Think BigMake It Happen in Business and LifeHarper Collins
Americans have long believed that the private lives of their politicians are important indicators of their fitness to lead and of their ability to defend and uphold American values. For many, a sex scandal renders a person ineligible, or at the very least questionably qualified, for public service. In Compromising Positions, Leslie Dorrough Smith questions the assumption that sex scandals are really about sex-- that is, that they are primarily concerned with the discovery of sexual misconduct. She argues that they are, instead, a form of cultural storytelling that uses racial and gendered symbols to create a collective sense of national worth and strength. Smith shows that sex scandals involve the use of four very powerful social tools--gender, race, politics, and religion-- that together create a rhetoric about what America is, who is eligible to formally represent it, and what types of symbolic religiosity such leaders must display to legitimize their power. Americans tend to condemn or excuse the sexual misdeeds of their politicians depending on the degree to which the individual in question reinforces evangelical interpretations of "American values" and a "Christian nation." Such values include not just moral integrity, but strength, courage, and conquest. As a consequence, sex scandals are less likely to occur in cultural moments when the public is open to reading a politician's moral lapse as a symbolic form of national dominance. Put simply, when a leader is perceived as strong, domineering, and necessary for national health, many people will find ways either to overlook his illicit sexual behavior or somehow read it as an American act.

"The Strange Case of Donald J. Trump provides a coherent and nuanced psychological portrait of the 45th president of the United States. Drawing on biographical events in Trump's life and on contemporary research and theory in personality, social, and developmental psychology, the book explores the personality traits and psychological dynamics that have shaped Trump's life, with an emphasis on the strangeness of the case - how Trump again and again defies psychological expectations regarding what it means to be a human being. The book's central thesis is that Donald Trump is the episodic man. He lives in the moment, outside of time, without an internal story to connect the discrete scenes in his life. As such, Trump perceives himself to be more like a superhero or a primal force, supernatural and timeless, rather than a flesh-and-blood human being with an inner life, a remembered past, and an imagined future.

Trump's psychological status as the episodic man helps us understand both Trump's appeal (in the minds of millions) and his failings. The book's interpretation of Trump sheds new light on Trump's charisma, his deal making, his volatile temperament, his approach to personal relationships, his narcissism, and his emergence as a new kind of authoritarian leader in American history."--
