Essay from the year 2015 in the subject Business economics - Personnel and Organisation, grade: B, Sophia Antipolis Campus (France); SKEMA Business School, language: English, abstract: Within my research paper I analyze how the further development of robotic devices will influence our working environment. Robots are going to change the global economy drastically. With severe effects on the job market, as recent studies outline. In the United Kingdom alone one third of jobs could be omitted due to the "robot-revolution", in the United States with 47 percent even almost half. Especially in "low-skilled" job fields robots could take

many working spaces of human beings, enormous social shifts would result. Even though a lot of people argue that technical advancement and therefore the further development of robotic devices bring advantages to our lives for the most part, we have to start to realise that robots may replace our jobs and therefore adapt to a changing work environment. More and more people are outcompeted by a non-living species an, unlikeable scenario that though will take place in the future and therefore people have to learn to deal with this new setting.

Due to changes in the learning and research environment, changes in the behavior of library users, and unique global disruptions such as the COVID-19 pandemic, libraries have had to adapt and evolve to remain up-to-date and responsive to their users. Thus, libraries are adding new, digital resources and services while maintaining most of the old, traditional resources and services. New areas of research and inquiry in the field of library and information science explore the applications of machine learning, artificial intelligence, and other technologies to better serve and expand the library community. The Handbook of Research on Knowledge and Organization Systems in Library and Information Science examines new technologies and systems and their application and adoption within libraries. This handbook provides a global perspective on current and future trends concerning library and information science. Covering topics such as machine learning, library management, ICTs, blockchain technology, social media, and augmented reality, this book is essential for librarians, library directors, library technicians, media specialists, data specialists, catalogers, information resource officers, administrators, IT consultants and specialists, academicians, and students.

The story is set in 2032, in a dystopian Britain during the Third World War. The 2020s have been ravaged by new covid outbreaks and the world has descended into conflict. To control the population, the British Government sets up The Ministry of Information run by a young Intelligence Officer called Sophie Hallam. The Ministry is able to use the latest surveillance equipment available to track the citizens of the UK under the guise of The War Act and Civil liberty has been eroded under the pretext of homeland security. Britain is no longer a land where freedom can be taken for granted. Charlie Wilson is a University Professor supplementing his income as a freelance journalist. Sophie Hallam starts tracking him. Is Charlie a 5th columnist and a subversive. What about his enigmatic friend and colleague at the London School of Economics, Karam Hashid? This fast paced, cat and mouse chase, around the streets and landmarks of London is an edge of the seat thriller against the backdrop of a not too futuristic world that has emerged from the Covid 19 Pandemic, a world of insecurity, fear and bleakness. The story takes the reader on an epic global journey from China to America, from the countries of Africa to the shores of Southern Europe, from Syria to Nigeria and closer to home, the intimacy of The Borough Market, Westminster and the Thames Barrier. This novel will stretch the readers mind in length and breadth but also in time, spanning a period of fourteen years. Is this futurology or just nail biting fiction? In America, the Biden Presidency, the second American Civil War and the return of Donald Trump in 2024 presages war with China. The Chinese invasion of Taiwan and the absorption of Hong Kong leads to the outbreak of World War Three. This is no conventional war, instead fought by proxy

and regulatory framework for this fast-moving area.

This book proposes an alternative political economy framework in which to analyse the question of the credibility of international economic agreements, in general, and monetary arrangements in particular. The focus is on European monetary arrangements, from the establishment of the European Monetary System to the crisis of the Euro-zone. The analysis is predicated around the political economy of Italy's access and permanence in the Economic and Monetary Union (EMU). The author argues that the case of Italy, which made a concerted effort to join the EMU in the first wave, is particularly striking. Support for the single currency was widespread when it was introduced, yet something went wrong. Nowadays, its participation to the European monetary integration process cannot be easily taken for granted, especially after the vicissitudes of the Euro-zone crisis.
