This is the first handbook devoted to the understanding of the nature of environments in child development. The conceptual basis of the rebased CPI was extensively discussed during the IMF mission. The rebasing was considered to be an opportunity to change the conceptual basis of the CPI and to compile weights using the domestic concept. The Uganda National Household Survey (UNHS) data were compared with household consumption derived in the supply and use tables. Tobacco and beer for instance are significantly underreported in the UNHS. Adjustment of the weight for under- or overreporting by comparing the UNHS data to other sources is recommended.
