Published in 1883, this three-volume account of English criminal law's development since 1200 remains a classic work of legal historical scholarship.

This book provides a clear and accessible account and analysis of French criminal law in English, the first to have been written. French criminal law has been highly influential in the development of criminal law in civil law countries around the world, and a knowledge of French criminal law has become increasingly important in view of the internationalisation and Europeanisation of criminal law. The book provides a historical introduction to the development of French criminal law, and a chapter on French criminal procedure to provide the context for an understanding of substantive criminal law. Subsequent chapters cover the general principles of French criminal law, analysing actus reus, mens rea, parties to crime, inchoate offences and general defences. The major offences are then considered chapter by chapter, and an Appendix provides in both French and English the key provisions of the French Criminal Code.

This market-leading textbook gives an authoritative account of international criminal law, and focuses on what the student needs to know - the crimes that are dealt with by international courts and tribunals as well as the procedures that police the investigation and prosecution of those crimes. The reader is guided through controversies with an accessible, yet sophisticated approach by the author team of four international lawyers, with experience both of teaching the subject, and as negotiators at the foundation of the International Criminal Court and the Rome conference. It is an invaluable introduction for all students of international criminal law and international relations, and now covers developments in the ICC, victims' rights, and alternatives to international criminal justice, as well as including extended coverage of terrorism. Short, well chosen excerpts allow students to familiarise themselves with primary material from a wide range of sources. An extensive package of online resources is also available.

This book provides the first comprehensive legal analysis of the twelve war crimes trials held in the American zone of occupation between 1946 and 1949, collectively known as the Nuremberg Military Tribunals (NMTs). The judgments the NMTs produced have played a critical role in the development of international criminal law, particularly in terms of how courts currently understand war crimes, crimes against humanity, and the crime of aggression. The trials are also of tremendous historical importance, because they provide a far more comprehensive picture of Nazi atrocities than their more famous predecessor, the International Military Tribunal at Nuremberg (IMT). The IMT focused exclusively on the 'major war criminals'-the Goerings, the Hesses, the Speers. The NMTs, by contrast, prosecuted doctors, lawyers,

judges, industrialists, bankers-the private citizens and lower-level functionaries whose willingness to take part in the destruction of millions of innocents manifested what Hannah Arendt famously called 'the banality of evil'. The book is divided into five sections. The first section traces the evolution of the twelve NMT trials. The second section discusses the law, procedure, and rules of evidence applied by the tribunals, with a focus on the important differences between Law No. 10 and the Nuremberg Charter. The third section, the heart of the book, provides a systematic analysis of the tribunals' jurisprudence. It covers Law No. 10's core crimes-crimes against peace, war crimes, and crimes against humanity-as well as the crimes of conspiracy and membership in a criminal organization. The fourth section then examines the modes of participation and defenses that the tribunals recognized. The final section deals with sentencing, the aftermath of the trials, and their historical legacy.

To understand the international legal order in the field of criminal law, we need to ask three elementary questions. What is international law? What is criminal law? And what happens to these two fields when they are joined together? Volume Two of *The Grammar of Criminal Law* sets out to answer these questions through a series of twelve dichotomies - such as law vs. justice, intention vs. negligence, and causation vs. background events - that invite the reader to better understand the jurisprudential foundations of international criminal law. The book will appeal to anyone interested in the future of international cooperation in a time of national retrenchment, and will be of interest to students, scholars, and policymakers around the world.

The Handbook features new, specially commissioned papers by a range of international and leading experts in the field. The Crimes – Identifies and analyses international crimes, including a chapter on aggression. The Practice of International Tribunals – Focuses on topics

relating to the practice and procedure of international criminal law. Key Issues in International Criminal Law – Goes on to explore issues of importance such as universal jurisdiction, amnesties and international criminal law and human rights. Foundational Texts in Modern Criminal Law presents essays in which scholars from various countries and legal systems engage critically with formative texts in criminal legal thought since Hobbes. It examines the emergence of a transnational canon of criminal law by documenting its intellectual and disciplinary history and provides a snapshot of contemporary work on criminal law within that historical and comparative context. Criminal law discourse has become, and will continue to become, more international and comparative, and in this sense global: the long-standing parochialism of criminal law scholarship and doctrine is giving way to a broad exploration of the foundations of modern criminal law. The present book advances this promising scholarly and doctrinal project by making available key texts, including several not previously available in English translation, from the common law and civil law traditions, accompanied by contributions from leading representatives of both systems.
