Provides nearly one hundred sample resumes and cover letters, uses worksheets to help with preparation, and offers advice on layout, format, and vocabulary. InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

This Handbook is designed to help cooperative education and internship professionals and employers design, carry out, and disseminate quality research and evaluation studies of work-based education. It offers examples of current, leading-edge studies about work-based education, but with a practical twist: The chapter authors frame their studies within a specific key research design issue, including finding a starting point and a theoretical framework; fitting research into one's busy practitioner workload; deciding on particular data-gathering methods and an overall methodological approach; integrating qualitative and quantitative methodologies; and disseminating results. Also addressed are questions and concerns that are relevant throughout the course of a research project: the use of theory in research; the role and relationship of program assessment to research; and ethical considerations in research. By combining descriptions of exemplary research and evaluation studies with practical advice from top researchers in the field, this volume is a useful tool for educators and employers who are designing and carrying out their own studies, as well as a resource for what current research is discovering and affirming about the field itself. Educators from other fields, such as study abroad and service-learning will also find this book an indispensable reference in conducting research on experiential learning and teaching.

Peterson's Graduate Programs in Engineering & Applied Sciences contains a wealth of information on colleges and universities that offer graduate degrees in the fields of Aerospace/Aeronautical Engineering; Agricultural Engineering & Bioengineering; Architectural Engineering, Biomedical Engineering & Biotechnology; Chemical Engineering; Civil & Environmental Engineering; Computer Science & Information Technology; Electrical & Computer Engineering; Energy & Power engineering; Engineering Design; Engineering Physics; Geological, Mineral/Mining, and Petroleum Engineering; Industrial Engineering; Management of Engineering & Technology; Materials Sciences & Engineering; Mechanical Engineering & Mechanics; Ocean Engineering; Paper & Textile Engineering; and Telecommunications. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the specific program or department, faculty members and their research, and links to the program Web site. In addition, there are valuable articles on financial assistance and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies.
