Home to an estimated 15.9% of the world's proven oil reserves, Saudi Arabia is the single largest economy in the Middle East and North Africa. According to the Ministry of Finance, real GDP grew by 3.8% to \$746bn in 2013. While oil income is expected to continue to account for the majority of government revenues for the foreseeable future, the non-oil sector has expanded significantly in recent decades growing 9.3% in 2013. Indeed, while some Western countries may be seeing a return to cautious optimism and leading emerging economies are weighing the potential impact on capital flows of tapering in the US Federal Reserve's quantitative easing programme, Saudi Arabia is seeing sustained growth buoyed by high global oil prices and internal investment in its own infrastructure. Some 15 years after Saudi Arabia attended the inaugural meeting of G20 countries, its key economic indicators make it the envy of many other member states. Given the size of Saudi economy within the regional and indeed global market, OBG looks in depth at bilateral trade between ASEAN nations and the GCC.

What do vehicle manufacturers like Rosenbauer, logistics companies like DB Schenker, a compressor manufacturer such as Bauer, an elevator manufacturer

such as ThyssenKrupp, and a hygiene goods manufacturer like Hagleitner all have in common? They all use the potential of digitization to offer smarter and faster services to customers and to actively shape the digital transformation of their business models. This book provides valuable insights with concise and established guidelines for the successful digital transformation of business models. Professionals in management, strategic planning, business development, as well as researchers and students from the fields of innovation/technology management, strategic management, and entrepreneurship would particularly benefit from this book.

'Re-balancing China' addresses three key sets of issues in China's political economy. Part One provides an analysis of the profound effect of the global financial crisis upon China's economy, as well as the positive impact of the massive rescue package that was implemented in response to the crisis. Part Two focuses on the challenge of globalization for China's industrial policy. After more than two decades of industrial policy, China still has a negligible number of large firms that are competitive in global markets. China's experience presents a fundamental challenge to traditional concepts of industrial policy and development. Part Three examines China's international relations – in particular, its relationship with the US and the interactions between the two countries in the

East and South China Seas.

Directory of Corporate Counsel, Fall 2020 Edition (2 vols)Wolters Kluwer

The Directory of Corporate Counsel, Fall 2020 Edition remains the only comprehensive source for information on the corporate law departments and practitioners of the companies of the United States and Canada. Profiling over 30,000 attorneys and more than 12,000 companies, it supplies complete, uniform listings compiled through a major research effort, including information on company organization, department structure and hierarchy, and the background and specialties of the attorneys. This newly revised two volume edition is easier to use than ever before and includes five quick-search indexes to simplify your search: Corporations and Organizations Index Geographic Index Attorney Index Law School Alumni Index Nonprofit Organizations Index Former 2016 -2017 Edition: ISBN 9781454871798 Former 2015 - 2016 Edition: ISBN 9781454856535 Former 2014 - 2015 Edition: ISBN 9781454843474 Former 2013 -2014 Edition: ISBN #9781454825913 Former 2012 -2013 Edition: ISBN #9781454809593 Former 2017-2018 Edition: ISBN #9781454884460 Former 2018 Mid-Year Edition: ISBN #9781454889250 Former 2019 Edition ISBN #9781543803488 Former 2020 Edition: ISBN #9781543810295;

Robo-Advisory is a field that has gained momentum over recent years, propelled by the increasing digitalization and automation of global financial markets. More and more money has been flowing into automated advisory, raising essential questions regarding the foundations, mechanics, and performance of such solutions. However, a comprehensive summary taking stock of this new solution at the intersection of finance and technology with consideration for both aspects of theory and implementation has so far been wanting. This book offers such a

Online Library Diebold Nixdorf Operations Management Solutions

summary, providing unique insights into the state of Robo-Advisory. Drawing on a pool of expert authors from within the field, this edited collection aims at being the vital go-to resource for academics, students, policy-makers, and practitioners alike wishing to engage with the topic. Split into four parts, the book begins with a survey of academic literature and its key insights paired with an analysis of market developments in Robo-Advisory thus far. The second part tackles specific questions of implementation, which are complemented by practical case studies in Part III. Finally, the fourth part looks ahead to the future, addressing questions of key importance such as artificial intelligence, big data, and social networks. Thereby, this timely book conveys both a comprehensive grasp of the status-quo as well as a guiding outlook onto future trends and developments within the field.

China has become the world's second biggest economy and its largest exporter. It possesses the world's largest foreign exchange reserves and has 29 companies in the FT 500 list of the world's largest companies. 'China's Rise' preoccupies the global media, which regularly carry articles suggesting that it is using its financial resources to 'buy the world'. Is there any truth to this idea? Or is this just scaremongering by Western commentators who have little interest in a balanced presentation of China's role in the global political economy? In this short book Peter Nolan - one of the leading international experts on China and the global economy - probes behind the media rhetoric and shows that the idea that China is buying the world is a myth. Since the 1970s the global business

revolution has resulted in an unprecedented degree of industrial concentration. Giant firms from high income countries with leading technologies and brands have greatly increased their investments in developing countries, with China at the forefront. Multinational companies account for over two-thirds of China's high technology output and over ninety percent of its high technology exports. Global firms are deep inside the Chinese business system and are pressing China hard to be permitted to increase their presence without restraints. By contrast, Chinese firms have a negligible presence in the high-income countries - in other words, we are 'inside them' but they are not yet 'inside us'. China's 70-odd 'national champion' firms are protected by the government through state ownership and other support measures. They are in industries such as banking, metals, mining, oil, power, construction, transport, and telecommunications, which tend to make use of high technology products rather than produce these products themselves. Their growth has been based on the rapidly growing home market. China has been unsuccessful so far in its efforts to nurture a group of globally competitive firms with leading global technologies and brands. Whether it will be successful in the future is an open question. This balanced analysis replaces rhetoric with evidence and argument. It provides a much-needed perspective on current debates about China's growing power and it will contribute

to a constructive dialogue between China and the West.

This book collects recent work presented at the 31st IPMA Congress, which was held in Merida, Mexico, from September 30th to October 2nd, 2019. It covers a range of project, programme and portfolio management contexts, with the general aim of integrating sustainability into project management. The book is structured into three parts. The first part covers concepts and approaches related to the integration of sustainability in project management. The second part

Online Library Diebold Nixdorf Operations Management Solutions

presents research on integrating sustainability into project management in different industries and regions. The final part takes specific perspectives on integrating sustainability into project management related to learning and continuing competence development. The book offers a valuable resource for all researchers interested in studying the emerging trends in incorporating sustainability in project, programme and portfolio management.

Tech is back! And job seekers now have a place to go to get the inside scoop on the top software, hardware, communications equipment and other tech employers. For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

China has achieved remarkable, sustained economic growth under the policies of 'reform and opening up' put into place since the late 1970s. China's industrial policies have nurtured a large group of firms with high profits and a high market capitalisation. However, few people in the West can name a single Chinese firm. During the modern era of capitalist globalisation firms from the high income countries have spread their

Online Library Diebold Nixdorf Operations Management Solutions

business systems across the world. This has presented a profound challenge for industrial policy in developing countries, including even China, the world's second largest economy. China is unique among large latecomer developing countries in having reached the position of being a huge, fast-growing economy, with a tremendous impact on the rest of the world, but lacking a substantial group of globally competitive firms. This volume explores this paradox. Fully understanding the industrial policy challenge that the era of capitalist globalisation has produced for China is essential for harmonious international relations.

Profiles of 750 major U.S. companies.
