Within the field of Evaluation, performance measurement is fast becoming a prevalent framework or set of tools to use in implementation analysis, formative and summative evaluations, and even needs assessments. Many of the measurement techniques that evaluators employ overlap with those of performance management, so evaluators are able to learn and use this framework quite readily. Recent approaches have acknowledged limitations in the

implemented measurement systems and developed new practice-based strategies for effective ongoing measurement of program activities and use in guiding management. Significantly, these new strategies are being developed both in the United States and internationally and need to be brought together for collaborative learning and dissemination to practitioners and scholars. Julnes's text will serve as a vehicle for the dissemination of these new performance measurement strategies. The book will have a combination of conceptual and practical applications with an emphasis on cutting-edge practices in the US and abroad. The text boasts two unique features: first, though most of the chapters deal with performance measurement in the US., the text represents the most notable examples of performance measurement in Canada, Latin America, Europe and Eastern Europe; second, the book will be unique in the way that its structure will support the integration of theory and practice, with linked chapters that introduce the literature on key topics, present case studies with "lessons learned," and then provide clear guidance for practical "how-to/skill building."

climate change, the cost-competitiveness of renewable energy, global environmental trends, and sustainable economies. The text provides a balanced treatment of both standard environmental economics and ecological economics, based on the belief that these two approaches are complementary. Several chapters focus on the core concepts of environmental economics, including the theory of externalities, the management of public goods, the allocation of resources across time, environmental valuation, and cost-benefit analysis. Material on ecological economics includes such topics as macroeconomic scale, entropy, and "green" national accounting. Topical chapters focus on: energy; climate change; water resources; international trade; forests; fisheries; and agriculture, with an emphasis on designing effective policies to promote sustainability and a "green" economy. Harris and Roach's premise is that a pluralistic approach is essential to understand the complex nexus between the economy and the environment. This perspective, combined with its emphasis on real-world policies, is particularly appealing to both instructors and students. This is the ideal text for classes on environmental, natural resource, and ecological economics.

for CEOs provides both a consultant's view and an entrepreneurial approach to strategic planning, execution, and measurement. Walking you through the process, it begins by defining world-class status, visions, missions, business models, and value chains. Next, it discusses the two most important prerequisites of strategic planning and includes a questionnaire to help you evaluate operations, systems, and structure in your organization. The book provides a matrix of 25 parameters for assessing the status of your organization that can help to pinpoint the perceptual gaps between top executives and owners. It includes a strategy bank with 150 generic strategies in the five performance areas of business and identifies methods for monitoring strategy execution that provide early warning signals. It also introduces the Entrepreneurial Score Card, a tool for improving the impact of strategic planning and execution in your organization. Detailing the structure and preparation process for the strategic plan, the book illustrates the financial impact of strategy execution and explains the various financial monitoring parameters used in the performance cards of individual employees. It concludes by describing an entrepreneurial approach to strategic planning and with a comprehensive case study that illustrates the entire strategy formulation process and its conversion into an annual budget. This book is ideal for CEOs, CFOs, COOs, business owners, heads of business verticals, heads of corporate planning or strategy, functional heads, teachers, students, and practicing consultants in the area of strategic planning.
