This volume is a new chapter in the future history of law. Its general perspective could not be more original and its critical ethical edge on the state of international law could not be timelier. It explores a compassionate philosophical approach to the genuine substance of law, criminal procedure, international criminal law and international criminal justice. It divides law into three interrelated disciplines, i.e. legality, morality and love. The norm love is derived from human reason for man's advancement and the securing of natural law. It is more than a mere mandatory norm. Its goal is to generate a normative and positive, powerful result, therefore avoiding any impurity that may exist in the application of other norms because of political or juridical pressures - a one-eyed justice. The norm love also renders justice with the principles of legal accountability, transparency and the high moral, authentic values of humanity. The notion of justice cannot be trusted in the absence of the norm love. The volume indicates the conditions of its efficiency by proving the reasons for its existence in the context of fairness, objectivity and concern for all individuals and entities. The concept of the norm love should be the core academic corpus for lecturing law in all faculties of law. It is simply the enlightenment of the 21st century. A lawyer with requisite knowledge and skill is not a lawyer if he cannot understand that the law does not need a lawyer with ethical competence in its provisions for income purposes but one with knowledge of its essence for the advanced morality of justice and the sheer essence of love for justice. A pocket dictionary with terms for basic general American law and criminal law, especially useful for non-Chinese speakers working in the American legal system or in law enforcement.

Criminal Justice Procedure gives clear guidance on the most common questions faced by today's law enforcement, offering fresh look at 21st century pre-trial protocol. Unlike other case books, this newly revised edition eschews legal theory in favor of the practical know-how needed to not to parse, but apply criminal law. Emphasis has been placed on just exactly how practitioners should conduct hot-button procedures such as airport and border searches. Moreover, the book also addresses the often dire implications of deviating from proper practice - how a false step can translate into a violation of individual rights, or the inability to successfully prosecute the guilty. This edition has been specifically designed for CJ undergraduate programs (rather than higher-level law schools)

and completely reorganized for a more logical flow of topics. Moreover, it is newly focused on the most crucial practical applications of the law in the CJ context. There is also added emphasis on the Fourth, Fifth, and Sixth Amendments. * Renewed emphasis on information needed by CJ undergraduates and practitioners, rather than law students * Includes a completely reorganized, more logical table of contents that supports the development of those reasoning and critical thinking skills needed to put the law in action * Added pedagogy and a much richer set of accompanying online resources help students apply case law to other sets of facts

"Until recently, there was relatively little interest in comparative criminal procedure, which may be explained by the fact that criminal procedure, more than any other legal discipline, resists harmonisation. However, the problems Member States face these days are largely identical: a general increase in crime, an insufficiency of financial means for the different enforcement levels, increasing complexity of legislation and the fact that the general public seems to be gradually losing confidence in the criminal justice system. There is a growing need for an understanding of foreign criminal justice systems within the European community. This book seeks to contribute to a greater knowledge by offering a general introduction to the criminal procedure systems of the Member States of the EC. It will be of great interest to students, practitioners - who tend to be increasingly confronted with cases involving foreign criminal justice systems, and lawyers."

German description: This textbook is a thorough and detailed presentation of German Criminal Procedure Law. It has a truly systematic structure, but to a great extent it is based on cases or illustrated by examples. Das Lehrbuch ist eine grundlegende und detaillierte Darstellung des deutschen Strafverfahrensrechts, die streng systematisch aufgebaut ist, aber weitgehend anhand von Fällen und Beispielen erfolgt. This book presents a short history and timeline of criminal procedure legislation in China. First, it addresses the status of Human Rights Conventions and the challenges resulting from human rights standards for Chinese criminal procedural law and practice. The discussion then moves on to explore the fundamentals of Chinese criminal procedure such as the applicable law found in the Chinese CPL (Criminal Procedure Law) and legal institutions. The book covers relevant actors in the Chinese Criminal Justice System (ie judges, prosecutors, police, defence councils) as well as the relationships between them. It also includes topics relating to the victims of crime and their role in criminal proceedings. Starting with pre-trial investigations (extending in particular to coercive measures and discretionary powers in the implementation of non-prosecution policies) the book continues as a guide through the basic principles of criminal trial, standards of evidence and rules related to conviction. Appeals and the issue of reopening criminal proceedings are also considered, with the book making particular reference to a number of special procedures (including juvenile delinquency) in the closing chapter.

After decades of nihilistic rule under Mao Zedong, can legal order be restored in China? How successful is Deng Xiaoping's initiative in developing a socialist legal system? Where is China on its road to the 'rule of law'? This book illustrates - through the analysis of more than two hundred criminal cases selected from *Minzhu yu fazhi* (Democracy and the Legal System) in the period 1979-89 - that the establishment of a formal criminal justice system and the development of an embryonic socialist theory of law in China reflect a genuine and widespread legal awakening. A rudimentary legal culture has taken hold among Party leaders, cadres, judicial personnel, intellectuals and the general public. Nevertheless, the contradiction between legal order and Party supremacy remains, as demonstrated by the June Fourth incident in Beijing and the ensuing trials of the 1989 dissidents.

In *Ineffective Legal Assistance, Redress for the Accused in Dutch Criminal Procedure and Compliance with ECHR Case Law*, Dr. Jill E.B. Coster van Voorhout, LL.M, MSc examines the extent to which ineffective legal assistance and its redress for the accused in the Netherlands abide by minimum guarantees set by the European Court on Human Rights regarding the right to an effective defence in a fair trial. Coster van Voorhout demonstrates convincingly that, currently, Dutch law and case law do not guarantee the right to effective legal assistance and are not fully compliant with related minimum guarantees. This book offers recommendations as to how redress for ineffective legal assistance

could better conform to the relevant ECHR standards.
