Linking the decline in Church authority in the late seventeenth and early eighteenth centuries with the increasing respectability of fiction, Carol Stewart provides a new perspective on the rise of the novel. The resulting readings of novels by authors such as Samuel Richardson, Sarah Fielding, Frances Sheridan, Charlotte Lennox, Tobias Smollett, Laurence Sterne, William Godwin, and Jane Austen trace the translation of ethical debate into secular and gendered terms. Stewart argues that the seventeenth-century debate about ethics that divided Latitudinarians and Calvinists found its way into novels of the eighteenth century. Her book explores the growing belief that novels could do the work of moral reform more effectively than the Anglican Church, with attention to related developments, including the promulgation of Anglican ethics in novels as a response to challenges to Anglican practice and authority. An increasingly legitimate genre, she argues, offered a forum both for investigating the situation of women and challenging patriarchal authority, and for challenging the dominant political ideology.

Taking a unique approach that emphasizes careful reasoning, this reader is structured around 28 key arguments that have provoked heated debates on current ethical issues. --

Enhanced knowledge of the nature and causes of mental disorder have led increasingly to a need for the recruitment of 'cognitively vulnerable' participants in biomedical research. These individuals often fall into the 'grey area' between obvious decisional competence and obvious decisional incompetence and, as a result, may not be recognised as having the legal capacity to make such decisions themselves. At the core of the ethical debate surrounding the participation of cognitively vulnerable individuals in research is when, if at all, we should judge them decisionally and legally competent to consent to or refuse research participation on their own behalf and when they should be judged incompetent in this respect. In this book, the author develops a novel justificatory framework for making judgments of decisional competence to consent to biomedical research with reference to five groups of cognitively vulnerable individuals - older children and adolescents, adults with intellectual disabilities, adults with depression, adults with schizophrenia and adults with dementia, including Alzheimer's disease. Using this framework, the author argues that we can make morally

defensible judgments about the competence or incompetence of a potential participant to give contemporaneous consent to research by having regard to whether a judgment of competence would be more harmful to the 'generic rights' of the potential participant than a judgment of incompetence. The argument is also used to justify an account of supported decision-making in research, and applied to evaluate the extent to which this approach is evident in existing ethical guidelines and legal provisions. The book will be of interest to bioethicists as well as psychiatrists and academic medical lawyers interested in normative questions raised by the concepts of competence and capacity.

This book examines the way in which the fictional writings of C.S. Lewis reveal much about the man himself and his quest for psychological and spiritual wholeness. There is new material dealing with C.S. Lewis's political writings, especially the correspondences between his thriller, *That Hideous Strength* and George Orwell's *Nineteen Eighty-Four*, and some new insights into Lewis's attitudes to women.

The Abolition of Man is one of C.S. Lewis's most important and influential works. In three weighty lectures, given at the height of the Second World War, Lewis defends the objectivity of value, pointing to the universal moral law that all great philosophical and religious traditions have recognized. This critical edition, prepared by Michael Ward, helps readers get the most out of Lewis's classic work with an introduction placing the book in the context of his life and times; a fully annotated version of the text; a commentary on key passages; and

a set of questions for group discussion or individual reflection. Scholarly, detailed, yet accessible, it is the must-have version of an essential volume.

Can animals be regarded as part of the moral community? To what extent, if at all, do they have moral rights? Are we wrong to eat them, hunt them, or use them for scientific research? Can animal liberation be squared with the environmental movement? Taylor traces the background of these debates from Aristotle to Darwin and sets out the views of numerous contemporary philosophers—including Peter Singer, Tom Regan, Mary Anne Warren, J. Baird Callicott, and Martha Nussbaum—with ethical theories ranging from utilitarianism to eco-feminism. The new edition also includes provocative quotations from some of the major writers in the field. As the final chapter insists, animal ethics is more than just an “academic” question: it is intimately connected both to our understanding of what it means to be human and to pressing current issues such as food shortages, environmental degradation, and climate change.

Public relations frequently reflects the conscience of an organization. Public relations professionals must ask the right questions when advising organizations on the best ways to protect themselves from damage or liability. A better understanding of ethics helps formulate those questions and educate management on the ethical consequences of corporate action. Karla Gower has updated *Legal and Ethical Considerations for Public Relations* to reflect recent case law and the prevalence of social media in our lives and in public relations practice. She considers ethical standards, the development of First Amendment law, corporate and

commercial speech, lobbying, protecting creative property, and other specific areas of the law. In addition, Gower highlights important cases and breaks down how their decisions have impacted current law. Readers will learn to collaboratively resolve corporate crises not just in the classroom, but throughout their professional careers.

In some ways, they could not be more different: the pipe-smoking, Anglican Oxford don and the blue-collar scion of conservative Presbyterianism. But C. S. Lewis and Francis Schaeffer, each in his unique way, fashioned Christian apologetics that influenced millions in their lifetimes. And the work of each continues to be read and studied today. In this book Scott Burson and Jerry Walls compare and contrast for the first time the thought of Lewis and Schaeffer. With great respect for the legacy of each man, but with critical insight as well, they suggest strengths and weaknesses of their apologetics. All the while they consider what Lewis and Schaeffer still have to offer in light of postmodernism and other cultural currents that, since their deaths, have changed the apologetic landscape. This incisive book stands as both an excellent introduction to the work of these two
