An examination of the depiction and function of memory in a variety of romances, including Troilus and Criseyde and Sir Gawain and the Green Knight.

What is craft? How is it different from fine art or design? In *A Theory of Craft*, Howard Risatti examines these issues by comparing handmade ceramics, glass, metalwork, weaving, and furniture to painting, sculpture, photography, and machine-made design from Bauhaus to the Memphis Group. He describes craft as uniquely blending function with a deeper expression of human values that transcend culture, time, and space. Craft must articulate a role for itself in contemporary society, says Risatti; otherwise it will be absorbed by fine art or design, and its singular approach to understanding the world will be lost.

Provides the craftsperson with the guidance needed to promote, market and sell his or her arts and crafts. The book offers a wide range of techniques, starting with a business plan, and explains the processes of obtaining media exposure, locating promotional tools, and selecting outlets.

In *The Persistence of Craft*, contributors discuss the development of not only six specific crafts--glass, ceramics, jewelry, wood, textiles, and metal--but also the trends and movements that have helped shape their developments. Includes 180 full-color illustrations.

Craft Objects, Aesthetic Contexts examines the place of contemporary craft in traditional aesthetics. Though philosophers have usually either ignored craft or denigrated it as mechanical and unimaginative, a careful examination of their comments often indicates that they nevertheless took a lively interest in several important issues facing craft artists today. Although Kant is famous for emphasizing that

aesthetic judgments must be pure and therefore concern themselves with objects that have no useful purpose, he took this position simply to clarify his argument, and in fact many of his examples involve objects we would today consider craft, such as furniture and even decorative wallpaper. Similarly, Heidegger and Adorno have been valued largely for their interest in complex and influential art objects, but their comments on art also frequently address issues central to craft, especially the significance of history, functionality, techniques, and materials. This book examines these comments in order to begin a process of appreciating how philosophical aesthetics, as practiced by these important writers, can contribute to our analysis of contemporary craft.

The most important of the international conventions dealing with maritime safety is the International Convention for the Safety of Life at Sea (SOLAS) which covers a wide range of measures designed to improve the safety of shipping. It is also one of the oldest of its kind, the first version was adopted in 1914 following the sinking of the Titanic. There have been four more versions of SOLAS and the present version was adopted in 1974 and entered into force in 1980. This edition provides access to all SOLAS requirements, a consolidated text of the Convention, its protocols of 1978 and 1988 and all amendments in effect from from 1 July 2004

The two volumes of Whitfield's Electrical craft principles have been substantially revised and updated for the mid 1990s, reflecting changes in practice and legislation (e.g. BS 7671/IEE Wiring Regulations) as well as in the City & Guilds courses they support. Volume 2 in particular has new material to accompany course changes. The volumes are presented in a new format, are highly illustrated and contain full problems and solutions. Inspection copies of the new edition are available to lecturers.

Codenames were a vital feature of World War II, serving as mental shorthand for those in the know, and obscuring the issues for those who were not. Codenames were used from the highest level, in the planning of grand strategic moves affecting the conduct of the whole war, to the lowest command divisions, in the conduct of small-scale tactical operations. This encyclopedia, first published in 1986, removes the mystery surrounding many of the important code names from the era. With around 3,000 entries drawn from all sides – the U.K., U.S.A., Germany, the U.S.S.R. and Japan – Christopher Chant's work provides a uniquely comprehensive and full overview of major operations, names and code words. Thorough and exciting, this key reference reissue is an exceptionally valuable resource for military historians, enthusiasts and general readers with an interest in World War II.
