A guide to what's on, how to listen and what to buy

This book provides an introduction to the emerging area of "Brain-Machine Interfaces," with emphasis on the operation and practical design aspects. The book will help both electrical & bioengineers as well as neuroscience investigators to learn about the next generation brain-machine interfaces. The comprehensive review and design analysis will be very helpful for researchers who are new to this area or interested in the study of the brain. The in-depth discussion of practical design issues especially in animal experiments will also be valuable for experienced researchers.

Elegant rusticity meets unpretentious luxury in the work of this award-winning architecture firm. Howard Backen, award-winning principal of the architecture firm Backen Gillam Kroeger, is at the center of a popular movement in home design that emphasizes comfort over pretension and elegant simplicity over complication that tends to serve the ego of architects. This volume, the first on his work and that of the firm, is an artful exploration of that this aesthetic, featuring farmhouses in the Napa Valley, hilltop homes, seaside retreats, and lakeside hideaways. Throughout the work, a sense of intimacy, warmth, and informality pervades. Natural materials, such as wood, stone, and brick form the foundations, walls, and ceilings of these subtly luxurious spaces, while nature itself plays a considered role that is at once complementary and also intricately conjoined with the work. Long vistas open outward toward sun-drenched valleys from the window-lined wall of a bedroom in one home, while more immediate scenes of steeply rising hillsides and hidden lakes appear from just beyond the back stoop--and the rough-hewn-board dock--of another. Sensitive, alluring, and wonderfully resonant with the suggestion of invitation, the work of Backen Gillam Kroeger is both thrilling to the eye and restorative to the soul.
