"Nilson's contributions to higher education are substantial, and this book is another gift to all of us who care about good teaching and helping students become autonomous, deep learners."--John Zubizarreta, Professor of English, and Director of Honors & Faculty Development, Columbia College "...a veritable gold mine of effective learning strategies that are easy for faculty to teach and for students to learn. Most students can turn poor course performance into success if they are taught even a few of the strategies presented. However, relatively few students will implement new strategies if they are not required to do so by instructors. Nilson shows how to seamlessly introduce learning strategies into classes, thereby maximizing the possibility that students will become self-regulated learners who take responsibility for their own learning."--Saundra McGuire, Assistant Vice Chancellor (Ret.) & Professor of Chemistry, Louisiana State University Most of our students neither know how learning works nor what they have to do to ensure it, to the detriment both of their studies and their development as lifelong learners. The point of departure for this book is the literature on self-regulated learning that tells us that deep, lasting, independent learning requires learners to bring into play a range of cognitive skills, affective attitudes, and even physical activities - about which most students are wholly unaware; and that self-regulation, which has little to do with measured intelligence, can be developed by just about anyone and is a fundamental prerequisite of academic success. Linda Nilson provides the theoretical background to student self-regulation, the evidence that it enhances achievement, and the strategies to help students develop it. She presents an array of tested activities and assignments through which students can progressively reflect on, monitor and improve their learning skills; describes how they can be integrated with different course components and on various schedules; and elucidates how to intentionally and seamlessly incorporate them into course design to effectively meet disciplinary and student development objectives. Recognizing that most faculty are unfamiliar with these strategies, she also recommends how to prepare for introducing them into the classroom and adding more as instructors become more confident using them.

Statistics for Criminal Justice and Criminology in Practice and Research—by Jack Fitzgerald and Jerry Fitzgerald—is an engaging and comprehensive introduction to the study of basic statistics for students pursuing careers as practitioners or researchers in both Criminal Justice and Criminology programs. This student-friendly text shows how to calculate a variety of descriptive and inferential statistics, recognize which statistics are appropriate for particular data analysis situations, and perform hypothesis tests using inferential statistics. But it is much more than a “cook book.” It encourages readers to think critically about the strengths and limitations of the statistics they are calculating, as well as how they may be misapplied and misleading. Examples of statistics and statistical analyses are drawn from the worlds of the practitioner as well as the policymaker and researcher. Students will also gain a clear understanding of major ethical issues in conducting statistical analyses and reporting results, as well as insight into the realities of the life of researchers and practitioners as they use statistics and statistical analyses in their day-to-day activities.

"...what makes the book stand out is the inclusion of real research into various criminal justice institutions that have actually been undertaken by the authors. In doing so, what is produced is a book that stimulates interest and injects research passion, as well as offering research “know how”™ into what can often be a difficult and sometimes dry area of research." Tina Patel, Liverpool John Moores University "This book provides an essential tool for undergraduate students embarking upon their own research projects in

Criminology. It provides clear and informative guidance on a range of research methods and designs to assist students in their own criminological endeavours." Jacki Tapley, University of Portsmouth How do criminologists go about studying crime and its consequences? How are programmes for offenders and communities evaluated? How can you collect and analyse criminological material? Research on crime and criminality is often referred to by the media, policy makers and practitioners, but where does this research come from and how reliable is it? Designed especially for students on criminology and criminal justice courses, and professionals working in the field, *Researching Criminology* emphasises the importance of research as an integrated process. It looks at the ways in which a mixture of investigative methods can be used to analyze a criminological question. Written by two experienced researchers and lecturers *Researching Criminology* is a comprehensive introduction to the aims, principles and methods of doing criminological research. The book covers all the key topics that you will encounter when researching crime. Individual chapters include material on: The research process Principles of researching criminology How to design criminological research Evaluation research Researching ethically A glossary of essential key concepts Structured in three parts, addressing the principles of criminological research, how to collect and analyse material and providing detailed examples of real world research, *Researching Criminology* will be of benefit to all students of criminology and criminal justice, for practitioners interested in criminological research, and for those undertaking criminological research for the first time.

Travis Hirschi is one of the most cited criminologists of the twentieth century, yet it is remarkable how little is known about his life and career. Known as spokesperson for social control theory, Hirschi has been a controversial figure. He has challenged popular theories in criminal career research as well as the need for longitudinal studies of offenders and criminal justice policies. For Hirschi, ideas are always tied to the mode of investigation and the mode of investigation is always tied to substantive concerns. Thus, substantive theoretical contribution and research methodology have been the twin driving forces throughout his career. John Laub's introduction combines a discerning account of Hirschi's life and work, accompanied by an interview with the author. He divides the volume into four parts. Part 1, "Methodological Issues," includes two essays, "Principles of Causal Analysis" and "False Criteria of Causality in Delinquency Research," coauthored with Hanan C. Selvin, "The Methodological Adequacy of Longitudinal Research on Crime," coauthored with Michael R. Gottfredson, and Hirschi's "Procedural Rules and the Study of Deviant Behavior." Part 2, "Causes and Correlates of Crime and Delinquency," encompasses Hirschi's "A Control Theory of Delinquency," "Causes and Prevention of Delinquency," and "Family Structure and Crime"; with Rodney Stark, "Hellfire and Delinquency"; with Michael J. Hindelang, "Intelligence and Delinquency: A Revisionist Review"; with Michael Gottfredson, "Age and the Explanation of Crime." Part 3, "A General Theory of Crime," consists of "The Distinction between Crime and Criminality," "The Generality of Deviance," "Causes of White Collar Crime," and "Control Theory and the Life Course Perspective," all coauthored with Michael R. Gottfredson. Part 4, "Critiques of Theories and Research in Criminology," consists of Hirschi's "Separate and Unequal is Better," along with "The True Value of Lambda Would Appear to be Zero," "Rethinking the Juvenile Justice System," and "National Crime Control Policies," all coauthored with Michael Gottfredson.

Criminology is the scientific study of crime as an individual and social phenomenon. Criminological research areas include the incidence and forms of crime as well as its causes and consequences. They also include social and governmental regulations and reactions to crime. Criminology is an interdisciplinary field in the behavioural sciences, drawing especially on the research of sociologists and psychologists, as well as on writings in law. This book presents leading research from around the world.

Known for its engaging and accessible writing style, this probing text covers the traditional areas of criminology, but also addresses questions of popular concern and policy debate, using systematic evidence to explore such topics as deterrence and incapacitation; race and social class; the rights of the accused; and domestic violence. Challenging readers to think about even the most obvious and commonsense ideas in terms of the evidence that might support or contradict it, the text delves even deeper, encouraging them to see the connection between abstract theoretical propositions and the reality they see everyday in their own lives and in the media. Using a highly perceptive, lively, and absorbing writing style to make serious ideas and evidence easily understandable to a wide range of readers, the book integrates interesting boxes throughout to bring experientially distant ideas closer and make concepts more relevant: "On Campus Boxes" highlight crime and other topical issues as they relate to campus life, and "Crime in the News Boxes" take items from newspapers to illustrate ideas and provide models for discussing current cases and issues. Reviewer Richard Wright from the University of Scranton says the text "...offers insightful typologies of crime—[presenting] a superb comparison of the interactionist; a cultural and structural explanation of homicide; a first rate discussion of felony murder; and exemplary sections on bookmaking and loansharks." Features new to this edition include an increased number of graphs and tables to help readers get a better grasp of quantitative data; chapter key terms, chapter outlines and a thorough end-of-book glossary for better understanding; and lucid discussions on Hirschi and Gottfredson's self-control theory, community policing, and date rape. For sociologist and criminologists.
