Traditional Chinese edition of Half the Sky by New York Times columnist Nickolas Kristof and Sheryl Wudunn, both Pulitzer Prize winner. "Half the Sky" is a required reading in college campuses. The book is an emotionally rending read as it exposes the abusive treatment of women in many parts of the world. But if and when the women had the opportunity and were empowered, say the authors, they can, as the Chinese saying goes, hold up half the sky. The last chapter offers simple actions anyone can take to help empower women! In Chinese. Distributed by Tsai Fong Books, Inc.

Europe has talked itself into a refugee and security crisis. There is, however, a misrecognition of the real challenge facing Europe: the challenge of managing the relationship between Europeans and the currently stigmatized 'others' which it has attracted. Making the case against a 'Europe of walls', Robin Wilson instead proposes a refounding of Europe built on the power of diversity and an ethos of hospitality rather than an institutional thicket serving the market.

These chapters will resonate with a broad range of scholars examining how nations and citizens address culturally the liberty, equality and solidarity implied by the concept of 'diverse spaces'. Though primarily intended for graduate students, researchers and professors in cultural studies, sociology and Canadian studies, the interdisciplinary nature of the questions raised will also appeal to international scholars in cultural policy, arts and cultural management, performance studies, museum and heritage studies, and cultural geography. Importantly, this book will be of interest to professionals and practitioners in institutions, agencies and associations of the public arts and culture sector both in Canada and internationally.

In *Understanding Global Cultures*, Fifth Edition, authors Martin J. Gannon and Rajnandini Pillai present the cultural metaphor—any activity, phenomenon, or institution with which the members of a given culture identify emotionally or cognitively—as a method for understanding the cultural mindsets of individual nations, clusters of nations, and even continents. The book shows how metaphors are guidelines to help outsiders quickly understand what members of a culture consider important. The fully updated Fifth Edition includes 31 nation-specific chapters, including a new Part XI on popular music as cultural metaphors, two completely new chapters on Vietnam and Argentina, revisions to all retained chapters, and a more explicit linkage between each cultural metaphor and current economic and business developments in each nation.

The purpose of the book series is to present reviews of current research in specific areas of early childhood education. Each volume is devoted to a particular area of the field. Within each volume scholars present reviews of research on particular aspects of the field of early childhood education. Each chapter summarizes the current research and provides an extended set of references which will facilitate readers in furthering their inquiries into research in that area. All contributions to each volume are juried, with an Editorial Board and additional scholars reviewing the draft chapters, suggesting ways that the chapters could be improved, and finally recommending them for publication. This process insures the quality of the contributions to the chapter and avoids the possibility of bias in the work. Recent findings suggest that young children's learning experiences are critical to their learning development, which has attracted the attention of researchers, scholars, and policy makers. Interest has focused on the early childhood policy and practice that can help improve the academic paths of children in poverty. Many of these children are from linguistically and culturally diverse families. The purpose of this volume is to review and summarize the current state of knowledge related to linguistically and culturally diverse children. It expanded cultural diversity to include social justice which can contribute knowledge in providing effective teacher preparation programs and high quality programs for linguistically and culturally diverse children.

"World music" emerged as a commercial and musical category in the 1980s, but in some sense music has always been global. Through the metaphor of encounters, *Music and Globalization* explores the dynamics that enable or hinder cross-cultural communication through music. In the stories told by the contributors, we meet well-known players such as David Byrne, Peter Gabriel, Sting, Ry Cooder, Fela Kuti, and Gilberto Gil, but also lesser-known characters such as the Senegalese Afro-Cuban singer Laba Sosseh and Raramuri fiddle players from northwest Mexico. This collection demonstrates that careful historical and ethnographic analysis of global music can show us how globalization operates and what, if anything, we as consumers have to do with it.

Issues of race, class, gender and religion permeate the study of contemporary dance, resulting in cultural clashes in classrooms and studios. The first of its kind, this book provides dance educators with tools to refocus teaching methods to celebrate the pluralism of the United States. The contributors discuss how to diversify dance history courses in higher education and ballet technique classes, choreographing dance about socially charged contemporary issues and incorporating Native American dances into the curriculum, among other topics. The application of critical pedagogy in the dance classroom enables instructors to teach methods that reflect students' culture and affirm their experiences.

Leadership in a Diverse and Multicultural Environment provides leaders with the tools necessary to effectively interact with all individuals. Although much of the research related to multiculturalism has focused on expatriates and international assignments, the book also focuses on leaders in domestic organizations, as they can benefit from developing their own multicultural awareness, knowledge, and skills. Effective leaders can shape the culture of their organization to be accepting of individuals from all races, ethnicities, religions, and genders with a minimum of misunderstandings.

"It is my expectation that respect for the critical importance of seed sovereignty will in due course be recognised by member states of the United Nations to be as critical to global peace and security as the UN Charter demands in respect of State sovereign equality, justice, human rights and economic and social wellbeing for all peoples."—Denis J. Halliday, UN Assistant Secretary-General 1994-98 "A constructive contribution to our understanding of what is going wrong and what can go right in the complex area of seed sovereignty."—Dervla Murphy, renowned travel writer and adventurer "Keeping seed diversity alive is the secret ingredient, not just for the good, nutrient-dense food that every cook, gardener and farmer/producer needs, but for strengthening our resilience in the face of multiple environmental threats. This compelling and timely book helps us to understand what we are up against and how we can overcome it."— Darina Allen, internationally renowned cook, founder of Ballymaloe Cookery school and President of the East Cork Convivium of Slow Food This book studies the relationship between globalisation and seed sovereignty in Sub-Saharan Africa. It provides comparative case studies of the most recent Kenyan and Ethiopian seed laws, as well as a study of seed sovereignty 'on the ground' in a locality within Ethiopia. Based on extensive fieldwork, it identifies the interests and motivations of transnational seed corporations, global philanthropic organisations, state actors, and local farmers. It finds significant differences in the wording of seed laws and the exercise of seed sovereignty, applying theories of globalisation to help us better understand these varied outcomes. It shows that seed sovereignty has the potential to be shared between local, national, regional, and global authorities, but in different ways in different countries and localities. In the face of what might sometimes appear to be unstoppable global forces, these findings suggest that the exercise of seed sovereignty can be transformed even in a highly globalised world.

The essays in this book highlight the most important ways in which domestic, international, public, and private legal systems interact with each other. The initial essays provide a theoretical overview of the study of legal harmonization—that is, of the nature and character of communication, accommodation, amalgamation, or resistance

among legal systems. These interactions occur within horizontal relationships, between political institutions operating at the same level of authority. Vertical relationships between political institutions whose relationships are hierarchical have given rise to different patterns of interaction. New legal orders are being created through the adoption of international legal instruments that may reach nation-states, private entities, and individuals. Each has the potential for significantly affecting the sources of authority over public and private actors. Other essays illustrate the many ways in which communication between legal systems produce very real, if very different, effects across the world.

Now available in three thematic volumes, the second edition of *Moral Issues in Global Perspective* is a collection of the newest and best articles on current moral issues by moral and political theorists from around the globe. Each volume seeks to challenge the standard approaches to morality and moral issues shaped by Western liberal theory and to extend the inquiry beyond the context of North America. Covering a broad range of issues and arguments, this collection includes critiques of traditional liberal accounts of rights, justice, and moral values, while raising questions about the treatment of disadvantaged groups within and across societies affected by globalization. Providing new perspectives on issues such as war and terrorism, reproduction, euthanasia, censorship, and the environment, each volume of *Moral Issues in Global Perspective* incorporates work by race, class, feminist, and disability theorists. *Human Diversity and Equality*, the second of the three volumes, examines issues of equality and difference and the effects, within and across borders, of kinds of discrimination on the basis of race, ethnicity, gender, disability, class, and sexual orientation. Nine essays are new, four of which were written especially for this volume. *Moral Issues in Global Perspective* is available in three separate volumes—*Moral and Political Theory*, *Human Diversity and Equality*, and *Moral Issues*.

This book presents a survey of approaches to dealing with ‘rival histories’ in the classroom, arguing that approaching this problem requires great sensitivity to differing national, educational and narrative contexts. Contested narratives and disputed histories have long been an important issue in history-teaching all over the world, and have even been described as the ‘history’ or ‘culture’ wars. In this book, authors from across the globe ponder the question “what can teachers do (and what are they doing) to address conflicting narratives of the same past?”, and puts an epistemological issue at the heart of the discussion: what does it mean for the epistemology of history, if it is possible to teach more than one narrative? Divided into three sections that deal with historical cultures, multicultural societies and multiperspectivity, the chapters of the book showcase that dealing with rival histories is very much dependent on context, and that diverse teaching traditions and societal debates mean that teachers’ abilities in engaging with the teaching of rival narratives are very different. The volume will be compelling reading for students and researchers in the fields of education, history, sociology and philosophy, as well as practising teachers.

The purpose behind Communicating Gender Diversity: A Critical Approach is not to provide any final conclusions about communicating gender. Because gender is a constantly evolving concept, both in terms of individuals' gender identity development and the larger culture's predominant notions of gender, such absolute claims are not possible. Instead, the intent is to better equip readers with tools with which they can examine, and make sense of, the intersections of communication and gender. The text covers the variety of ways in which communication of and about gender and sex enables and constrains people's intersectional identities. The authors believe people are social actors and, as such, create meaning through their symbolic interactions. Thus, the book's emphasis is not on how gender influences communication, but on how communication constitutes gender. They also believe that people are capable of being self-reflective about communication processes, and creative in generating new ways to play with symbols.

This book explores how changes that occurred around 1989 shaped the study of the social sciences, and scrutinizes the impact of the paradigm of neoliberalism in different disciplinary fields. The contributors examine the ways in which capitalism has transmuted into a seemingly unquestionable, triumphant framework that globally articulates economics with epistemology and social ontology. The volume also investigates how new narratives of capitalism are being developed by social scientists in order to better understand capitalism's ramifications in various domains of knowledge. At its heart, Beyond Neoliberalism seeks to unpack and disaggregate neoliberalism, and to take readers beyond the analytical limitations that a traditional framework of neoliberalism entails. This book is a result of discussions at and support from the Irmgard Coninx Foundation.

Jones/George, *Essentials of Contemporary Management* is the concise edition of the market bestselling textbook by the same author team. Jones and George are dedicated to the challenge of “Making It Real” for students. The authors present management in a way that makes its relevance obvious even to students who might lack exposure to a “real-life” management context. This is accomplished thru a diverse set of examples, and the unique, and most popular feature of the text, the “Manager as a Person” Chapter 2. This chapter discusses managers as real people with their own personalities, strengths, weaknesses, opportunities, and problems and this theme is carried thru the remaining chapters. This text also discusses the importance of management competencies--the specific set of skills, abilities, and experiences that gives one manager the ability to perform at a higher level than another in a specific context. The themes of diversity, ethics, globalization, and information technology are integrated throughout.

This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.
