The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

The stories of an American Indian sniper caught up in the Great War and of his aunt, one of the last Cree Indians to live off the land, are intertwined in a mesmerising journey as they travel home over three days This beautiful, haunting novel begins as Niska is reunited with her nephew, Xavier, after he returns from the horrors of the First World War. As she slowly paddles her canoe on the 3-day journey to take him home, travelling through the stark but stunning landscape of Northern Canada, their respective stories emerge. Niska is the last Cree Indian woman living off the land in Canada. She recalls her memories of growing up among her kinsfolk, of trying to remain true to her ancestors and traditions in a rapidly changing world. Xavier joined the war reluctantly at the urging of his only friend, Elijah - a Cree boy raised in the reservation schools. Elijah and Xavier honed their hunting skills as snipers in the horrors of the trenches and the wastes of No-man's land. But as the war continues, they react in very different ways to the never-ending carnage around them. Niska realises that in the aftermath of war, Xavier's very soul is dying - but will the three day journey home be enough to help him find hope again?

This guide to the short answer question section of the final FRCA not only comprehensively covers the subject matter of the exam with past paper examples, it also guides trainees on the most effective manner in which to approach the questions. Chapters reflect the different topics contained within the examination, including pain medicine, ICM, paediatric anaesthesia and more. Every question from the past 6 1/2 years of examinations is addressed and the ideal style in which to answer an SAQ covered in depth. This guide will be gold dust to the candidate preparing for the final FRCA, providing all the answers as well as the best way to present them. It will save hours of research and preparation.
