Practical guide for anyone planning a long-distance motorcycling trip. Choosing, preparing and equipping a motorbike, documentation and shipping, life on the road, trans-continental route outlines: Asia, Africa & Latin America. Updated and now in full colour, this best-seller has been in print for almost 30 years.

The Best of Peter Egan offers a “greatest hits” collection of Egan's motorcycle musings from the past four decades, delivered in his signature, wise but amusing, style. Peter Egan's writing invites you to pull up a chair, pour a little scotch, and relax while he shares with you his tales from the road, his motorcycling philosophy, and his keen observations about the two-wheeled life. For some forty years, Peter Egan's columns and feature articles have been among Cycle World's most anticipated monthly content. Egan's legions of fans know they will gain a fresh perspective on motorcycling from each of his articles. Drawings from motoring artist Hector Cademartori beautifully illustrate Egan's musings, and a foreword by super-enthusiast Jay Leno introduces the book. This is an unforgettable collection from a master writer whose simple adventures of two-wheeled life remind us why we love to ride.

Young and beautiful, Lois Pryce was a rising star at the BBC. Unbeknownst to her co-workers, Lois lived a parallel life as a biker babe with an overwhelming sense of wanderlust. So she packed in her career to ride her motorcycle on her own from the northernmost tip of Alaska to the southernmost tip of South America. Alone. Armed only with the Spanish words for 'caution' and 'cheese', Lois was rather under-prepared for multiple bear sightings, bribing her way through borders, spending a night in a Mexican brothel and crashing her bike in the wilds of Patagonia. She most certainly got the adventure she craved, and her pulse-pounding, soul-searching adventure has already attracted fans worldwide - a weblog that she kept whilst on her travels was receiving more than two-thousand hits a day. Her hilarious, brilliantly written travelog will appeal to anyone who's ever dreamt of jacking-it-all-in and running away to see the world.

Esta obra presenta el contenido formativo que responde al currículo de la unidad UF0674 Modelos de actuación ante múltiples víctimas, primera unidad del módulo Logística sanitaria en situaciones de atención a múltiples víctimas y catástrofes, perteneciente al certificado de profesionalidad Atención sanitaria a múltiples víctimas y catástrofes (SANT0108), regulado por el RD 710/2011 de 20 de mayo. Las catástrofes y los incidentes de múltiples víctimas son sucesos cada vez más frecuentes. Desde el punto de vista de la asistencia sanitaria, implican una desproporción entre el número de víctimas y los recursos sanitarios disponibles para atenderlas. Este manual expone y desarrolla los modelos de actuación en la atención a múltiples víctimas y catástrofes; una suma de operaciones complejas que ocurren en un escenario con desorden y confusión que precisa una planificación previa, la activación de los planes de emergencia correspondientes, que exista un buen nivel de coordinación de las instituciones y servicios movilizados y, sobre todo, que los profesionales sanitarios que intervengan posean una formación actualizada y especializada en el manejo de este tipo de incidentes. El contenido se presenta de manera didáctica y práctica: imágenes, destacados, cuadros, mapas conceptuales, ejercicios de aplicación, de resolución y de evaluación, resúmenes, bibliografía, webgrafía y páginas de documentación contribuyen a profundizar en el aprendizaje, afianzándolo y reforzándolo. Por su estructura y estilo, docente y alumno lo utilizarán de manera sencilla, práctica y estimulante. En definitiva, una obra imprescindible tanto para profesionales sanitarios como para quienes inmersos en proceso de formación desempeñarán su actividad en este entorno

laboral. El autor, titulado en Enfermería, experto universitario en cuidados críticos, urgencias extrahospitalarias y en gestión de servicios de enfermería, no solo cuenta con una amplia formación en urgencias, emergencias y atención a múltiples víctimas sino que posee una importante experiencia profesional en el ámbito de las urgencias de atención primaria, cuidados críticos hospitalarios y emergencias prehospitalarias, tanto en puestos asistenciales, como en cargos de dirección y gestión. Ha sido docente en el ámbito universitario y en el de la formación profesional en urgencias y emergencias, investigador principal en varios proyectos relacionados con las emergencias, y ha realizado diversas publicaciones en este campo, con ponencias en congresos y jornadas nacionales como internacionales. Ello le permite abordar los contenidos desde una perspectiva especializada e interdisciplinar, destacar los aspectos clave para el desempeño de la práctica profesional y utilizar una metodología atractiva y adaptada al alumno.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin

and tire/wheel service tools from all the top brands. And for riding gear or casual wear, see the Drag Specialties/ Parts Unlimited Helmet/Apparel catalog. Combine all three catalogs for the most complete powersports resource of 2014.

Ten essays discuss federal democracy, the form of government of the United States. The first essay discusses the origins of American federalism. The second examines why we have a federal system, the functions federalism serves, and the consequences of federalism for the American political system. Federalism in the Constitution and constitutional law are treated in the third essay. The importance of cultural pluralism in American life and the role of American federalism in supporting pluralism are the foci of the fourth essay. The roles that the local community, the states, and political parties play in the federal system are examined in essays 5, 6, and 7, respectively. State, local, and professional roles in citizenship education are discussed in the eighth essay. The ninth essay explores how high school U.S. history and government textbooks approach federalism. The concluding essay describes resources on federalism that can be used in curriculum development at the secondary and college levels. Many of the essays are followed by topics for further study and suggested readings for teachers. (RM)

Perfect in its compactness, in its functionality, and in its widely imitated design, the Vespa scooter is not only a means of transport, but a true icon. In celebration of Vespa's 75th anniversary, Vespa: Style and Passion is the lavishly illustrated official history of the legendary scooters and the culture they've inspired. Introduced by the Italian firm Piaggio in 1946

with the model 98, Vespa enjoyed quick success. The scooters' diminutive size and affordability were perfect for promoting postwar mobility. But as with most novel designs, it would also be highly imitated, destined for icon status. From Piaggio's origins to the first Vespa prototypes to today's forward-looking Elettrica model, Vespa: Style and Passion is the ultimate retrospective of this beloved brand. A rich selection of visuals includes dozens of studio images of the most significant models from throughout Vespa history--including classics like the 125, 150 GS, Super Sprint, Primavera, and Rally--as well as period advertisements, rare archival photographs, and images of Vespas in popular culture and motorsport. Mod culture, perhaps most responsible for spreading scooter culture, is also given its due with images of customized Vespas. Vespa: Style and Passion relates with elan and high design the endless evolution of a marque that has conquered six continents, with 19 million units sold. The Vespa is not simply a scooter, but the scooter, known and appreciated the world over--a rare example of a motor vehicle that survived crises and fashions, always remaining faithful to the original concept. This is the definitive story of that influence.

Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. Why Forests? Why Now? synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

For many motorcyclists, the next best thing to riding or working on their bikes is reading Peter Egan's Cycle World columns. His conversational style and adroit language make his writing appeal to all types of riders.
