The amount of data being generated, processed, and stored has reached unprecedented levels. Even during the recent economic crisis, there has been no slow down or information recession. Instead, the need to process, move, and store data has only increased. Consequently, IT organizations are looking to do more with what they have while supporting gr

Books, magazine articles, and educational programs on entrepreneurship are all based on the idea that anyone can be an entrepreneur—that entrepreneurs are made, not born. Well, maybe not. In a study of 234 CEOs funded by the Kauffman Foundation, James L. Fisher and James V. Koch came up with a surprising conclusion: Some individuals are simply more naturally fitted to become entrepreneurs than others. They are pre-wired. Because of heredity, some people are much more likely to become successful entrepreneurs or pursue entrepreneurial strategies within a corporate setting profitably. By recognizing that, this book will significantly improve corporate selection processes, strengthen entrepreneurship programs, and boost the confidence of aspiring entrepreneurs through invaluable insights. Among other things, Fisher and Koch show that true entrepreneurs not only see the world differently—they act differently. Compared with corporate managers, for example, they are more confident, more decisive, more likely to upset the apple cart, and more energetic. They love to compete but are notable for the partnerships they are able to fashion with friend and foe alike. Such conclusions are remarkable. Why? Because they are based on the only empirical comparison study yet conducted on entrepreneurship. The insights are not based on personal opinion or case studies but on valid and reliable personality indicators. Because the book shows that certain kinds of people will find it much easier to found successful companies than others, it has many practical applications. It will help organizations fit the right people into jobs requiring an entrepreneurial bent. It will challenge corporations to hire entrepreneurial CEOs who will transform businesses rather than maintain the status quo. And it will speak directly to entrepreneurs and those contemplating starting a business, who will learn if they have the right stuff to start and sustain a business. In short, this book provides insights into the entrepreneurial soul that can change the fortunes of individuals and companies for the better.

WALL STREET JOURNAL BESTSELLER From Michael Dell, renowned founder and chief executive of one of America's largest technology companies, the inside story of the battles that defined him as a leader In 1984, soon-to-be college dropout Michael Dell hid signs of his fledgling PC business in the bathroom of his University of Texas dorm room. Almost 30 years later, at the pinnacle of his success as founder and leader of Dell Technologies, he found

himself embroiled in a battle for his company's survival. What he'd do next could ensure its legacy—or destroy it completely. *Play Nice But Win* is a riveting account of the three battles waged for Dell Technologies: one to launch it, one to keep it, and one to transform it. For the first time, Dell reveals the highs and lows of the company's evolution amidst a rapidly changing industry—and his own, as he matured into the CEO it needed. With humor and humility, he recalls the mentors who showed him how to turn his passion into a business; the competitors who became friends, foes, or both; and the sharks that circled, looking for weakness. What emerges is the long-term vision underpinning his success: that technology is ultimately about people and their potential. More than an honest portrait of a leader at a crossroads, *Play Nice But Win* is a survival story proving that while anyone with technological insight and entrepreneurial zeal might build something great—it takes a leader to build something that lasts. Until Josiah Wedgwood, Britons ate from wood and pewter plates. Until Henry Heinz, women toiled over pickled foods. Until Michael Dell, few people owned a personal computer, let alone dreamed of buying one "built to order." According to business historian Nancy F. Koehn, these pathbreaking entrepreneurs shared a powerful gift: the ability to discern how economic and social change would affect consumer needs and wants. In *Brand New*, Koehn introduces us to six extraordinary leaders of brand creation who lived and worked during periods of widespread change: Josiah Wedgwood in the Industrial Revolution; Henry Heinz and Marshall Field in the Transportation and Communication Revolution; and Est?e Lauder, Howard Schultz of Starbucks, and Michael Dell in the Information Revolution. Through compelling and engaging profiles of these entrepreneurial visionaries, she reveals a provocative relationship between economic turbulence, household priorities, and company strategy that holds important lessons for today's brand builders. According to Koehn, these forward-thinking individuals understood the profound effects that socioeconomic change has on what customers want, have, and can afford as much as on what companies make—and were masters at exploiting the enormous business opportunities these demand-side shifts created. Indeed, the brands and companies created by these individuals have become such a part of everyday life that we've made them part of common speech: we pass the Heinz; eat off Wedgwood; order a Starbucks. Koehn draws from their diaries, correspondence, and official business records to demonstrate that these entrepreneurs were more than savvy marketers; they were institution builders. She shows how each used brand not as a logo, but as a vital strategic tool for creating best-of-class companies—and for building powerful organizational capabilities that supported their connections with customers and helped make new markets for their offerings. Distilling critical lessons for businesses operating in both the traditional and on-line worlds, *Brand New* will convince every entrepreneur of the remarkable power of brands to transform start-ups, gain competitive advantage, and change lives.
