Deep into the Labyrinths in the Novels by Louise Welsh is the first book to focus on the novels of Louise Welsh, one of the most acclaimed and interesting narrative voices in contemporary Scottish Literature. It explores the use of the image of the labyrinth as one of the sites for horror in classic Gothic literature and its rewriting into a contemporary gothic labyrinth in 21st century Scotland – and, by extension, in the European context – that co-exists with various other queer and intertextual labyrinths that complement and complicate it. This book analyses how Louise Welsh's novels present different labyrinths that characters traverse and get lost in, and, by the same process, with which readers also become

engaged. In both cases, characters and readers discover that the labyrinthine understanding of reality becomes more real than any other official version of reality. Each chapter of the book explores particular examples of these labyrinths, even though they are not linear: they tend to intermingle and intertwine.

This book traces the Trinitarian thought of Raimon Panikkar in his attempt to bridge the gap between Christianity and the world religions. The viewpoints of the early and later Panikkar show continuity and shifts in his Trinitarian theology. The early Panikkar provides a Trinitarian theology and reaches the heart of the world religions, especially the Advaita Vedanta experience in Hinduism and the Nirvana experience of Buddhism. The later Panikkar, still using many of the probing concepts of his earlier thought, departs significantly from traditional Christian theology. His thoughts still continue the attempt at bridge-building between Christianity on the one

hand and the world religions, and even the secular world, on the other. Although several dimensions of Panikkar's Trinitarian theology are open to severe criticism, nevertheless, it serves as an effective tool for furthering awareness of and dialogue between the world religions. Reading as a student demands new skills and new disciplines. Students must read. They must read to inform themselves about the subjects they are studying and to allow them to write assignments, reports and dissertations. Though most students can read fairly well, few can make as much or as efficient use as possible of the time they devote to reading for academic purposes. Many guides to study offer a pot pourri of techniques for improving reading skills. None gives as full a treatment of this essential and underpinning area of academic life as *Reading at University*. The authors believe that students must change both the ways in which they read and the ways in which they think about reading. This book offers effective and efficient strategies for fulfilling students' reading and study potential.

Focusing on current issues, *Critical Reading, Critical Thinking* equips students with the critical reading, writing, thinking, and problem-solving skills essential to understanding and responding to today's complex issues and ideas. *Critical Reading, Critical Thinking* uses compelling contemporary issues to engage students in reading and thinking about a range of relevant topics and encourages them to apply the

Provides an examination and new interpretation of the relationship between state and society in Mughal India. This book explores an area that has been somewhat overlooked in the literature to date – the current status and future trends of English education in Oman. It offers a variety of theoretical and methodological approaches to the subject and explores areas of English education in Oman that have, until now, been little investigated. It explores these issues from a variety of perspectives: the professionalization of English teachers in the country; the implementation of novel teaching methodologies, curricula, and assessment approaches, into what are, in many ways, still very traditional education settings; the integration of learner identity into English language instruction; country- and culture-specific concerns with conducting research with Omani participants; the strategic demands of building stronger links between education and workforce needs; and developing learner autonomy and motivation.

How do Nike or Pepsi ads convince you that you're a rebellious individual—even while they sell you the same sneakers or sugar water bought by millions? How does a company associated with a disaster, Exxon or DuPont, for example, restore its reputation? What gender and racial stereotypes lurk in TV commercials for beer, cars, cologne, and diamond rings? And what is the deeper meaning of living in an ad, ad, ad world? For more than a decade, journalist Leslie Savan exposed the techniques advertisers use to push products and pump up corporate images. In the lively essays in this collection, Savan penetrates beneath the slick surfaces of specific ads and marketing campaigns to show how they both reflect and shape our lives. Savan's pioneering use of advertising as a lens to examine society and politics made her a three-time Pulitzer Prize finalist. "With unerring perception," the 1992 Pulitzer jury in criticism wrote, Savan "has seen advertising, PR and political chicanery as a new field of socio-aesthetic criticism. Her merciless prose impales both the electronic and print media." Though technology and tastes have changed since Savan's essays first appeared in *The Village Voice*, her analysis is timeless.
