation's competitiveness, improve its performance, and help the organisation accomplish its strategy. The text is written to help students understand the broader role of cost accounting in helping an organisation succeed - and not just the measurement of costs. While the text does include coverage of traditional costing topics (e.g., job-order costing, process costing, service-department cost allocations, and accounting for joint and by-products), its primary strength is the linkage of these topics, as well as more contemporary topics, to an organisation's strategy. This message is reinforced by a dynamic author team, all four of whom have close ties to current cost management practice.
