Case Problems in Finance McGraw-Hill Education

Two young women arrive in a nameless British small-town. Their names are not their own. They don't declare their ages. Their relationship with each other is not clear. Are they sisters, as their assumed identities declare? Or are they mother and daughter?

Multiple choice tests for every area of cosmetology help students prepare for licensing examinations.

Two 100 question tests simulate actual state board exams. An answer key is included. The state exam review accompanies each text purchased at no extra charge!

Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial analysis and forecasting, cost of capital, working capital management, capital budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring.
