Forbidden The Stars At the end of the 21st century, a catastrophic accident in the asteroid belt has left two surveyors dead. There is no trace of their young son, Alex Manez, or of the asteroid itself. On the outer edge of the solar system, the first manned mission to Pluto, led by the youngest female astronaut in NASA history, has led to an historic discovery: there is a marker left there by an alien race for humankind to find. We are not alone! While studying the alien marker, it begins to react. Four hours later, the missing asteroid appears in a Plutonian orbit, along with young Alex Manez, who has developed some alarming side-effects from his exposure to the kinetic element they call Kinemet. From the depths of a criminal empire based on Luna, an expatriate seizes the opportunity to wrest control of outer space, and takes swift action. The secret to faster-than-light speed is up for grabs, and the race for interstellar space begins! *Music of the Spheres* The technology for interstellar flight exists through the power of Kinemet, but the key to unlocking its code lies in a thousand-year-old scroll left on Earth by an alien species. When the ancient manual is stolen before a full translation is completed, Alex, Michael and Justine scramble to recover it. Along the way, they stumble on an interplanetary conspiracy and uncover a secret that shatters their view of life and shakes the very foundations of our existence. *Worlds Away* For a thousand years the Kulsat Armada has ravaged the galaxy searching for the lost legacy of an extinct race of technologically advanced beings. They destroy anyone who gets in their way. Now they have turned their attention to Earth and are gathering their forces for an invasion. Justine, Michael and Alex each hold a key to stopping the enemy, but they are worlds away from each other, and they are running out of time...

Is Social Security really going bust, and what does that mean to me? If I hire an immigrant, am I hurting a native-born worker? Why does the stock market go up when employment declines? Should I give that homeless guy a buck? What's a "living wage"? How much can presidents really affect economic outcomes? What does the Federal Reserve Bank really do? And even when some pundits say the economy's sound, why do I still feel so squeezed? If you'd like some straight answers, premier economist Jared Bernstein is here to help. In Crunch he responds to dozens of questions he has fielded from working Americans, questions that directly relate to the bottom-line, dollars-and-cents concerns of real people. Chances are if there's a stumper you've always wanted to ask an economist, it's solved in this book. Bernstein is fed up with "Darth Vaders with PhDs" who use their supposed expertise to intimidate average citizens and turn economics into a tool for the rich and powerful. In the pages of Crunch, Bernstein lays bare the dark secret of economics: it's not an objective scientific discipline. It's a set of decisions about the best way to organize our society to produce and distribute resources and opportunities. And we all can, and must, participate in these decisions. "America is a democracy," he writes. "And in a democracy all of us, not just the elites and their scholarly shock troops, get to weigh in

on biggies like this.” To not weigh in, Bernstein insists, is a profoundly political act, one with damaging consequences. Our economy will be only as fair as we can make it. In this lively and irreverent tour through everyday economic mysteries, Bernstein helps us decode economic “analysis,” navigate through murky ethical quandaries, and make sound economic decisions that reflect our deepest aspirations for ourselves, our families, and our country.
