How do people make money investing in stocks? The stock market is designed for the long game. However, what about those who play the short game. What I'm talking about is Day Trading. Day traders are very knowledgeable and educated in the stock market. Most traders already have the funds to afford the roller coaster ride of the funds they invest in. The real question, "How do I get educated in trades and strategies to do well through day trading?" The goal of this book is to give you the education to compete with the most skilled traders. Stocks move up and down all day every day, right? How do you capitalize on these daily fluctuations? It is time to get the leverage and strategies that will help you in the short day to day play. These fluctuations may seem like they don't matter. For example, when you have money invested in the stock market it is for the long game. Here's a Secret Other Authors Won't Tell You... Day Trading is Hard and Most Day Trading "Educators" Don't Actually Day Trade! You heard that right! They don't make their money from stocks, but from the chatroom, video, and subscription services they sell you! Before we get started, let me first go over what I don't include in this book... I have no "day trading" chatroom which charges your credit card each month for a service you'll never use. I have no monthly website subscription service for "more advanced strategies" that are needed to get started, but not included in the book. I have no Lamborghini I rented to put behind me in a video, or fake money on a table in front of me. What I do have is a book that will teach you how the day trading industry actually works, my own wisdom from being in the stock market for almost a decade, and strategies you can use to actually start day trading. Here's What You'll Learn In This Book: Part 1: The Industry - In the first part of the book, I peel back the curtain and go over the actual day trading industry with you. I show you how so called "pro" traders are able to fake charts, statistics, and trades to make it appear like they actually make money day trading, when they really don't. I then go over the tactics they use to scam traders, and even a website which exposes all the fake educators. Part 2: How to Day Trade - In this section, I go over the basics of day trading. This includes what software and broker to use, finding mentors who you can refer to for help, and what the typical day in the life of a day trader looks like. Part 3: Trading Setup - Next, I show you the optimal set up to use for day trading. This includes indicators to utilize, how to scan for stocks, and the best chart type to use. I then go over preferable stocks to trade, especially for those with smaller account sizes, and how to limit your risks so you don't end up like so many traders before you who have lost all their money day trading. Part 4: Day Trading Strategies - This is the heart of the book, and where I spend the most time. In this section, I give you 8 different strategies you can immediately start using to day trade. I include detailed explanations, charts, and examples so you know exactly how to implement the strategies I go over. Part 5: Additional Advice - In the last part of the book, I go over my final bit of advice in regards to day trading. This includes when to take profits and losses, using a practice account, and more bits of wisdom I have learned over the years. I must admit to you, day trading is not easy and there is no guarantee of actually making it. However I feel this book gives you the best chance of actually getting started, as well providing a big picture of the day trading industry. If you've been on the fence about day trading, now if your chance to finally learn what it's all about! As a FREE bonus, only for book buyers, you'll receive my special report titled Crush the Market! This guide goes over 12 beneficial tips I have learned throughout my trading career that will help keep your account profitable in the stock market. Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In How to Day Trade for a Living, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at [www.vancouver-traders.com](http://www.vancouver-traders.com). **The Truth About Day Trading Stocks** A realistic guide to day trading today's stock market In terms of the potential for heavy financial losses, day trading is a high-risk profession. No one should contemplate day trading without giving thought to the ways he can lose, and all the ways to lessen or avoid them. Yet many people enter the game with unrealistic expectations, unaware of what it takes to succeed. Seminars and software alone do not make a successful day trader, cautions author Josh DiPietro. Instead, a trader must learn hard lessons of self-discipline, consistency, and staying in the game for the long haul to have a real chance of success. In **The Truth About Day Trading Stocks**, DiPietro offers the amateur day trader a brutally honest look at the pitfalls of day trading—and how to hopefully avoid them. Written in an engaging and sometimes humorous tone, **The Truth About Day Trading Stocks** draws on the author's own experiences as a day trader to offer a clear-cut departure from typical "golden goose" strategies promising instant wealth. Instead, he attempts to slow down the dangerous fervor of the average amateur and demonstrate the ways you can become a professional and not lose your shirt in the process. **The Truth About Day Trading Stocks** shows how trading decisions are bent and shaped by emotions, and why it is critical to know yourself, understand risk, and remember that increasing your skill level is a gradual, ongoing process—there's always more to learn! After dispensing with popular illusions, DiPietro proceeds to offer realistic, practical trading advice—comparing pay-per-trade with pay-per-share brokers, determining which works best and when, offering suggestions on how to avoid the prospect of perfect trades turning ugly, and more. At the end of the book, he also includes a section called "Rules to Remember," a list of over eighty rules, simply stated and easy to grasp, to benefit amateurs' performance. Throughout the book, the author describes his development of acute self-awareness while figuring out how to succeed. Through that blunt self-portrayal, the goal of **The Truth About Day Trading Stocks** is to help you create a disciplined mind-set and apply it to your own successful trading style.

**Comprehensive coverage of the four major trading styles** **Evolution of a Trader** explores the four trading styles that people use when learning to trade or invest in the stock market. Often, beginners enter the stock market by: Buying and holding onto a stock (value investing). That works well until the trend ends or a bear market begins. Then they try Position trading. This is the same as buy-and-hold, except the technique sells positions before a significant trend change occurs. Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up and down swings. Finally, people try Day trading by completing their trades in a single day. This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style. **Trading Basics** takes an in-depth look at money management, stops, support and resistance, and offers dozens of tips every trader should know. **Fundamental Analysis and Position Trading** discusses when to sell a buy-and-hold position, uncovers which fundamentals work best, and uses them to find stocks that become 10-baggers—stocks that climb by 10 times their original value. **Swing and Day Trading** reveals methods to time the market swings, including specific trading setups, but it covers the basics as well, such as setting up a home trading office and how much money you can make day trading.
