lifetime skill. This 'Easy Lessons for Learner Drivers' book has been prepared primarily to help learners follow a structured series of driving lessons in preparation for taking their practical driving test. It follows closely the requirements for driver training as laid down by the Driving Standards Agency who conduct all driving tests and have the key to your future on the road in their hands. In its' various sections it includes the following. 1. Twelve complete and fully illustrated lesson plans covering the twelve elements which are assessed during your practical driving test. 2. A total of almost 150 fully detailed colour illustrations each of which focuses in detail on the subheadings in the various lesson plans. For the sake of conformity and clarification the blue car in every image is always the learner vehicle. 3. A guide to the most commonly experienced driving faults committed by

learners allowing them to be more aware of the pitfalls and to help with self assessment. 4.A multiple choice Question & Answer section (complete with answers) enabling you to check just how much you have learned. The lesson plans have been set out in a general logical order with a view to taking you through from novice to test standard and beyond. However, the order in which the plans are presented and the subject matter contained therein should be adapted to meet your own needs. You may for example have already taken a number of lessons and are struggling in one particular area. Or you may indeed have already taken a test and failed on one or more of the specific elements. In either case a study of this book will undoubtedly help. This book is designed to help you understand what is expected of a learner driver and whilst it will be an invaluable asset in the learning process there is no substitute for practical driving lessons with a qualified instructor. A fully qualified instructor should by law display a green octagonal licence in the windscreen of the tuition vehicle to indicate he or she is a Driving Standards Agency approved instructor. So look for the licence badge before you take lessons and better still look for a driving school which uses the instructors' version of this book so that you are both on the same wavelength. This book costs a fraction of a practical driving lesson, but it will be money well spent. You will learn quicker. You will need fewer lessons. It will save

you money.

A new edition of this handbook shows existing instructors how their skills can be developed as well as helping trainees with the ADI entrance examinations and tests.

Are you training to be a DVSA Approved Driving Instructor and confused by the amount of resources there are out there. This book has been written by Me, Kathleen Kirkland, to assist those taking their part three exam. It is written with each pre set test in a role-

play scenario. People learn by four different methods; visual, audio, reading or kinaesthetic or a mixture of several. This book will assist those that learn by reading or a mixture of several methods. It can supplement other learning resources that you have already. I feel the role play scenarios, give a foundation of understanding useful for you to comprehend how a lesson is structured and how the phase one and phase two differ significantly. Also within the lessons plans are the timing that should be spent on the briefing, question and answers and practice of each lesson. PDI's that have been training with my school for many years have been using these PST dialogues and have found them extremely helpful. This is the reason why I have decided to start selling the book on the open market for other PDI's to benefit. The lessons are set out in the pre-set test (PST) order; there are ten PST's in total. Each divided into two lesson plans. Phase one is for a beginner or partly trained learner and phase two for a trained learner. Each PST lesson is labelled (a) for phase one and (b) for phase two, for example: Lesson 1a - Controls and the main driving aids of the car. Lesson 1b - Crossroads. The lesson plans have been written with a full dialogue for each topic. The lessons do not need to be read as a script, they should be adjusted with your own terminology and characteristics. Notes for you, the Instructor are shown in *Italic*. These notes are to give you guidance on the particular point in the PST. For each PST there is a note for which rule of The Highway Code and lesson diagram to use in conjunction with the lesson. The lesson diagrams that I use are the 'colour file professional lesson

The colour file professional's and other training resources are available to purchase from my website [www.kathleensom.co.uk](http://www.kathleensom.co.uk). You can of course use any lesson diagrams you so choose, although you will need to work out yourself, which diagrams are to be used with each PST.
