and other alliances belied collective actions, even as Africa implemented decisions that required cooperation: *uti possidetis* (maintaining colonial borders), containing secession, intra- and inter-state conflicts, rebellions and building RECs and a united Africa as envisioned by Pan Africanists worked better collectively.

Groundbreaking study demonstrating how Japan's leaders play an important role in diplomacy. A political leader is most often a nation's most high-profile foreign policy figure, its chief diplomat. But how do individual leadership styles, personalities, perceptions, or beliefs shape diplomacy? In *Japanese Diplomacy*, the question of what role leadership plays in diplomacy is applied to Japan, a country where the individual is often viewed as being at the mercy of the group and where prime ministers have been largely thought of as reactive and weak. In challenging earlier, simplified ideas of Japanese political leadership, H. D. P. Envall argues that Japan's leaders, from early Cold War figures such as Yoshida Shigeru to the charismatic and innovative Koizumi Jun'ichirō to the present leadership of Abe Shinzō, have pursued leadership strategies of varying coherence and rationality, often independent of their political environment. He also finds that different Japanese leaders have shaped Japanese diplomacy in some important and underappreciated ways. In certain environments, individual difference has played a significant role in determining Japan's diplomacy, both in terms of the country's strategic identity and summit diplomacy. What emerges from *Japanese Diplomacy*, therefore, is a more nuanced overall picture of Japanese leadership in foreign affairs.

States, Mexico and Colombia. Victor J. Hinojosa finds that Mexico is consistently held to a very different standard than Colombia and that the US often satisfies domestic political pressures to be tough on drugs by punishing Colombia while allowing Mexico much more freedom to pursue different strategies. He also explores the role of domestic terrorism and presidential reputation in Colombia for the US-Colombia pair and the role of competing issues in the US-Mexican bilateral agenda for that country pair, finding that congressional pressure and electoral tests exert the most impact on US behavior but that Mexican and Colombian behavior is best explained in other ways. Together, these findings suggest both the promise of integrating the study of international relations and comparative politics and important limitations of the theoretical framework.

This book offers a multidisciplinary approach to the Dispute Settlement Mechanism (DSM) by bringing together contributions from legal scholars and political scientists. Most of the authors belong to a tightly knit legal epistemic community, trained at the University of São Paulo and at the top-ranked research and policy centers on WTO law in Europe. Presenting a novel and unique perspective on the DSM, it provides an analysis of current themes at the heart of the WTO Dispute Settlement Mechanism through the lenses of scholars with a “developing country” perspective. Focusing on assessment, substance, and process, it presents a three-fold approach to the analysis and offers a singular contribution to the scholarly literature on the WTO. The book discusses the topic from the viewpoint of individuals deeply involved in the scholarly production as well as the daily operation of the mechanism. The contributors include academics in the fields of international economic law and political science, diplomats, individuals engaged in legal private practice, and individuals affiliated with the WTO as well as

WTO-related think tanks. The result is a balanced perspective on pressing issues that have arisen and that are likely to remain at the center of the scholarly and policy debate for years to come.

In light of the intertwining logics of military competition and economic interdependence at play in US-China relations, *Trading with the Enemy* examines how the United States has balanced its potentially conflicting national security and economic interests in its relationship with the People's Republic of China (PRC). To do so, Hugo Meijer investigates a strategically sensitive yet under-explored facet of US-China relations: the making of American export control policy on military-related technology transfers to China since 1979. *Trading with the Enemy* is the first monograph on this dimension of the US-China relationship in the post-Cold War. Based on 199 interviews, declassified documents, and diplomatic cables leaked by Wikileaks, two major findings emerge from this book. First, the US is no longer able to apply a strategy of military/technology containment of China in the same way it did with the Soviet Union during the Cold War. This is because of the erosion of its capacity to restrict the transfer of military-related technology to the PRC. Secondly, a growing number of actors in Washington have reassessed the nexus between national security and economic interests at stake in the US-China relationship - by moving beyond the Cold War trade-off between the two - in order to maintain American military preeminence vis-à-vis its strategic rivals. By focusing on how states manage the heterogeneous and potentially competing security

and economic interests at stake in a bilateral relationship, this book seeks to shed light on the evolving character of interstate rivalry in a globalized economy, where rivals in the military realm are also economically interdependent.

In decisions about migration, asylum, justice, and order, the transfer of sovereignty from the Member States to the European Union has been one of the most surprising task expansions in the European project. This book sheds light on these extraordinarily dynamic institutional developments and the resulting policy outcomes. Comprising both conceptual and empirical contributions, the book asks whether established theoretical schools of thought still hold true or whether the institutional conditions induced by the Lisbon Treaty have led to new modes of interaction and given weight to rival explanations. This book examines the process of Poland's accession negotiations to the European Union between 1998-2003. An empirical study based on Robert Putnam's two-level game model, it charts the influence and role of key domestic actors and groups on the negotiations especially in three critical, controversial, areas - areas where EU accession threatened to bring about a profound transformation to Polish life - agriculture, with particular emphasis on direct payments and production quotas; the purchase of real estate by foreigners; and the free movement of labour. This book demonstrates the complex interaction between the domestic and international level of

negotiations and furthermore, shows how critical this link can be to negotiation outcomes at the international level. It reveals how susceptible Poland's negotiation process was to domestic pressure, particularly public opinion and interest groups. Drawing heavily on qualitative analysis – such as press releases, news wires, policy documents, as well as quantitative analyses, such as the use of opinion polls, and supported by in-depth, unrestricted interviews with key Polish decision-makers, this book examines the dynamics of policy formation in Poland and shows how this translated into the final conditions of accession.

This study of American trade policy addresses two puzzles associated with the use of aggressive bargaining tactics to open foreign markets. First, as the country with greater power and resources, why has the United States achieved more success in extracting concessions from some of its trading partners than others? Second, why is it that trade disputes between democratic and authoritarian states do not more frequently spark retaliatory actions than those between democratic pairs? Ka Zeng finds answers to both of these questions in the domestic repercussions of the structure of trade between the United States and its trading partners, whether the United States has a competitive trade relationship with its trading partner, or whether trade is complementary. This book offers practical policy prescriptions that promise to be of interest to trade policymakers and students of international trade policy. Ka Zeng is Assistant Professor of Political Science at the University of Arkansas, Fayetteville.

factors—changing market conditions, negotiator beliefs, and domestic politics—as key influences on strategies and outcomes. The author develops an insightful mid-range theory premised on bounded rationality, setting it apart from the most common form of rational choice as well as from views that reject rationality. *Negotiating the World Economy* reveals a rich set of future research paths, and closes with guidelines for improving negotiation performance today. The main ideas are relevant for any country and for all who may be affected by economic bargaining.

Palestinian and Israeli Public Opinion is based on a unique project: the Joint Israeli-Palestinian Poll (JIPP). Since 2000, Jacob Shamir and Khalil Shikaki have directed joint surveys among Israelis and Palestinians, providing a rare opportunity to examine public opinion on two sides of an intractable conflict. Adopting a two-level game theory approach, Shamir and Shikaki argue that public opinion is a multifaceted phenomenon and a critical player in international politics. They examine how the Israeli and Palestinian publics' assessments, expectations, mutual perceptions and misperceptions, and overt political action fed into domestic policy formation and international negotiations -- from the failure of the 2000 Camp David summit through the second Intifada and the elections of 2006. A discussion of the study's implications for policymaking and strategic framing of future peace agreements concludes this timely and informative book.

This book represents one of the first comparative studies of international treaty ratification processes in multiple issue areas. It employs the comparative case study method, drawing on original research, elite interviews, and discursive analyses of government documents in Europe, Australia, and North America.

This book examines the legitimacy and effectiveness of the Antarctic Treaty System. This cutting-edge textbook is the most comprehensive introduction to international relations theory available. It argues that theory is central to explaining the dynamics of world politics, and includes a wide variety of theoretical positions, from the historically dominant traditions to powerful critical voices since the 1980s. The editors have brought together a team of international contributors, each specialising in a different theory. They each explain the

Since the 1990s, Japan's economic diplomacy has undergone fundamental changes. The reconfiguration of regional and global power encouraged the Japanese government, in coordination and cooperation with the private sector, to reassess its economic diplomacy policy. Economic Diplomacy: Japan and the Balance of National Interests illuminates the debates underlying these shifts, the various ways by which Japan's reinvention of its economic diplomacy is implemented, and the consequences for Japanese foreign policy at large. The insights presented in this book can be applied to the study of countries around the world, including but not limited to other states in East Asia that follow a similar economic growth model, and Western countries."

How exactly do countries negotiate major international agreements? Until now, reliably impartial accounts of how deals are made have been rare and usually describe only one side of a multiparty process. Here, Maxwell Cameron and Brian Tomlin provide the first full, three-country account of the negotiations surrounding the controversial North American Free Trade Agreement, which went into effect on January 1, 1994. Through extensive interviews with participants from all sides, Cameron and Tomlin develop a detailed picture of the process by which the United States, Mexico, and Canada pursued closer economic relations and of the political realities that influenced the politicians and policymakers in each country. Written in an

engaging and accessible style, *The Making of NAFTA* is a faithful account, built on insider views, of how the representatives of the three countries prepared for, negotiated, and implemented the agreement. Cameron and Tomlin show how NAFTA was influenced by the personalities and the multiple, sometimes conflicting objectives of the individuals involved. They also explore what the negotiations can reveal more generally about the making of public policy and the importance of international negotiations.

Since the early 1990s, there are two increasingly hot topics attracting numerous scholarly attentions in Chinese politics: first, it is the transformation of China's political system. Second, it is China's increasingly involvement in international regimes. Nevertheless, until now, there are only a few scholars to work out the distinctive relations between them, and even less people work on the bureaucratic politics level. By explaining and evaluating the development of policymaking coordination in the United Nations Framework Convention on Climate Change (UNFCCC), the author demonstrates the argument that international regimes have contributed to the development of coordination in Chinese Policymaking, taking the UNFCCC as a departure.

In this book, Jeffrey Knopf investigates domestic sources of state preferences about whether to seek cooperation with other countries on security issues. He does so by examining whether public protest against nuclear weapons influenced US decisions to enter strategic arms talks. The analysis builds on the domestic structure approach to explaining foreign policy, using it as the starting point to develop a new framework with which to trace the influence of societal actors. The book's finding that protest had a major impact suggests that prevailing conceptions of the relation between domestic politics and international cooperation need to be broadened. Existing approaches typically assume that state preferences are set by political leaders or powerful interests, thereby treating the rest of society only as a constraint on state action. In contrast, this book demonstrates that ordinary citizens can also serve as a direct stimulus to the development of a state interest in cooperation.

This collection makes available key articles on the Japan-North American relationship from the Meiji era to the present. Volume one focuses on the necessity of Japanese modernization post-1868 and examines the build-up to the Japanese bombing of Pearl Harbour. Volume two looks at the post-war period, in which US forces occupied Japan and were instrumental in its rebuilding as an economic superpower. In the years following this Japan and North America enjoyed a close yet occasionally fraught relationship, as competitors and allies. Volume two also examines the cultural ramifications of the influence of North America on Japan, and vice versa. Titles also available in this series include, Japan and South East Asia: International
