Randa Kassis starts from an anthropological challenge, saying that the system of religious ethics which is intended to form templates of what is forbidden or acceptable in sexual relationships between humans was only a modification of myths and dominating social experiences that sought to control this instinct to serve the power of forbidding. These myths have raised that form of ethics to a sacred rank, not only because they were unable to understand sex but because they were unable to understand the mysteries of nature too. Kassis takes up this challenge in order to say that life and liberty are parts of each other and they are linked to our capacity of awareness. If we discover that religious morality was a result of historical misunderstanding, then we will need to free this morality from the prison of human virtue.
