"This informative book will appeal to academics and researchers of industrial organization, economics and corporate reform as well as those involved in Asian studies."--BOOK JACKET.

This book analyzes the transformation of Korean political economy since the 1990s. In the wake of the Asian financial crisis of 1997, the political economy of South Korea has evolved around two diametrically opposed features: convergence into the Anglo-American model and the state-led strategic restructuring of industries. To unravel the peculiar nature of the political economy in Korea, the authors first identify major factors that contributed to the dual dynamics of change and continuity in Korea: external pressures, ideological shift in political leadership, and the pivotal role of the Korean government. Next, they examine the way in which these factors interacted with each other to reshape the evolutionary path of the Korean political economy. Using several case studies, the authors take us through the stages of this transformation, from the reform of the chaebols to the industrial restructuring of the auto, IT, and aerospace industries to the rise of South Korea's Free Trade Agreements (FTA) initiative. In explaining the role that the dual dynamics of change and continuity play in modern Korean political economy, this book makes an important contribution to the existing literature and will be of interest to scholars and policy-makers concerned with development in Korea and the Asia-Pacific.?

The fourth installment of the Fisher Investments On series is a comprehensive guide to understanding and analyzing investment opportunities within the global Industrials sector. Fisher Investments on

Industrials can help you quickly become familiar with this highly diversified sector, how the sector is segmented by industries, their respective macroeconomic drivers, and the challenges facing Industrials firms. This reliable guide skillfully addresses how to determine optimal times to invest in Industrials stocks, and which industries and sub-industries have the potential to perform well in various environments. The global Industrials sector is complex, including a variety of sub-industries and countries—each with their own unique characteristics. Using the framework found here, you'll discover how to identify these differences, spot opportunities, and avoid major pitfalls. Fisher Investments on Industrials: Discusses industry fundamentals, drivers, attributes, and potential challenges Profiles each of the Industrials sector's sub-industries, broken down by industry group: Capital Goods, Transportation, and Commercial Services & Supplies Delves into a top-down investment methodology as well as individual security analysis led with in-depth insights and expert advice, Fisher Investments on Industrials provides a framework for understanding this sector and can help you make better investment decisions—now and in the future. With this book as your guide, you can quickly gain a global perspective of investing with regard to Industrials. For more information visit

This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas–diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.
