In Activities for Building Character and Social-Emotional Learning, hundreds of user-friendly lesson plans help teachers build attitudes of respect and caring, reduce problem behaviors, empower students to solve problems, and educate the whole child socially, emotionally, and academically. The lessons' literature-based connections allow teachers to 'build in' rather than 'add on' social-emotional learning (SEL) as part of the daily curriculum. The four teacher resources in the Safe & Caring Schools® series can also be implemented as a schoolwide preK-8 program.

Connect students in grades 5–8 with science using Science Games and Puzzles. This 96-page book promotes science vocabulary building, increases student readability levels, and facilitates concept development through fun and challenging puzzles, games, and activities. It presents a variety of game formats to facilitate differentiated instruction for diverse learning styles and skill levels. Coded messages, word searches, bingo, crosswords, concentration, triple play, and science jeopardy introduce, reinforce, review, and quickly assess what students have learned. The book aligns with state, national, and Canadian provincial standards.

Designed specifically for easy use, Exploring Ecology combines content with activities, all in one place, and organized into four clear sections. Although the book is targeted to teachers of science in grades 4–8, many activities have been adapted for students ranging from first grade to high school.

This monograph integrates theoretical perspectives on affect and learning with recent research in affective computing with an emphasis on building new learning technologies. The "new perspectives" come from the intersection of several research themes: -?Basic research on emotion, cognition, and motivation applied to learning environments -?Pedagogical and motivational strategies that are sensitive to affective and cognitive processes -?Multimodal Human Computer Interfaces, with a focus on affect recognition and synthesis -?Recent advances in affect-sensitive Intelligent Tutoring Systems -?Novel methodologies to investigate affect and learning -?Neuroscience research on emotions and learning

Fun and challenging activities help develop basic skills such as vocabulary, and build critical thinking and problem solving skills.

Thin on the Ground: Neandertal Biology, Archeology and Ecology synthesizes the current knowledge about our sister species the Neandertals, combining data from a variety of disciplines to reach a cohesive theory behind Neandertal low population densities and relatively low rate of technological innovation. The book highlights and contrasts the differences between Neandertals and early modern humans and explores the morphological, physiological, and behavioral adaptive solutions which led to the extinction of the Neandertals and the population expansion of modern humans. Written by a world recognized expert in physical anthropology, *Thin on the Ground: Neandertal Biology, Archaeology and Ecology* will be a must have title for anyone interested in the rise and fall of the Neandertals.

Here is a fascinating book that describes selected collections of sci-tech archives and manuscripts. Librarians will gain valuable information on the ways in which sci-tech archival material is being handled and preserved in various institutions and organizations. *Sci-Tech Archives and Manuscript Collections* is a helpful guide that also describes ways in which these often unique and irreplaceable materials are organized so they can be searched and used. Corporate, academic, and governmental organizations are represented, and some attention is given to the international scene. Topics include a description of the American Museum of Natural History collection, a survey of archival materials at zoos and aquariums, a description of the efforts of the American Institute of Physics Center for History of Physics to develop the international Catalog of Sources for History of Physics and Allied Sciences.
