Are you getting started with Amazon FBA seller trying to figure out how to source products? If you're reading this that likely means you've heard of "Amazon FBA" or "private label products" being bandied around online or from other entrepreneurs. Perhaps you're already quite experienced in this field and are interested in how others run their business or perhaps you're simply curious about what the fuss is all about. In a nut shell, Amazon FBA can be compared to what eBay was 10 years ago, in terms of the opportunity it provides to earn money online. The actual technicalities of how FBA and private labelling works will be covered in the next two chapters. For those that are merely curious about it, we'd guess it's because you've heard that it's a lucrative way for almost anyone to make money or a living from. Shit, maybe you've even heard that people are able to run their private label businesses from the beach and only spend an hour a day maintaining it. Despite a beautiful picture of working on the beach in leisure with your laptop by your side, sun shining overhead, and the calls of nature in the background as waves crash on the shore with birds soaring through the blue skies, trust us when we say it really isn't as fun or nice as it sounds. There's sand everywhere! Getting into your laptop, pants, bags, and if it's a windy day, it's just blowing sand on you and the friction can be so hard the sand actually stings you. The glare from the sun on the laptop makes it insanely hard to see what's happening, especially if you've got sunglasses on. The amount of shit you have to deal with while trying to work on the beach goes on and on but if there's only one takeaway from this book, save yourself the hassle and don't try to work on the beach for anything. Okay, rant over. It's possible you've heard claims of people making \$1,000 dollars a day and this could range from groups of housewives to the unemployed making bank in a ridiculously short amount of time. Some go even further to claim they've made millions in just their first year, and what do they do now that they're millionaires? They sell books, courses, and products about how they made they're millions. Not to rag on these people too much as we know some who are actually legit and know what they're talking about and doing, but a lot of these people out there going about touting their courses aren't offering a whole lot of value for what they're charging or are simply sharing outdated information as they aren't actively selling in the Amazon marketplace anymore as they now make their living from selling their education based products. This book has been designed to provide a roadmap for you to follow step by step (for the most part) to selecting the best niche or product for you so that you can create a successful private label business. It would be a lie to say everything in the business is going to be easy. The actual processes and steps we provide are easy no doubt, and you may experience slight hiccups here and there. For the most part you will just need to put in the time and effort to

follow through on what's laid out for you (this is the difficult or easy part depending on you). Note that there will be struggles along the way to your success in this business. Anything worth having doesn't always come easy. We will provide the structure and roadmap for you to follow but it's up to you to TAKE ACTION and FOLLOW it through till the end. If you slack off at any point of the roadmap you will only decrease your chances of success. We're here to make sure you maximize your possibility of success. Dropshipping Shopify 2021 Imagine a business where you could sell whatever you wanted without having to handle the product physically and being able to charge whatever price you wanted to charge on it. This is essentially what dropshipping amounts to. It is a wonderful business model; you're going to learn all about it inside and out in this chapter. There are some disadvantages as well that would be remiss of me not to remind you of. I'll cover those as well since it is unrealistic for you to assume that everything will always beat hunky-dory. Either way, let's jump in and look at what dropshipping is. Dropshipping is the process where a middleman retails a manufacturer's or wholesaler's product. The middleman, in this case, is you, the store owner. The store owner takes care of all of the marketing aspects and drives traffic to the order pages, and the wholesaler takes care of product fulfillment, such as delivery and packaging. In some cases, you can even have the manufacturer brand the product with your own name and have them ship it to your customers. This business model is of immense help to the manufacturer and wholesaler since they get to focus on investing in what they know best, which is manufacturing the product. You get to focus on what you know best, which is to drive traffic and bring in sales. In effect, you're a one-person marketing team for the wholesaler's products. What's not to like? The customer will order the product via your website or sales channel and will pay you money. In turn, you pay the wholesaler at their quoted price, and you pocket the profits.

What was one of the first things you wanted to sell when you were a kid? Did you have a lemonade stand that went bust after two weeks, or did you sell baseball bats at little league games? Whatever kickstarted your selling career shows the true determination of a natural-born seller that was meant to take advantage of one of the world's greatest merchandise companies: Amazon. Amazon has been around for over 25 years, and it only continues to build momentum. Once marketed as only an online bookstore, it was unclear if the company would survive the next few years against such large alternatives such as Barnes & Noble. The company was completely internet-based, which many thought would be the end of the website, but it only became more popular with the addition of new products such as music and clothes. Some may not realize that the company that started off as an internet-based store for books was one of the first platforms to encourage outside sales. Originally called zShops, people could market original work or hard-to-find items. The idea exploded as more than half a million people purchased something on Amazon by 2000. Jeff Bezos was dubbed the king of e-commerce in 2001, just seven years after Amazon's launch. From its birth until now, Amazon has acquired 40 companies, but its major commerce is now in its third-party marketers. Outside sellers make up more than 50% of Amazon commerce today, and that number is only growing over the years. Online shopping has become the norm, and Amazon is leading the way in sales, accumulating billions of dollars every year, and its third-party sellers are riding the train to financial freedom. Amazon FBA was officially launched in 2006, so it is far from the newest selling platform, but it has shaped the path for other platforms of its kind, and it should be considered as the best service possible. Sellers can use accounts created with Amazon to sell their own merchandise with small fees collected by Amazon. With the internet growing in importance every year, selling online has never been easier. But why would you want to get involved with Amazon FBA? Well, if you have a knack for selling products, feel as though you have always wanted an online store, or just want to try something new, Amazon FBA is one of the easiest ways to get started. From its promises of prime delivery to customers to its total management of your products as soon as they are delivered to the warehouse, Amazon has you covered. They provide a service unmatched by any outside company, and they make selling easier every year.
