Provides a clear account of the issues in Spanish American fiction in the last quarter-century by attempting to answer questions on the Boom, Post-Boom, and its relation to Postmodernism.

Liberation theologies are the most important theological movement of our time. In the 20th century, their influence shook the Third and First Worlds, grass root organizations and the affluent Western academy, as well as the lives of priests and laypeople persecuted and murdered for living out their understanding of the Christian message. In the 21st C their insights and goals remain – unfortunately – as valid as ever.

A blackly comic heist novel set in Glasgow's famed underworld, reminiscent of early Christopher Brookmyre. Boddice, a crime lord looking over his shoulder for good reason, has assembled an unlikely band of misfit crooks. Their job is to steal a famous diamond worth millions, known as The Dark Side of the Moon. Despite the odds, the crew's self-serving squabbles and natural incompetence, the plan progresses. As events build to an explosive climax no one really knows who is playing who. Full of twists and turns and laugh-out-loud moments, this is a hugely enjoyable romp from entirely the criminal's point-of-view, with not a single cop in sight. 'Neds, drug dealers, gangsters, molls, jakes, crazy old bag ladies, racketeering, and the biggest jewel heist ever seen in the UK. Welcome to Glasgow. No Mean City meets The Italian Job in this hilarious comic noir debut, as the dark underbelly of the city's crimeland is spewed onto the page. With razor-sharp dialogue, superbly venal characters and a finely-tuned plot, The Dark Side of the Moon builds to an explosive firecracker of an ending.' Douglas Lindsay, author of *The Legend of Barney Thomson* and *Song of the Dead* 'Mix Irvine Welsh with Ocean's Eleven. Set in Glasgow and BANG! Dark Side of the Moon is a fun and thrilling read with moments that will have you reflecting on life, and moments when you will be giving it LOLs. A boom-bastic read. Loved it.' Michael Malone, author of *Beyond the Rage* and *Bad Samaritan*

The history of the United States is the history of people who migrated to America from all parts of the world. As a result American society is composed of many unique

cultures and races. Unfortunately, the uniqueness of these cultures is one of the underlying causes of tension and conflict in America, resulting in racism, religious intolerance, and class warfare. In spite of this, the multi-racial nature of American society is an integral part of Americas strength as a nation. Thousands of immigrants from unique cultures who speak totally different languages came to find a better life in America. But they were never accepted by the dominate white Christians. The immigrants had to fight for the right to be in America. Racism, race riots, and genocide are integral parts of the lives of immigrants. The racial complexion of America is changing in the twenty-first century. In a short time the non-white population will be the majority. Social, economic, and political changes are already taking place. Unfortunately, the dominate power holders and white middle classes have not adjusted to these changes. The unique system of government and economics developed over the years has reached a point that many believe will end the American Empire. There is a certain bias in this presentation and criticism is aimed at the extreme beliefs and actions of a large segment of Americans, particularly white Christians. They have been the dominant political, social, and economic forces in the country. Any assessment of the American system becomes a criticism of that segment of Americans. Their beliefs and actions represent the Dark Side of America.

In 1996, the Argentine government authorized the use of genetically modified (GM), herbicide-resistance soybean seeds. By the mid-2000s, GM soybeans were cultivated

on more than half of the arable land in Argentina and represented one-fourth of the country's exports. While this agricultural boom has benefitted agribusiness companies and fed tax revenues, it also has a dark side: it has accelerated the deforestation of native forests, prompted the eviction of indigenous and peasant families, and spurred episodes of contamination. In *Soybeans and Power*, Pablo Lapegna investigates the ways in which rural populations have coped with GM soybean expansion in Argentina. Based on over a decade of ethnographic research, Lapegna reveals that many communities initially resisted, yet ultimately adapted to the new agricultural technologies forced upon them by public officials. However, rather than painting the decline of the protests in an exclusively negative light, Lapegna argues that the farmers played an active role in their own demobilization, switching to tactics of negotiation and accommodation in order to maneuver the situation to their advantage. Lapegna offers a rare, on the ground glimpse into the life cycle of a social movement, from mobilization and protest to demobilization and resigned acceptance. Through the case study of Argentina, a major player in the use and export of GM crops, *Soybeans and Power* gives voice to the communities most adversely affected by GM technology, as well as the strategies that they have enacted in order to survive.

This book is published open access under a CC BY 4.0 license. This book presents an ethnographic study of how grassroots activism in Venezuela during the Chávez presidency can be understood in relation to the country's history as a petro-state. Taking the contested relationship between the popular sectors and the Venezuelan state as a point of departure, Iselin Åsedotter Strønen explores how notions such as class, race, state, bureaucracy, popular politics, capitalism, neoliberalism, consumption, oil wealth, and corruption gained salience in the Bolivarian process. A central argument is that the Bolivarian process was an attempt to challenge the practices, ideas, and values inherited from Venezuela's historical development as an oil-producing state. Drawing on rich ethnographic material from Caracas' shantytowns, state institutions, as well as everyday life and public culture, Strønen explores the complexities and challenges in fostering deep social and political change.

Firmly rooted in the International Political Economy (IPE) tradition, this book addresses the negative consequences of globalisation, what is termed here the 'dark side of globalisation'. It explores different definitions of globalisation, whether the globalisation we have seen since the 1970s is substantially new, and to what extent it can be governed. Building on these foundations, the work assesses the prospects for de-globalisation. By focusing on this dark side of globalisation, the authors show how the global economic

crisis, and its various local and sectorial manifestations, intensified – rather than generated – existing trends. This scholarship provides an account of the current predicament that is both more complex and more persuasive than the opposition between globalisation and de-globalisation.

The Dark Side of Technology is aimed at a mass market of intelligent people who are concerned about human progress, interested or amused by many of the unexpected consequences of technological advance, and probably unaware of the dangers which we are accruing for ourselves. Although the book spans a very wide spectrum of ideas, no previous scientific knowledge is required. Other books have focussed on different topic areas, but none have previously presented the generality of the patterns across medicine to agriculture, electronics, communications, a global economy and a burgeoning population. Technology invariably advances faster than our understanding of side effects, or our realisation that we have become vulnerable to natural events that could eliminate advanced nations, nor that mutagenic changes may not be apparent for one or two generations. This is therefore both an alarm call and a guide to survival.

This book addresses the causes of rising crime rates resulting from the rapid population growth and industrialization associated with natural resource extraction in rural communities. Ruddell describes the social problems emerging in these boomtowns, including increases in antisocial behavior, as well as property-related and violent crime, industrial mishaps and traffic collisions. Many of the victims of these crimes are already members of vulnerable or marginalized groups, including rural women, Indigenous populations, and young people. The quality of life in boomtowns also decreases due to environmental impacts, including air, water and noise pollution. Law enforcement agencies, courts, and correction facilities in boomtowns are often overwhelmed by the growing demand as these places are seldom able to manage the population growth. The key questions addressed here are: who should pay the costs of managing these booms, and how can we prepare communities to mitigate the worst effects of this growth and development and, ultimately, increase the quality of life for boomtown residents. An in-depth and timely study, this original work will be of great interest to scholars of violent crime, criminal justice, and corporate harm.

Ah, the mysteries of life Why is mankind a boom species? Why should we worry if it is? Why is the Bible's Curse of Eve real, and necessary for human progress? How does Panic and Blunder Thinking get us into deep, deep trouble? And if it's so bad, why do we still use it? These are questions of the human condition, and using evolution to answer these questions is what this book is all about.

of seemingly hopeless depression to the frightening experiences of manic psychosis. Following the sometimes humorous, but more often tragic, thirty-four years of the authors experiences with psychiatric wards, a state mental hospital, arrests, criminal incarcerations and trials, broken marriages and suicide attempts, the reader will be heartened to find there is hope. Those who struggle with this illness either personally or with a loved one will benefit from learning how the author has successfully coped and achieved in spite of his illness. Included in this book are Six Pathways to the Light a guide for surviving the darkest hours, including the embrace of a spiritual life.

Written against the academically dominant but simplistic romanticization of popular music as a positive force, this book focuses on the 'dark side' of the subject. It is a pioneering examination of the ways in which popular music has been deployed in association with violence, ranging from what appears to be an incidental relationship, to one in which music is explicitly applied as an instrument of violence. A preliminary overview of the physiological and cognitive foundations of sounding/hearing which are distinctive within the sensorium, discloses in particular their potential for organic and psychic violence. The study then elaborates working definitions of key terms (including the vexed idea of the 'popular') for the purposes of this investigation,

and provides a historical survey of examples of the nexus between music and violence, from (pre)Biblical times to the late nineteenth century. The second half of the book concentrates on the modern era, marked in this case by the emergence of technologies by which music can be electronically augmented, generated, and disseminated, beginning with the advent of sound recording from the 1870s, and proceeding to audio-internet and other contemporary audio-technologies. Johnson and Cloonan argue that these technologies have transformed the potential of music to mediate cultural confrontations from the local to the global, particularly through violence. The authors present a taxonomy of case histories in the connection between popular music and violence, through increasingly intense forms of that relationship, culminating in the topical examples of music and torture, including those in Bosnia, Darfur, and by US forces in Iraq and Guantánamo Bay. This, however, is not simply a succession of data, but an argumentative synthesis. Thus, the final section debates the implications of this nexus both for popular music studies itself, and also in cultural policy and regulation, the ethics of citizenship, and arguments about human rights.

the West has shaped the rest of Canada. The Riel Rebellions, the Winnipeg General Strike, the founding of the CCF, Social Credit and Reform parties, the struggle for provincial control of resources -- much of the impetus for political, social and economic change in Canada has come from the West. From pre-Confederation to the present, author John Conway, himself a Westerner, tells the story of the colourful and controversial figures who molded the region. His lively history of the West and its peoples offers insight into the experience of Western Canadians and documents their contribution to Canadian economic and political life. The third edition of this popular and successful history describes Stephen Harper's arrival on the political scene, as well as the rise and fall of such figures as Grant Devine, Bill Vander Zalm, Glen Clark, Roy Romanow, and Stockwell Day. It also describes how the West, the cradle of Canadian social democracy, was transformed into the bastion of the right during the last decade.

This edited collection offers an in-depth analysis of the complex and changing relationship between the arts and their markets. Highly relevant to almost any sociological exploration of the arts, this interaction has long been approached and studied. However, rapid and far-reaching economic changes have recently occurred. Through a number of new empirical case studies across multiple artistic,

historic and geographical settings, this volume illuminates the developments of various art markets, and their sociological analyses. The contributions include chapters on artistic recognition and exclusion, integration and self-representation in the art market, sociocultural changes, the role of the gallery owner, and collectives, rankings, and constraints across the cultural industries. Drawing on research from Japan, Switzerland, France, Italy, China, the US, UK, and more, this rich and global perspective challenges current debates surrounding art and markets, and will be an important reference point for scholars and students across the sociology of arts, cultural sociology and culture economy.

The controversial Dakota Access Pipeline (DAPL) made headlines around the world in 2016.

Supporters called the pipeline key to safely transporting American oil from the Bakken oil fields of the northern plains to markets nationwide, essential to both national security and prosperity. Native activists named it the “black snake,” referring to an ancient prophecy about a terrible snake that would one day devour the earth. Activists rallied near the Standing Rock Reservation in North Dakota for months in opposition to DAPL, winning an unprecedented but temporary victory before the federal government ultimately permitted the pipeline.

Oil began flowing on June 1, 2017. The water protector camps drew global support and united more than three hundred tribes in perhaps the largest Native alliance in U.S. history. While it faced violent opposition, the peaceful movement against DAPL has become one of the most crucial human rights movements of our time. *Black Snake* is the story of four leaders—LaDonna Allard, Jasilyn Charger, Lisa DeVille, and Kandi White—and their fight against the pipeline. It is the story of Native nations combating environmental injustice and longtime discrimination and rebuilding their communities. It is the story of a new generation of environmental activists, galvanized at Standing Rock, becoming the protectors of America's natural resources.

This book scrutinizes the excesses and extravagances that the 21st-century explosion of the contemporary art market brought in its wake. The buying of art as an investment, temptations to forgery and fraud, tax evasion, money laundering and pressure to produce more and more art all form part of this story, as do the upheavals in auction houses and the impact of the enhanced use of financial instruments on art transactions. Drawing on a series of tenaciously wrought interviews with artists, collectors, lawyers, bankers and convicted artist forgers, the author charts the voracious commodification of artists and art objects, and art's

The X-Files and Literature: Unweaving the Story, Unraveling the Lie to find the Truth provides an innovative and valuable exploration of the groundbreaking television program. Although much academic work has been devoted to the social, psychological, and spiritual significance of The X-Files, until this collection none has fully addressed the series' rich adaptation of literature to interrogate our perception, definition, or recounting of the truth. This collection not only unveils new twists and insights into expected connections between The X-Files and Gothic writers or with its modernist and post-modernist slants on narrative, plot, and characterization. The X-Files and Literature also delves into some unexpected literary sources shaping the series, such as the Arthurian quest, Catholic and Biblical mythology, folkloristics, and James Fennimore Cooper and the vanishing American mythos. This collection of essays covers both how The X-Files works with literature's own constantly morphing definition and portrayal of truth through form and content, as well as how the television program may or may not subvert our own contradictory expectations and distrust of literature's providing us with enlightenment. As television becomes more and more literary, with shows like *Lost* and *Gilmore Girls* sending us off to the
