My life had been going nowhere. Until I was diagnosed with cancer. 12 June 1995. On his twenty-eighth birthday, Raz Shaw was a directionless gambling addict doing a telesales job that was eating up every trace of what soul he had left. The next day he would be diagnosed with stage 4 sclerosing mediastinal non-Hodgkin's lymphoma of the large cell type. As he tells it, cancer saved his life. He was given the all-clear in March 1996, and stopped gambling for good that April. After a year away recuperating, he turned his back on the highly paid job that had devoured him and re-assimilated himself into the world of theatre that had once made him feel so alive. It took him a long time to realise quite how much these recoveries were bound up with one another – now he is ready to tell his story. *Death and the Elephant* is a memoir of living through and beyond illness and addiction. Blessed with the ability to find humour even in life's darkest moments, Raz charts his struggles with irreverence and unflinching perspective. This is his story, but it's also a universal one – an honest, funny, sometimes raw, and often inappropriate glimpse into the mind of a young man dealing with a life-threatening illness in the only way he knows how: by laughing in its face.

A thrilling chronicle of the tragedy-ridden history of climbing the world's most difficult and unpredictable mountain, by the bestselling authors of *The Mountain* and *No Shortcuts to the Top* “Gripping . . . reveals a good deal about the rarefied noble-gonzo world of high-altitude mountaineering.”—The New York Times Ed Viesturs, one of the world's premier high-altitude

mountaineers, explores the remarkable history of K2 and of those who have attempted to conquer it. At the same time, he probes the mountain's most memorable sagas in order to illustrate lessons about the fundamental questions mountaineering raises—questions of risk, ambition, loyalty to one's teammates, self-sacrifice, and the price of glory. Viesturs knows the mountain firsthand. He and renowned alpinist Scott Fischer climbed it in 1992 and got caught in an avalanche that sent them sliding to almost certain death before Ed managed to get into a self-arrest position with his ice ax and stop both his fall and Scott's. Focusing on seven of the mountain's most dramatic campaigns, from his own troubled ascent to the 2008 tragedy, Viesturs crafts an edge-of-your-seat narrative that climbers and armchair travelers alike will find unforgettably compelling. With photographs from Viesturs's personal collection and from historical sources, this is the definitive account of the world's ultimate mountain, and of the lessons that can be gleaned from struggling toward its elusive summit.

Written in Irv Yalom's inimitable story-telling style, *Staring at the Sun* is a profoundly encouraging approach to the universal issue of mortality. In this magisterial opus, capping a lifetime of work and personal experience, Dr. Yalom helps us recognize that the fear of death is at the heart of much of our anxiety. Such recognition is often catalyzed by an "awakening experience"—a dream, or loss (the death of a loved one, divorce, loss of a job or home), illness, trauma, or aging. Once we confront our own mortality, Dr. Yalom writes, we are inspired to rearrange our priorities, communicate more deeply with those we love, appreciate more keenly the beauty of life, and increase our willingness to take the risks necessary for personal fulfillment.

Awareness has been growing in the United States - and in nations around the world - that the Chinese Communist Party (CCP) has triggered a new era of great-power competition. Yet few discern the pattern in China's inroads within every region of the world, much less the specific form of dominance to which the party aspires. The CCP aims not merely at preeminence within the established world order - an order that is grounded in free and sovereign nation-states, flows from the universal principles on which America was founded, and advances U.S. national interests - but to fundamentally revise world order, placing the People's Republic of China (PRC) at the center and serving Beijing's authoritarian goals and hegemonic ambitions. In the face of the China challenge, the United States must secure freedom. China is a challenge because of its conduct. Modeled on 20th-century Marxist-Leninist dictatorship, the CCP eventually spurred rapid modernization and produced prodigious economic growth - thanks in no small measure to the party's decision in the late 1970s to embrace free-market elements and to the decision by the United States and nations around the world to engage, and welcome commerce with, China. The party today wields its economic power to co-opt and coerce countries around the world; make the societies and politics of foreign nations more accommodating to CCP specifications; and reshape international organizations in line with China's brand of socialism. At the same time, the CCP is developing a world-class military to rival and eventually surpass the U.S. military. These actions enable the CCP to credibly pursue the quest - proceeding outward through the Indo-Pacific region and encompassing the globe - to achieve "national rejuvenation" culminating in the transformation of the international

order. To understand China's peculiar form of authoritarianism and the hegemonic goals to which it gives rise, it is necessary to grasp the intellectual sources from which China's conduct springs: the CCP's Marxist-Leninist beliefs and the party's extreme interpretation of Chinese nationalism.

A Collection of Thoughts, Sayings and Meditations on the Way of the Samurai "It is said that what is called "the spirit of an age" is something to which one cannot return. That this spirit gradually dissipates is due to the world's coming to an end. For this reason, although one would like to change today's world back to the spirit of one hundred years or more ago, it cannot be done. Thus it is important to make the best out of every generation." — Tsunetomo Yamamoto, Hagakure: The Book of the Samurai A formerly secret text known only to the Samurai, Hagakure is a classic text on Bushido--the Way of the Warrior. More than just a handbook for battle, Hagakure is a text that filled with teachings that still apply in business, political and social situations today. This Xist Classics edition has been professionally formatted for e-readers with a linked table of contents. This eBook also contains a bonus book club leadership guide and discussion questions. We hope you'll share this book with your friends, neighbors and colleagues and can't wait to hear what you have to say about it.

hundred years, these conditions have occurred sixteen times; war broke out in twelve. Today, as an unstoppable China approaches an immovable America, and both Xi Jinping and Donald Trump promise to make their countries “great again,” the seventeenth case looks grim. A trade conflict, cyberattack, Korean crisis, or accident at sea could easily spark a major war. The world's most populous nation and soon-to-be largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control. *Death by China* reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering

that the risks of operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story--including a "Hall of Shame" of America's worst China apologists. This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history--and the world's.

'One of China's greatest living novelists' Guardian Blending fact with fiction, China Dream is an unflinching satire of totalitarianism. After decades of loyal service, Ma Daode, a corrupt and lecherous party official, has been appointed director of the China Dream Bureau, charged with promoting President Xi Jinping's China Dream of national rejuvenation. But just as he is about to present his plan for a microchip that will be implanted into the brain of every citizen to replace all painful recollections with a collective dream of national supremacy, his sanity begins to unravel. Plagued by flashbacks of the Cultural Revolution, his nightmare visions from the past threaten to destroy his dream of a glorious future. This darkly comic fable is a dystopian vision of repression and state-enforced amnesia set not in the future, but in China today.

With the strengthening focus worldwide on human rights, there has been a rapid increase in recent years in the number of countries that have completely abolished the death penalty. This is in recognition that it is a violation of the right to life and the right to be free from cruel, inhuman and degrading punishment. There has, simultaneously, been pressure on countries that still retain capital punishment to ensure that they at least apply the United Nations minimum human rights safeguards established to protect the rights of those facing the death penalty. This book shows that the majority of Asian countries have been particularly resistant to the abolitionist movement and tardy in accepting their responsibility to uphold the safeguards. The essays contained in this volume provide an in-depth analysis of changes in the scope and application of the death penalty in Asia with a focus on China, India, Japan, and Singapore. They explain the extent to which these nations still fail to accept capital punishment as a human rights issue, identify impediments to reform, and explore the prospects that Asian countries will eventually embrace the goal of worldwide abolition of capital punishment.

In the battle for the streets of Mosul in Iraq, drones in the hands of ISIS terrorists made life hell for the Iraq army and civilians. Today, defense companies are racing to develop the lasers, microwave weapons, and technology necessary for

confronting the next drone threat. Seth J. Frantzman takes the reader from the midnight exercises with Israel's elite drone warriors, to the CIA headquarters where new drone technology was once adopted in the 1990s to hunt Osama bin Laden. This rapidly expanding technology could be used to target nuclear power plants and pose a threat to civilian airports. In the Middle East, the US used a drone to kill Iranian arch-terrorist Qasem Soleimani, a key Iranian commander. Drones are transforming the battlefield from Syria to Libya and Yemen. For militaries and security agencies—the main users of expensive drones—the UAV market is expanding as well; there were more than 20,000 military drones in use by 2020. Once the province of only a few militaries, drones now being built in Turkey, China, Russia, and smaller countries like Taiwan may be joining the military drone market. It's big business, too—\$100 billion will be spent over the next decade on drones. Militaries may soon be spending more on drones than tanks, much as navies transitioned away from giant vulnerable battleships to more agile ships. The future wars will be fought with drones and won by whoever has the most sophisticated technology.

Winner of the Pulitzer Prize in 1974 and the culmination of a life's work, *The Denial of Death* is Ernest Becker's brilliant and impassioned answer to the 'why' of human existence. In bold contrast to the predominant Freudian school of

Access Free Death By China Confronting The Dragon A Global Call To Action

thought, Becker tackles the problem of the vital lie - man's refusal to acknowledge his own mortality. The book argues that human civilisation is a defence against the knowledge that we are mortal beings. Becker states that humans live in both the physical world and a symbolic world of meaning, which is where our 'immortality project' resides. We create in order to become immortal - to become part of something we believe will last forever. In this way we hope to give our lives meaning. In *The Denial of Death*, Becker sheds new light on the nature of humanity and issues a call to life and its living that still resonates decades after it was written.

In *Woman from Shanghai*, Xianhui Yang, one of China's most celebrated and controversial writers, gives us a work of fact-based fiction that reveals firsthand—and for the first time in English—what life was like in one of Mao's most notorious labor camps. Between 1957 and 1960, nearly three thousand Chinese citizens were labeled “Rightists” by the Communist Part and banished to Jianiangou in China's northwestern desert region of Gansu to undergo “reeducation” through hard labor. These exiles men and women were subjected to horrific conditions, and by 1961 the camp was closed because of the stench of death: of the roughly three thousand inmates, only about five hundred survived. In 1997, Xianhui Yang traveled to Gansu and spent the next five years interviewing

more than one hundred survivors of the camp. In *Woman from Shanghai* he presents thirteen of their stories, which have been crafted into fiction in order to evade Chinese censorship but which lose none of their fierce power. These are tales of ordinary people facing extraordinary tribulations, time and again securing their humanity against those who were intent on taking it away. Xianhui Yang gives us a remarkable synthesis of journalism and fiction—a timely, important and uncommonly moving book.

Now a BBC Radio 4 Drama Series. When Inspector Chen Cao agrees to do a translation job for a Triad-connected businessman he is given a laptop, a 'little secretary' to provide for his every need, medical care for his mother. There are, it seems, no strings attached . . . Then a murder is reported: Chen is loath to shorten his working holiday, so Sergeant Yu is forced to take charge of the investigation. The victim, a middle-aged teacher, has been found dead in her tiny room in a converted multi-family house. Only a neighbour could have committed the crime, but there is no motive. It is only when Chen returns and starts to investigate the past that he finds answers. But by then he has troubles of his own.

central to the People's Republic. With disagreements between China and the West on the rise, the need to understand the political legacy of Mao is urgent and growing. A crucial motor of the Cold War: Maoism shaped the course of the Vietnam War and brought to power the Khmer Rouge in Cambodia; it aided anti-colonial resistance movements in Africa; it inspired terrorism in Germany and Italy, and wars and insurgencies in Peru, India and Nepal, some of which are still with us today. Starting with the birth of Mao's revolution in northwest China in the 1930s and concluding with its violent afterlives in South Asia and resurgence in the People's Republic today, Julia Lovell re-evaluates Maoism as both a Chinese and an international force, linking its evolution in China with its global legacy. Greatly revised and expanded, with a new afterword, this update to Martin Jacques's global bestseller is an essential guide to understanding a world increasingly shaped by Chinese power. Soon, China will rule the world. But in doing so, it will not become more Western. Since the first publication of *When China Rules the World*, the landscape of world power has shifted dramatically. In the three years since the first edition was published, *When China Rules the World* has proved to be a remarkably prescient book, transforming the nature of the debate on China. Now, in this greatly expanded and fully updated edition, boasting nearly 300 pages of new material, and backed up by the latest statistical data, Martin Jacques renews his assault on conventional thinking about China's ascendancy, showing how its impact will be as much political and cultural as economic, changing the world as we know it. First published in 2009 to widespread critical acclaim - and controversy - *When China Rules the World: The End of the Western World and the Birth of a New Global Order* has sold a quarter of a million copies, been translated into eleven languages, nominated for two major literary awards, and is the subject of an immensely popular TED talk.

In the sixteenth century, the vast and sophisticated empire of China lay almost entirely unknown to Western travellers. As global trade expanded, this land of reputedly boundless wealth, pale-faced women, and indecipherable tongues began to feed the

fantasies of European merchants and adventurers. The Catholic Church, meanwhile, saw in this great people millions of souls who would be damned unless the Christian message could be brought to them. In this book, Mary Laven tells the extraordinary story of the first Jesuit mission to China. Confronting enormous challenges, the Italian priest Matteo Ricci and a tiny handful of learned companions travelled thousands of miles from southern Europe to the very heart of the empire. In 1601, they gained permission from the notoriously xenophobic Wanli emperor to settle in the fabled Forbidden City. Living among eunuchs and mandarins, wearing the clothes and reading the books of Confucian scholars, Ricci and his associates strove to master the language and culture of their hosts. At the same time, they energetically preached the virtues of Western art and science. What were the motives of the carpenters and boatmen, the mothers, fathers and children who burned their idols and were cleansed with the waters of baptism? Mary Laven tries to answer these questions, as she brings this remote world vividly to life.

In Beijing in 1904, multiple murderer Wang Weiqin became one of the last to suffer the extreme punishment known as lingchi, called by Western observers "death by a thousand cuts." This is the first book to explore the history, iconography, and legal contexts of Chinese tortures and executions from the 10th century until lingchi's abolition in 1905.

To do this job, this book will arm you with all the strategies and tactics and forecasting tools you will need to profitably manage your organization through the business cycle seasons-from the best of boom times to the worst of recessionary times. In this book, you will learn to Forecast movements and key recessionary turning points in the business cycle Implement a set of powerful "battle-tested" strategies over the course of the business cycle Rebuild your organization with a strategic business cycle orientation and thereby make it much more recession-resistant and resilient over the longer term The forecasting tools and management strategies revealed in this book have been developed over the last five years by the author-the world's leading expert on managing the business cycle for competitive advantage. By learning to strategically manage the business cycle, your organization will be able to create a powerful competitive and sustainable advantage over its rivals and thereby find the grail sought by every executive team in the world-superior financial performance. In this way, Always a Winner provides you with the in-depth insight and practical advice you need to help your company survive and thrive in the increasingly risky conditions of the 21st century.

Donald Trump promised the American people a transformative change in economic policy after eight years of stagnation under Obama. But he didn't adopt a conventional left or right

Access Free Death By China Confronting The Dragon A Global Call To Action

economic agenda. His is a new economic populism that combines some conventional Republican ideas—tax cuts, deregulation, more power to the states—with more traditional Democratic issues such as trade protectionism and infrastructure spending. It also mixes in important populist issues such as immigration reform, pressuring the Europeans to pay for more of their own defense, and keeping America first. In *Trumponomics*, conservative economists Stephen Moore and Arthur B. Laffer offer a well-informed defense of the president's approach to trade, taxes, employment, infrastructure, and other economic policies. Moore and Laffer worked as senior economic advisors to Donald Trump in 2016. They traveled with him, frequently met with his political and economic teams, worked on his speeches, and represented him as surrogates. They are currently members of the Trump Advisory Council and still meet with him regularly. In *Trumponomics*, they offer an insider's view on how Trump operates in public and behind closed doors, his priorities and passions, and his greatest attributes and liabilities. Trump is betting his presidency that he can create an economic revival in America's industrial heartland. Can he really bring jobs back to the rust belt? Can he cut taxes and bring the debt down? Above all, does he have the personal discipline, the vision, the right team, and the right strategy to pull off his ambitious economic goals? Moore and Laffer believe that he can pull it off and that *Trumponomics* will usher in a new era of prosperity for all Americans.

A year-long journey by the renowned psychiatrist and his writer wife after her terminal diagnosis, as they reflect on how to love and live without regret. But never had he faced the need to counsel himself until his wife, esteemed

feminist author Marilyn Yalom, was diagnosed with cancer. In *A Matter of Death and Life*, Marilyn and Irv share how they took on profound new struggles: Marilyn to die a good death, Irv to live on without her. In alternating accounts of their last months together and Irv's first months alone, they offer us a rare window into facing mortality and coping with the loss of one's beloved. The Yaloms had numerous blessings—a loving family, a Palo Alto home under a magnificent valley oak, a large circle of friends, avid readers around the world, and a long, fulfilling marriage—but they faced death as we all do. With the wisdom of those who have thought deeply, and the familiar warmth of teenage sweethearts who've grown up together, they investigate universal questions of intimacy, love, and grief. Informed by two lifetimes of experience, *A Matter of Death and Life* is an openhearted offering to anyone seeking support, solace, and a meaningful life.

First published in the year 1842, the present book 'The Masque of the Red Death' by Edgar Allan Poe is a gothic short story that follows Prince Prospero's attempts to avoid a dangerous plague, known as the Red Death, by hiding in his abbey.

If you think the current administration is mismanaging the economy straight towards disaster, you're not alone: so do two top economists from both sides of the political aisle. In *Seeds of Destruction*, former Bush chief White House economist R. Glenn Hubbard and well-known CNBC commentator Peter Navarro explain why current economic policy is a catastrophic failure. Then, they offer a comprehensive, bipartisan blueprint for reversing the decline of America's currency, manufacturing base, and standard of living - setting the stage for the epic policy debates that will precede the 2010 elections. Hubbard and Navarro begin with a "checklist" of what it takes to be a prosperous, democratic nation - and show why Obama's

policies (some of Bush's also) fail on every level. They explain why the activist Federal Reserve and Obama fiscal stimulus policies are doing far more harm than good... why we must restore the U.S. manufacturing base, whatever China says about it... how to transform tax policy into an engine of growth and innovation... how to apply the "tough love" needed to save Social Security, Medicare, and Medicaid... why America must resign the job of world policeman... how market-based solutions can finally deliver real energy independence... how to reform our antique financial regulatory system without imposing heavy-handed rules that cause even more trouble.

An insider reveals what can—and does—go wrong when companies shift production to China In this entertaining behind-the-scenes account, Paul Midler tells us all that is wrong with our effort to shift manufacturing to China. Now updated and expanded, *Poorly Made in China* reveals industry secrets, including the dangerous practice of quality fade—the deliberate and secret habit of Chinese manufacturers to widen profit margins through the reduction of quality inputs. U.S. importers don't stand a chance, Midler explains, against savvy Chinese suppliers who feel they have little to lose by placing consumer safety at risk for the sake of greater profit. This is a lively and impassioned personal account, a collection of true stories, told by an American who has worked in the country for close to two decades. *Poorly Made in China* touches on a number of issues that affect us all.

For years, China has served as the "factory floor" for global production, driving down prices for consumers worldwide. But, unfortunately, China's rapid and chaotic industrialization has put it on a collision course with the rest of the world. *The Coming China Wars* was the first book to systematically cover all those conflicts: political, economic, and environmental. Now, in this

Access Free Death By China Confronting The Dragon A Global Call To Action

new edition, Dr. Peter Navarro has thoroughly updated the entire book. You'll find new chapters on the danger posed by China's flood of defective products and contaminated food; China's dramatic military expansion and the rising threat of a "hot war"; China's space program and its profound strategic implications; China's growing suppression of human rights and free speech; and much more. The coming China Wars will be fought over everything from decent jobs, livable wages, and advanced technologies to strategic resources...and eventually to our most basic of all needs: bread, water, and air. Unless all nations immediately address these impending conflicts, the results may be catastrophic. Like the First Edition, this book demands that we think much more deeply about how to stop the coming China Wars, laying out hard choices that must be made sooner rather than later. This new edition offers even more policy recommendations, including original contributions from several of the world's most important China experts. Publisher's note - in this book various quotes and viewpoints are attributed to a 'Ron Vara'. Ron Vara is not an actual person, but rather an alias created by Peter Navarro in order to present his views and opinions.

China is now poised to take a key role on the world stage, but in the early twentieth century the situation could not have been more different. Rana Mitter goes back to this pivotal moment in Chinese history to uncover the origins of the painful transition from a premodern past into a modern world. By the 1920s the seemingly civilized world shaped over the last two thousand years by the legacy of the great philosopher Confucius was falling apart in the face of western imperialism and internal warfare. Chinese cities still bore the imprints of its ancient past with narrow, lanes and temples to long-worshipped gods, but these were starting to change with the influx of foreign traders, teachers, and missionaries, all eager to shape China's ancient past

into a modern present. Mitter takes us through the resulting social turmoil and political promise, the devastating war against Japan in the 1940s, Communism and the Cultural Revolution of the 1960s, and the new era of hope in the 1980s ended by the Tian'anmen uprising. He reveals the impetus behind the dramatic changes in Chinese culture and politics as being China's "New Culture" - a strain of thought which celebrated youth, individualism, and the heady mixture of strange and seductive new cultures from places as far apart as America, India, and Japan.

Travis Maddox, Eastern University's playboy, makes a bet with good girl Abby that if he loses, he will remain abstinent for a month, but if he wins, Abby must live in his apartment for the same amount of time.

Deep China investigates the emotional and moral lives of the Chinese people as they adjust to the challenges of modernity. Sharing a medical anthropology and cultural psychiatry perspective, Arthur Kleinman, Yunxiang Yan, Jing Jun, Sing Lee, Everett Zhang, Pan Tianshu, Wu Fei, and Guo Jinhua delve into intimate and sometimes hidden areas of personal life and social practice to observe and narrate the drama of Chinese individualization. The essays explore the remaking of the moral person during China's profound social and economic transformation, unraveling the shifting practices and struggles of contemporary life.

The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of

what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

For more than twenty years after the Communist Revolution in 1949, China and most of the western world had no diplomats in each others' capitals and no direct way to communicate. Then, in July 1971, Henry Kissinger arrived secretly in Beijing on a mission which quickly led to the reopening of relations between China and the West and changed the course of post-war history. For the past forty years, Kissinger has maintained close relations with successive generations of Chinese leaders, and has probably been more intimately connected with China at the highest level than any other western figure. This book distils his unique experience and long study of the 'Middle Kingdom', examining China's history from the classical era to the present day, and explaining why it has taken the extraordinary course that it has. The book concentrates on the decades since 1949, presenting brilliantly drawn portraits of Mao Zedong, Zhou Enlai, Deng Xiaoping and other Chinese leaders, and reproducing verbatim Kissinger's conversations with each of them. But Kissinger's eye rarely leaves the long continuum of Chinese history: he describes the essence of China's approach to diplomacy, strategy and negotiation, and the remarkable ways in which Communist-era statesmen have drawn on methods honed over millennia. At the

end of the book, Kissinger reflects on these attitudes for our own era of economic interdependence and an uncertain future. On China is written with great authority, complete accessibility and with many wider reflections on statecraft and diplomacy distilled from years of experience. At a moment when the rest of the world is thinking about China more than ever before, this timely book offers insights that no other can.

Will there be war with China? This book provides the most complete and accurate assessment of the probability of conflict between the United States and the rising Asian superpower. Equally important, it lays out an in-depth analysis of the possible pathways to peace. Written like a geopolitical detective story, the narrative encourages reader interaction by starting each chapter with an intriguing question that often challenges conventional wisdom. Based on interviews with more than thirty top experts, the author highlights a number of disturbing facts about China's recent military buildup and the shifting balance of power in Asia: the Chinese are deploying game-changing "carrier killer" ballistic missiles; some of America's supposed allies in Europe and Asia are selling highly lethal weapons systems to China in a perverse twist on globalization; and, on the U.S. side, debilitating cutbacks in the military budget send a message to the world that America is not serious about its "pivot to Asia." In the face of these

threatening developments, the book stresses the importance of maintaining US military strength and preparedness and strengthening alliances, while warning against a complacent optimism that relies on economic engagement, negotiations, and nuclear deterrence to ensure peace. Accessible to readers from all walks of life, this multidisciplinary work blends geopolitics, economics, history, international relations, military doctrine, and political science to provide a better understanding of one of the most vexing problems facing the world.
