EarthAn Alien Enterprise- the Shocking Truth Behind the Greatest Cover-up in Human History
Welcome to the future. Here is a story that started with the time of Noah; and is what could not be discerned except by archeologist uncovering the ancient story. It is not told as such; because the various religious communities would not allow the TRUTH TO BE TOLD. This goes into past generations and surpasses even our own generation into the future; and we all stand in the shadow of history ignorant of the reality when the truth of evidence is staring you straight in the face. It is an ancient society that has the patience to live in a distance from mankind; while the story of our own identity becomes a struggle listed in my other work; with the outcome waiting for the revealing of alien life that was our progenitors on Earth. The surprising revelation of this story that is yet to be fulfilled; could just as well be the prophecy of Nostradamus explained before the events are to happen in time. This is assumed to be a fiction; that is not a fiction when considering it is the only possible alternative history to the past; and has implications as prophecy verses written actually speaking of these events to occur in the future for mankind. Our very survival as a planet of life may depend on our understanding this possibility. The story of humanity from another aspect of unexplained evidence that has romance, adventure, tragedy, drama of human endurance, intrigue, discovery, conflict and the uncertainty of battle from the aspect of Presidential command. Based on Nostradamus prophecy for verses that will not be presented as used. Gregory Alan

An original novel set in the universe of Star Trek: The Original Series! 2268: Following the encounter with the mysterious Gary Seven in the twentieth century, the crew of the U.S.S. Enterprise is startled by two intruders who have transported through space and time from Earth circa 1968. Incredibly, one of the infiltrators is a Vulcan, who asserts that he's lived among Earth's population for over a decade. The other represents a little-known race, and reveals to Captain James T. Kirk that she has spent that last twenty years working to bring about humanity's destruction. It is then that Gary Seven's young protégé, Roberta Lincoln, arrives seeking Kirk's help... 1947: In the wake of the infamous "Roswell Incident" involving a crashed alien craft and beings from another world, Captain James Wainwright finds himself recruited as one of the first members of Majestic 12, a secret organization with two goals: Collect evidence of extraterrestrial activity on Earth, and develop strategies to combat alien invaders. And it is this very mission that will consume Wainwright's life for the next two decades, driven by the knowledge that the danger is as real as the aliens living among us...™, ®, & © 2013 CBS Studios, Inc. Planetary atmospheres are complex and evolving entities, as mankind is rapidly coming to realise whilst attempting to understand, forecast and mitigate human-induced climate change. In the Solar System, our neighbours Venus and Mars provide striking examples of two endpoints of planetary evolution, runaway greenhouse and loss of atmosphere to space. The variety of extra-solar planets brings a wider angle to the issue: from scorching "hot jupiters" to

ocean worlds, exo-atmospheres explore many configurations unknown in the Solar System, such as iron clouds, silicate rains, extreme plate tectonics, and steam volcanoes. Exoplanetary atmospheres have recently become accessible to observations. This book puts our own climate in the wider context of the trials and tribulations of planetary atmospheres. Based on cutting-edge research, it uses a grand tour of the atmospheres of other planets to shine a new light on our own atmosphere, and its relation with life.

The Enterprise leads a brave group of settlers to a distant planet and defends the fledgling colony against alien invasion. Original.

The Simulation Hypothesis, by best-selling author, renowned MIT computer scientist and Silicon Valley video game designer Rizwan Virk, is the first serious book to explain one of the most daring and consequential theories of our time. Riz is the Executive Director of Play Labs @ MIT, a video game startup incubator at the MIT Game Lab. Drawing from research and concepts from computer science, artificial intelligence, video games, quantum physics, and referencing both speculative fiction and ancient eastern spiritual texts, Virk shows how all of these traditions come together to point to the idea that we may be inside a simulated reality like the Matrix. The Simulation Hypothesis is the idea that our physical reality, far from being a solid physical universe, is part of an increasingly sophisticated video game-like simulation, where we all have multiple lives, consisting of pixels with its own internal clock run by some giant Artificial Intelligence. Simulation theory explains some of the biggest mysteries of quantum and relativistic physics, such as quantum indeterminacy, parallel universes, and the integral nature of the speed of light. Recently, the idea that we may be living in a giant video game has received a lot of attention: "There's a one in a billion chance we are not living in a

simulation” -Elon Musk “I find it hard to argue we are not in a simulation.” -Neil deGrasse Tyson “We are living in computer generated reality.” -Philip K. Dick Video game technology has developed from basic arcade and text adventures to MMORPGs. Video game designer Riz Virk shows how these games may continue to evolve in the future, including virtual reality, augmented reality, Artificial Intelligence, and quantum computing. This book shows how this evolution could lead us to the point of being able to develop all encompassing virtual worlds like the Oasis in Ready Player One, or the simulated reality in the Matrix. While the idea sounds like science fiction, many scientists, engineers, and professors have given the Simulation Hypothesis serious consideration. Futurist Ray Kurzweil has popularized the idea of downloading our consciousness into a silicon based device, which would mean we are just digital information after all. Some, like Oxford lecturer Nick Bostrom, goes further and thinks we may in fact be artificially intelligent consciousness inside such a simulation already! But the Simulation Hypothesis is not just a modern idea. Philosophers like Plato have been telling us that we live in a “cave” and can only see shadows of the real world. Mystics of all traditions have long contended that we are living in some kind of “illusion” and that there are other realities which we can access with our minds. While even Judeo-Christian traditions have this idea, Eastern traditions like Buddhism and Hinduism make this idea part of their core tradition — that we are inside a dream world (“Maya” or illusion, or Vishnu’s Dream), and we have “multiple lives” playing different characters when one dies, continuing to gain experience and “level up” after completing certain challenges. Sounds a lot like a video game! Whether you are a computer scientist, a fan of science fiction like the Matrix movies, a video game enthusiast, or a spiritual seeker, The Simulation Hypothesis touches on all these areas, and

It's not about giving workers a smiley face for producing more widgets. You'll discover how game mechanics—particularly popular multiplayer video games—provide field-tested best practices for engaging workers in creative and complex activities. seek out new life and new civilizations, to boldly go where no man has gone before."™ Simple, straightforward -- that's Star Trek.® So what's all the fuss? Why do news crews always seem to find someone, somewhere dressed up in a Star Trek costume? What could be so interesting to so many people? Star Trek 101 is the answer. You'll learn just a little about the heroes (Captain Kirk believes that man wasn't meant to live in paradise), the villains (Klingons have a thirst for conquest), and the important aliens (Vulcans live their lives by logic). In the handy recaps for all things Star Trek, you'll discover that the television shows and movies run the gamut from action-adventure to comedy. Just want to sample? The ten essential episodes are offered for your consideration. Star Trek 101 is a quick primer of the television shows and movies that carry the Star Trek name. With the help of Captain Archer and Doctor Phlox, Commander Charles "Trip" Tucker stages his own death in order to join a shadowy, secret organization to launch a deep undercover investigation into the Romulans' powerful new warp drive to determine if it could pose a threat to a fragile new alliance. Original. After a chance skirmish with an armed killer in central London, agent John Mordred ends up in hospital, condition critical. Six weeks and a full recovery later, he's persuaded it's purely a police matter, so one he should forget about. But nothing in MI7 is ever that simple. There's more to this particular incident than

meets the eye and unnamed people in high places want it investigating. They believe Mordred's the man for the job. Add to the mix five missing IMF officials, the kidnapping of a top British financier in Venezuela, evidence of a related cover-up in Whitehall, a young and unpredictable London Lord Mayor with acute delusions of grandeur, plus - most bizarrely - persistent rumours of local UFO sightings, and things threaten to spin radically out of control. Suddenly Mordred's life is on the line again. This time, alongside those of innumerable others. And it's him versus the clock.

The Star Trek:Enterprise Quiz Book is a fun selection of original questions (and answers!), comprehensively covering all facets of the TV series! As a fun family game it will separate the Archer's from the Xindi, the T'Pol's from the Klingons, and is a fantastic way to enjoy Enterprise even more.

This book explores the idea that art can enact small-scale resistances against the status quo in the social domain. These acts, which we call "little resistances," determine the limited yet potentially powerful political impact of art. From different angles, seventeen authors consider the spaces where art events occur as "political spaces," and explore how such spaces host events of disagreements in migratory culture. The newly coined word "migratory" refers to the sensate traces of the movements of migration that characterize contemporary culture. In

other words, movement is not an exceptional occurrence in an otherwise stable world, but a normal, generalized process in a world that cannot be grasped in terms of any given notion of stability. Thus the book offers fresh reflections on art's power to move people, in the double sense of that verb, and shows how it helps to illuminate migratory culture's contributions to this process.

An ordinary guy gets thrown into a futuristic reality. As he's employed by a huge corporation called the Asteroid Enterprise. He soon finds he's out of place and seeks to go back to his own time.

High above the planet Earth, an alien probe appears -- and in an unspeakably horrific instant, releases a deadly blast that strafes the planet's surface, leaving a miles-wide, smoldering crater of destruction in its wake. Millions die in Florida, Cuba, and Venezuela, their lives blotted out in a blazing millisecond. Just as swiftly, the probe implodes and crashes on the planet surface, but the remnants provide no clue as to its origin. Who are the attackers, and what provoked them? Aboard the Starship Enterprise™, Captain Jonathan Archer learns of the destruction. His ship is called home; it is uncertain whether its mission of space exploration will continue. But before Enterprise reaches Earth, Archer is abruptly kidnaped from the bridge by the time-traveling enemies he has encountered before. He finds himself aboard a Suliban vessel, face-to-face with his old nemesis, Silik, a high-ranking individual in a battle known only as the Temporal Cold War. Silik leads him to his master, a mysterious

humanoid from the far future. The humanoid claims that the attack on Earth was just a test; and the next attack will destroy Archer's home planet...unless he and the Enterprise crew stop it. To do so, they must enter a region of space called The Expanse - an area so dangerous that no ship has ever emerged from it unscathed. Vulcan crews were driven to bloodthirsty madness, Klingon crews were anatomically inverted, their internal organs exposed outside their bodies...while they still lived. Many vessels were lost, never to be heard from again. Archer faces the greatest crisis of his career: Should he believe Silik's time-traveling master, and expose his ship and crew to the perils of The Expanse, in hopes of saving Earth from destruction? And can he convince Starfleet Command and the Vulcan High Council to let Enterprise go to face her biggest challenge?

Part 3 of 'Last Shuttle Flight, First Alien Contact' deals with a different mindset for both humans and aliens in this space exploration adventure of a first contact UFO sighting. Being aware of each other has altered the thinking of both. This sequel of a extraterrestrial contact series demonstrates how these two species begin to deal with each other and what their expectations for the future hold.

More than 400 films and 150 television series have featured time travel—stories of rewriting history, lovers separated by centuries, journeys to the past or the (often dystopian) future. from England, Canada, the UK and Japan, as well as for TV and films from elsewhere in the world. Tropes and plot elements are highlighted. The author discusses philosophical questions about time travel, such as the logic of timelines, causality (what's to keep time-travelers from jumping back and correcting every mistake?) and morality (if you correct a mistake, are you still guilty of it?).

1969: Captain John Christopher of the U.S. Air Force has just returned from a most peculiar mission to investigate a UFO sighting. But even though the mission took only a few minutes, the captain has vague memory flashes of futuristic humans, a pointy-eared alien named Spock, and a ship called The U.S.S. Enterprise™.... Government agent James Wainwright has waited for this fateful day ever since he encountered the conquering Ferengi Marauders Quark, Rom, and Nog in Roswell in 1947. Now he will stop at nothing to use Captain Christopher's secret knowledge to bring his campaign to defend Earth against alien attack to the forefront once again! Without warning or provocation an alien weapon appears above Earth and unleashes a blast that kills millions across two continents. A second such weapon could destroy the entire planet. In a desperate bid to save Earth and its people, Starfleet must change its mission from one of peaceful exploration to one of military service. Only the Starship Enterprise is fast enough to stop the production of a second Xindi weapon. But the crew cannot do it alone, and Captain Jonathan Archer accepts a contingent of Military Assault Command Operations personnel -- battle-hardened soldiers known as MACOs -- on board his ship. Starfleet and the MACOs are two very different services sharing a common goal, but divided in their views of how to attain it. It is a culture clash that echoes across centuries of military service. The men and women on board the Enterprise understand that somehow they must succeed in working together or the price will be paid in blood -- failure is not an option.

The aliens say they come in peace - but evidence suggests otherwise. An alien spacecraft is making its way towards Earth. It will arrive within weeks. The government and military are helpless to contain the increasingly desperate situation and must concede to the aliens' intention to inhabit the Earth, offering partnership in return for colonisation without bloodshed. But chances of peaceful settlement are soon swept

aside when a powerful sub-group known only as The Enterprise unleashes a biological weapon of mass destruction against the aliens. They hold out the prospect of a vaccine - if the aliens capitulate and hand over their ship. And now, in a battle between two intelligent life forms to gain control of the Earth, the future is uncertain and the possibility of mass extermination grows ever closer...

Free Enterprise Environmentalism argues that laissez capitalism can address climate change more effectively than socialism and government regulation.

An alien probe of unknown origin launches an assault on Earth; an attack so devastating that Enterprise is recalled from her voyage of exploration to help with Earth's defence. During the journey home, Captain Jonathan Archer receives intelligence that the origin of the probe is a little-known region of space called the Delphic Expanse. Vulcan Ambassador Soval informs Archer that the Delphic Expanse is notorious for bizarre occurrences, and few ships that enter it are ever seen again. Believing there will be a second attack, Archer convinces Starfleet to let him take Enterprise into the Delphic Expanse to seek out this mysterious new enemy. In doing so, he will be going against the Suliban, the Klingons, and the Vulcans, who are removing T'Pol from the Enterprise as a result. What is more, he will have to deal with a cadre of battle-hardened marines and their no-nonsense colonel who have been assigned to his ship.

Is there intelligent life elsewhere in the universe? It seems unlikely that Earth's inhabitants are the only ones. Those who claim to have witnessed UFOs and alien life are often dismissed as crackpots, yet the search for extraterrestrial intelligence has been conducted by scientists ever since technological advancements allowed for it. The viewpoints in this resource explore what it would mean on a practical level to find other intelligent life forms, how important space exploration is in general, whether governments or private enterprise should fund such searches, and other relevant issues.
